protein/butterfat components levels continues ramping up in California, Arizona and New Mexico. Comfortable temperatures and enough availability of fair/good guality alfalfa hay have led dairy herds to produce higher milk yields. In this way, milk/cream intakes are more than adequate for most dairy manufacturing needs throughout the Southwest region.

**Dairy Report** 

Farm milk production with high

In order to balance the current oversupply of raw milk, several spot

Prices to retailers, sales to volume buyers, USDA Grade AA white eggs in cartoons, delivered store door, cents per dozen.

Jumbo	171-183	Extra Large 172-179
Large	173-182	Medium 122-131

# **Cattle Market Reports**

Compiled by USDA Market News Service • Oklahoma City-Des Moines-St. Joseph, Mo.-Moses Lake, Wash.

NATIONAL FEEDER AND STOCKER CATTLE (Federal-State Market News) St. Joseph, Mo. Jan. 31

RECEIPTS: This Week

Last Week Last Year 269,900 219,400 338,100 Compared to last week, steers and heifers sold mostly steady to 3.00 higher nationwide except for the Southeast. which was 1.00 to 3.00 lower.

Demand was evident this week in the Dakotas on lighter weight calves suitable for summer grazing (under 600 lbs). The heavier weight cattle that will go directly to the feedyard are still in demand; just not at the handsome prices seen at the beginning of January. Another winter storm blew through

the country this week but impacted the Southern Plains more than the Northern Plains this time. Travel was dicey from the Texas Panhandle through Missouri as temperatures were at the right level for frozen precipitation.

The wheat in the Southern Plains did need a drink and still needs more. Feedyards are sharpening their pencils after the latest rounds of winter weather that have hit from the Texas Panhandle to the Dakotas.

Incoming bigger feeders must be bought at lower prices as the first cost is always the largest investment in feeding cattle. Cost of gains are increasing as the winter has taken its toll on pen conditions in several areas this winter. The extra mud does takes energy away from weight gain and steer carcass weights declined to 901 lbs for week ending Jan. 25, 6 lbs lower than the previous week and 13 lbs heavier than a year ago.

For the first 4 weeks in January, the industry's average steer carcass weight is nearly 20 lb larger than a year ago.

That extra "tag" in the Northern Plains is said to have moved the dressing percent below par of 63 percent recently. Advancement on the CME Cattle Complex has been a struggle the past 3 weeks. However, this week three days out of the five-day work week showed a positive on the Board.

In the last few weeks, the Cattle Complex has been vulnerable to outside sources that are not fundamentally driven. Cattle numbers have not increased; however, the market continues the downturn. Since Jan. 13, the front five Live Cattle contracts have been devalued 6.10 to 8.50; while the February through May Feeder Cattle contracts have diminished 11.63 to 12.55. Cash cattle trade finally occurred mid-day on Friday 1.00 lower at 121.00 live in the Southern Plains and dressed in Nebraska was 2.00 lower at 193.00.

Boxed-beef values continue to struggle with a combination of large slaughter levels, heavier carcass weights and seasonal time of the year. Cattle Slaughter under FI estimated at 631K for the week 9K less than last week and 6K more than a year ago. On the week, Choice cutout closed 2.88 lower at 210.12, while Select was 6.77 lower at 203.89; putting the Choice-Select spread at 6.23.

Auction volume this week included 47 percent weighing over 600 lbs and 43 percent heifers.
