# California Egg Reports

Compiled by USDA Market News Service • Des Moines

Daily California Eggs

May 7

Benchmark prices are unchanged. Asking prices for next week are unchanged for Jumbo, 1 cent lower for Extra Large and 2 cents lower for Large, Medium and Small. Trade sentiment is steady to instances barely steady. Offerings are light for Jumbo and Medium, moderate for Extra Large and moderate to mostly heavy for Large. Cartoned egg sales are reported as improving and are rated as light to mostly moderate. Loose egg demand is moderate to fairly good. Ware-house buying interest is also moderate to fairly good as many buyers feel the market as settled and are beginning to replenish current floor stocks. Supplies are light to moderate. Market activity is slow to moderate. Small benchmark price \$1.05.

LEBANON (Lebanon Auction Yard) April 29 Receipts: 464 cattle

Comment: We are in desperate need of more rain. Pastures are exceptionally dry for this time of year and it's starting to show in the feeder cattle and the cow-calf market. Less interest in cattle that usually go back to grass. The corn market is really m an impact in the yearling cattle. With the high cost of gain expected to continue they desperately want to buy the feedlot cattle for less. We are now experiencing COVID problems with labor in the packing plants again and it's backing the cattle up. The organic cows continue to sell extremely well. It's amazing what competition does for the

DAVENPORT (Stockland Livestock Auction) May 3

Receipts: 371 HD Comments: Monday's regular cattle sale featured over 350 head of stock, with a nice run of cows, bulls and feeders. Slaughter cows and bulls were \$3-\$7 lower on Monday, with an influx of cows coming up from drought stricken California increasing the supply and decreasing demand for cows locally. Cows topped out at 65 cents per pound for slaughter, and feeder cows brought up to 79 cents per pound. The average on cows was 58-60 cents per pound. Slaughter bulls brought up to 91 cents per pound, with an average price of 85 cents. Feeder cattle were lower on an uneven supply, with not enough of any one class for a true market test. 700-800 weight steers were stronger for the local market, bringing up to \$1.34, with an average of \$1.29, and 800 to 900 weight

steers brought \$1.30. Baby Calf: under 50 lbs 75.00-375.00 HD; Bull Calf: 300-400 lbs 133.00-141.00; 400-500 lbs 112.00-135.00; 500-600 lbs 92.00-139.00; 600-700 lbs 68.00-121.00; 700-800

**Dairy Report** Compiled by USDA Market News Service • Madison, Wis.

Fluid Milk and Cream — Western U.S. May 6 California milk production is steady.

Class I orders are level. Class II is absorbing additional fluid milk due to seasonal production of ice cream and frozen desserts. In Arizona, milk output is strong, and so is Class I demand. Dairy processors with available bottling or drying capacity are bringing in additional milk from the mountain states. Hearty Class II and III orders are supporting active ice cream and cheese

manufacturing. Milk supply is even in New Mexico. Balancing plants are working through large volumes of milk, and holdover numbers are decreasing. Contacts report that Class I demand is down slightly, Class II demand is

flat, but Class III demand is growing due to increased cheese production There is an abundance of milk in the Pacific Northwest. Milk output is strong,

and regional dairy processors are also

helping to clear milk that would have gone to the Oregon creamery that was recently damaged by fire. Class I demand is strong. Industry contacts say that the milk jug

resin shortage appears to be resolved and is no longer a hindrance to bottling. Milk production is stable in the mountain states of Idaho, Utah, and Colorado. Class I orders are level. Contracted condensed skim is steady, but local spot load requests, and availability, are reported to be limited. Persistent tanker and driver shortages are a barrier to moving condensed skim into other regions.

Western cream is tightening a little, but

production is strong, and butter churns are

seasonally active, there is not much excess

cream coming into facilities. This week,

cream multiples for all classes inched up

supply is adequate for current demand.

While cream cheese and ice cream

one point at the top of the range.
