Fluid Milk and Cream — Western U.S. Dec. 17

Farm milk production is California is generally stable this week. Industry contacts suggest milk intakes are in good balance with processing needs. Bottled milk demand is starting to slow down as schools prepare to close for the winter break. Therefore, more milk has been moving toward Class III manu-facturing plants, with some of them operating close to full capacities. With lower daytime temperatures and

longer nights, cow's milk production is slowly increasing in Arizona. Some processors are bracing for next week's anticipated spike in balancing and churning activity. Out-of-state milk extraction has declined, and handlers are filling their customers' orders primarily with milk from state farmers. Class I and II sales are

milk from state farmers. Class I and II sales are stable to declining. Farm milk outputs are on the rise as cows respond favorably to cooler weather in New Mexico. Balancing needs have increased due to downtimes at a few Class III producing

Nevertheless, all milk loads were redirected

appropriately to meet other processing needs aside from cheese. Shipments into Class I are trending lower as schools prepare to close. Class II requests are slightly up. Pacific Northwest milk production is steady

Milk intakes are in good balance with process-ing needs. While milk handlers have not had any issues getting milk to where it is needed, they do expect to make more adjustments next week for the holidays. Retail fluid milk bottling is steady to higher.
Idaho, Utah, and Colorado milk production

is strong. Manufacturers have plenty of milk

for processing. A few loads are available at a \$4 under Class IV discount. Milk handlers are trying to get ahead of the annual holiday milk load juggling. Some contacts anticipate a few challenges to find homes for all of the milk. Across the West, condensed skim demand is generally unchanged from the previous week. Cream sales in the West are stable to a bit

down ahead of the holiday. Plant managers are expecting a seasonal upsurge in cream availability come next week. This week, cream multiples are unchanged from last week.

Cattle Market Reports

Compiled by USDA Market News Service • Oklahoma City-Des Moines-St. Joseph, Mo.-Moses Lake, Wash.

NATIONAL FEEDER AND STOCKER CATTLE (Federal-State Market News) St. Joseph. Mo. RECEIPTS

his Week Last Week Last Year 05,900 390,200 282,500 Compared to last week, steers and heifers sold steady to 3.00 higher. Receipts this week are typical for the last full marketing week of a year when some producers want to sell before winter weather really gets here. Some will also defer payment at their local auction markets to the next year. Over the next two weeks, livestock auction

volumes will be very limited with several ac-knowledging the holidays in front of them and letting employees rest up for the receipts that will be substantial the first full week of 2021. There are several special cow sales scheduled across the Plains the next two weeks for an opportunity for cow/calf producers to make financial moves they feel necessary for 2020. Colder weather has spread across this country this week just prior to the official calendar start to winter that is this upcoming Monday Stockpiled grass or what ranchers could

stockpile will go faster as energy needs of cows/calves & grazing cattle increase as the temperatures drop. This week, Winter Storm Gail showed us what ole man winter can do by dropping significant amounts of snow from Ohio and

West Virginia up through the Northeast as over 51 million people were under a Winter Storm Warning.

This week in the fed cattle arena, the Northern Plains dressed sales were 3.00 lower at 165.00, while trades in the Southern Plains sold steady with live sales at 108.00. Two years ago, dressed sales were 190.00 and live sales were 119.00.

The fall/early winter-feeding period has been good so far from a feedyard perspective. A little moisture doesn't hurt near as bad as a

10-inch snow that comes before the ground has a chance to freeze.

Retailers completed their beef holiday buying a couple weeks ago and the Choice cutout has dropped over 30.00 in three weeks with over 20.00 of that decline happening last week. On the week, Choice cutout closed 5.25 lower at 208.63, while Select was 1.44 lower at 194.27; as the Choice-Select spread has

narrowed to 14.36. Cattle Slaughter under federal inspection estimated at 659K for the week, 6K less than last week and 9K less than a year ago.
