## Hay Market Reports

Compiled by USDA Market News Service • St. Joseph, Mo.–Portland

Hay prices are dollars per ton or dollars per bale when sold to retail outlets. Basis is current delivery FOB barn or stack, or delivered customer as indicated. Grade guidelines used in this report have the following relationship to Relative Feed Value (RFV), Acid Detergent Fiber (ADF), TDN (Total Digestible Nutrients), or Crude Protein (CP) test numbers:

GRADE	RFV	ADF	TDN	CP
Supreme	185+	under 27	55.9+	22+
Premium	170-185	27-29	54.5-55.9	20-22
Good	150-170	29-32	52.5-54.5	18-20
Fair	130-150	32-35	50.5-52.5	16-18
Utility	under 130	36+	under 50.5	under 16

 FOB: Kings-Tulare-Fresno Counties, 8.90 no comp

## Dairy Report

Compiled by USDA Market News Service • Madison, Wis.

### Fluid Milk and Cream — Western U.S. Oct. 10

In the West, milk supplies are generally plentiful, and California is no exception. This week, milk output has grown in California, but remains mostly in good balance with what the industry needs. Class I intakes are unchanged from a week ago.

The Arizona milk market is flat, with sufficient volumes available to producers within the state. Milk yield is leveling to slightly up as cooler weather in the mountains is keeping

cow comfortable. Manufacturers report not needing to bring any milk from out-of-state. Class II requests are at the same levels as in the prior week. Class I sales are mostly stable.

In New Mexico, milk production is steady. With several schools either on fall break or about to close for the break, Class I demand has declined. Class II sales are also trending lower.

Pacific Northwest milk production is strong. Milk intakes are keeping most manufacturing facilities full. Bottling demand is

steady. Industry contacts say there is plenty of cream and multiples have eased back somewhat.

Milk production in the mountain states of Idaho, Utah and Colorado is flat to seasonally lower. However, some farms continue to add cows into the milking herd. As a result, milk intakes are keeping manufacturers running at or near full capacity. Small disruptions in processing continue to cause excess loads of milk. Some processors are picking these loads up at \$4.75 under Class IV.

The condensed skim market is fairly balanced. A lot of the supplies are moving to dryers for nonfat dry milk production. This week, the western region is swimming in a pool of cream. Cream multiples for all Classes have declined on both edges of the range.

Ice cream buyers continue to decrease their intakes.

Butter churning activities are a bit more active.

## Livestock Auctions

### Oregon EUGENE (Eugene Livestock Auction) Oct. 12

Total Receipts: 593  
 Comments: Good vaccinated calves brought \$10-15 more than unvaccinated calves. Some buyers are showing no interest in calves that are not preconditioned. Sheep and goats steady as previous weeks. All ewes \$0.66-0.73 lb.
