Compared to June 12:Trade activity moderate on moderate demand. According to the June 15 NASS Crop Progress report,

in Tulare County, harvesting of winter grain such as wheat, oats and barley was completed. However, some winter grain fields re-mained for dried grain harvest. Some winter grains, especially oats were being cut, dried and baled for hay. Cotton fields were being cultivated and irrigated. Fields were being fertilized and tilled for corn and sorghum planting as well as cultivated for weeds. Alfalfa continued to be irrigated, cut, dried and baled. In Fresno County, herbicide applications were ongoing in barley and oat fields as gooded. Gother prograd due to wearness weather. Wheel for needed. Cotton emerged due to warmer weather. Wheat for fodder, sorghum, triticale, and winter wheat forage was being har vested for dairy feed and cover crop. Harvested fields were disked and cultivated for re-planting of more forage crops. Rice fields were growing well. A few mustard fields were mowed, and safflower fields were drying down in anticipation for harvest. The rice crop was progressing at a normal pace in the Sacramento Valley. Hay is reported FOB the stack or barn unless otherwise noted. Regions are defined at bottom of report.

### **Dairy Report**

Compiled by USDA Market News Service • Madison, Wis. Fluid Milk and Cream — Western U.S.

June 18 California milk supplies are down and are not always enough to fill spot demands.

However, the most pressing needs can be taken care of without any major issue. Milk roduction is still lower. Class I sales steady. Class II demands are somewhat increasing. A few ice cream manufacturers are taking more milk for their production needs. Milk component levels are down.

In Arizona, farm milk output remains unchanged from a week ago. Milk volumes produced are enough to meet the needs of buyers. However, there is no surplus milk

available for additional buying. Processing facilities are running a bit below full capacity. Bottled milk demands are steady, whereas Class II requests are ramping up due to increased ice cream production. No milk is coming from other states.

Milk production in New M declining. The warmer weather conditions are impacting milk yield. Nevertheless, manufacturers are getting their needs filled. Holdovers are back to normal levels as the machines that were down last week are back up and running. Milk supplies are manage-able. Class I and II sales are steady. In the Pacific Northwest, milk production

has plateaued. Milk handlers and farmers are keeping milk intakes in good balance with processing needs. Most manufacturers are running at or near full capacity. Bottling demand is steady. Class II processors are soaking up much of the cream, and a lot of milk fat is getting tied up in cheese pr tion as well. Cream supplies remain tight. Idaho, Utah, and Colorado remains heavy.

Milk production in the mountain states of Seasonal weather is not putting much of a damper on milk production. Many manufacturers are running well above designed capacity for their facilities, but milk availability is not an issue. Within the region.

some spot loads of milk are priced at \$4 under Class IV. Industry contacts also report milk handlers are sending a few loads of milk out of state at lower prices. Condensed skim drving is active. Some loads are going to

tight, but not as much as last week. Demands are still strong, but have relaxed a bit compared to the previous week. Cream multiples for all Classes are steady on the range.

# **Cattle Market Reports**

Moines-St. Joseph, Mo.-Moses Lake, Wash.

Compiled by USDA Market News Service • Oklahoma City-Des

NATIONAL FEEDER AND STOCKER CATTLE (Federal-State Market News) St. Joseph, Mo. RECEIPTS:

This Week Last Week Last Year 216,600 240,400 216,400 Compared to last week, steers and heifers sold steady to 4.00 lower. Demand at auctions was moderate to good across the nation. Cattle sold for delivery months out are also in demand On Superior Livestock's Annual Tallgrass

Auction, a load of 750 lb heifers located in Kansas for August delivery that had every bell

and whistle associated with them sold at 140.50

around 20.00 higher than the next load that sold for current delivery. USDA announced some changes to the Livestock Risk Protection (LRP) insurance plan effective July 1 by allowing ranchers to cover more of their herd. Some ranchers will utilize this tool in their marketing plans as more

Feeder cattle futures settlements have been steadily rising in recent weeks on most contracts. Boxed beef has been in a lower trend since May 12, when it was at 475.39. As of today's noon report, the drop in value has been around 261.00, allowing wholesalers and retailers to stock shelves at lower prices. Boxed beef load counts are also decreasing.
On Thursday's noon report, the total load count

was 131 so far today compared to last Thursday at 181. The morning's boxed beef prices for Choice were at 213.56 and 204.08 for Select. As beef was unavailable in grocery stores a few weeks ago, consumers turned to local farmers and ranchers to supply their needs.

Local, custom processing facilities have been inundated with calls for appointments for Shoppers were not very happy about the lack of beef supply and turned to their neighbors and friends in the livestock industry. Most of the locker plants are state inspected in the country

and most states do not allow those processors to sell individual cuts to consumers due to fed-

eral regulations. Some consumers will now be

purchasing quarters, halves or whole carcasses

instead of buying the usual smaller amounts in a retail setting.
Estimated slaughter under federal inspectior has continued to rise in recent weeks. The

weekly estimate is at 656K head, a slight decrease of 2K less than last week and 12K less than a year ago. The Rural Main Street Index has risen to 37.9 for June. A positive uptick from May at 12.5 and April at 12.1. For perspective, neutral growth would be 50.0. Cattle on Feed Report released today had On

Feed at 100 percent; Placements at 99 percent

and Marketings at 72 percent. Marketings were the lowest for May since the series began Auction volume this week included 53 percent weighing over 600 lbs and 41 percent
