Fluid Milk and Cream — Western U.S. April 2

Industry contacts in California anticipate reaching peak flush in a few weeks. Milk production is flat year over year but following seasonal patterns. Spot load sales are very limited; it is difficult for milk sale outlets to find available capacity. Class I and Class II demand are steady.

Daytime temperatures are climbing in Arizona, but the nights are still cool. Cows are comfortable, and milk production is nearing peak. Class I demand is high, and bottling and other dairy manufacturing operations are maintaining balance.

Class I orders in New Mexico are returning to normal following spring breaks. Production is steady, and balancing plants are active.

Milk output in the Pacific Northwest is increasing but well-balanced. Class I demand is strong overall but shows slight variation across the region as different states cycle through spring break. Spring temperatures, ideal for cow comfort,

are returning to the mountain states of Idaho, Utah, and Colorado. There are some concerns about higher feed costs, but contacts suggest current water supplies are in good shape ahead of the spring planting season. In addition, farmers have good amounts of quality forage to maintain strong milk production until the new hay crop comes in. Contacts say some milk is being transported out of the region to help with balancing, and output is expected to continue to grow Condensed skim annual contract sales

are steady, and spot loads are meeting local demand as it arises. With spring holiday retail butter orders in the rearview mirror, cream supplies have loosened a little in the West. Butter production has slowed slightly, and churns are attracting less cream than in recent weeks. Ice cream makers would prefer lower than current cream prices but want to stay ahead of seasonal demand, especially if pandemic issues fade early in the summer. Cream multiples inched up a few points on the top of the range this week.

Pacific Northwest Market Order: Milk delivered to the Pacific Northwest Order 124 totaled 562.7 million pounds in February 2021. Class I utilization was 129.5 million pounds and accounted for 23.0 percent of producer milk. The uniform price was \$14.43. down \$0.25 from January 2021, and \$2.39 below the same month a year ago.

Arizona Market Order: Milk delivered to the Arizona Order 131 totaled 318.7 million pounds in February 2021. Class I utilization was 94.8 million pounds and accounted for about 29.8 percent of producer milk. The uniform price was \$14.69, down \$0.29 from January 2021, and \$2.56 below the same month a year ago.

Moines-St. Joseph, Mo.-Moses Lake, Wash.

NATIONAL FEEDER St. Joseph, Mo.

### RECEIPTS

This Week Last Week Last vear 257,000 276,500 201,100 Compared to last week, steers and heifers sold 1.00 to 4.00 higher. Demand was good to very good again this week especially early week sales that did not get to take

full advantage of the price increases the previous week. Cost of gains in the feedyard took front and center this week when the WASDE report was released on Wednesday mid-day. Corn and soybean futures immediately locked limit up and closed there.

Planting intentions were released with 91.144 million acres of corn projected to be planted, while sovbeans were estimated at 87.600 million acres and both less than industry guesses.

As the major feedstocks for cattle were sharply higher, buyers wanted to procure more thinner fleshed cattle that will have compensatory gain instead of a fleshier one that will not feed very efficiently. On Wednesday, the CME Feeder Cattle

contracts were rocked by the higher grain prices and closed from 2.100 to 3.025 lowe on all CY 2021 contracts. Negotiated live cash cattle in the Southern Plains sold at 117.00 this week, 2.00 higher than the previous week and Nebraska dressed sales were quoted at 188.00 to 190.00, 3.00 to

5.00 higher. Wholesale beef demand by retailers and foodservice is sending wholesale prices soaring for this time of year. Grilling season is right around the corner

and grocery stores are gearing up as warmer April and May weather will bring out the grills that have been under a tarp for the winter.

Choice boxed beef values closed the week 15.19 higher at 252.85, while Select

was 19.20 higher at 246.97. The Choice-Select spread was nearly half of last week and was published at 5.88. Cattle Slaughter under federal inspection estimated at 609K for the week, 40K less than last week, and 22K less than a year ago.

Around Easter every year, beef and hog slaughter facilities take some time to give the workers an extra day on either side of the holiday.

Auction volume this week included 54 percent weighing over 600 lbs and 46 percent heifers
