pared with 31,000 last week and 35,000 last year.

Dairy Report

Compiled by USDA Market News Service • Madison, Wis. Fluid Milk and Cream - Western U.S.

Much of the West is hotter and drier than usual. Temperatures in California have been boosted as much as 10-15 degrees higher than normal, hitting triple digit temperatures in several areas. Some crops are reportedly drying out quickly in the heat. Alfalfa is on its third cutting. Milk production is seasonally decreasing, but output is still abundant. Bottling orders

Milk vield is level in Arizona. Some dairy manufacturers with available capacity are bringing in out-of-state milk supplies. Class

I demand is steady. Milk is widely available in New Mexico. Milk output is heavy, and Class I orders are lower. Generous volumes are clearing to

balancing plants, and holdover numbers are high. In the Pacific Northwest, depleted subsoil moisture is limiting the impact of recent rainfall on improving drought conditions.

Contacts share that several counties expe-

riencing parched conditions are requesting

state drought declarations. With that said,

the region experienced temperatures optimal for cow comfort this week, and milk output continues to be strong. Double digit overbase programs are in place to help manage the abundance. Class I demand is lower, but demand for Class II

and III is stable. In the mountain states of Idaho, Utah and Colorado, milk production is steady to heavy. Some contacts report that spot loads are available in Idaho at discounts of up to \$5.50 under Class IV. Bottling orders are level to lower. Contracted condensed skim is steady, and limited spot loads are

available around flat class pricing. Cream supplies are ample. Butter production is mixed, and the same is true for ice cream, as well. Some plant managers say that Southwestern ice cream production is decreasing, while others report that production is still very active in the Northwest. Some contacts believe this is an effort to refill the ice cream pipeline after a heatwave passed through the

Pacific Northwest a few weeks ago. Cream multiples dropped a few points at

the top of the range this week.

Cattle Market Reports

Compiled by USDA Market News Service • Oklahoma City-Des

NATIONAL FEEDER AND STOCKER CATTLE (Federal-State Market News) St. Joseph, Mo.

RECEIPTS: This Week Last Week Last Year 282,300 177,300 240,400 Compared to last week, steers and heifers sold uneven; 3.00 lower to 1.00 higher. Demand was reported moderate to good

inventory at lower prices. Cattle feeders are faced with high costs of gain as corn continues to be high at many areas nationwide and the fed cattle market at 120.00; however, with the back months of the futures contracts on either side of 130.00 there is still a lot of interest in feeding cattle.

however, most were wanting to take or

that never see 100 degrees in a summer have already experienced that. Couple that with the drought in the Dakotas and it makes for a very disconcerting year for many ranchers in the Northern Plains and Upper Midwest. Although still very hot and humid, the

force to make hay while the sun shines.

Most of the coming week looks dry so there should be many tons of hay put up this week Year-to-Date Cattle slaughter through May is

near 7 percent more than last year and near 6 percent more than the previous five-year average. All classifications of the beef cattle segment (steers, heifers, beef cows and bulls) are around 8 percent more than a year ago and 18.5 percent more than the previous five-year average.

Moines-St. Joseph, Mo.-Moses Lake, Wash. of 2010. Those cows were then sold off and

nationwide as receipts returned to normal fol-lowing the Memorial Day holiday week. Order buyers were wanting cattle to fill empty pens;

The heat has arrived across the midsection of country with a vengeance as many areas

weather seemed to break from chances of rain every day and farmers went to the fields in full

as farmers try to get caught up.
According to preliminary slaughter data,

Beef cow slaughter has been aggressive this year with almost 1.4 million cows harvested so far this year as of the end of May. The last

time that the beef cow numbers were this large at this time was in the contraction year

while dressed sales in Nebraska sold at mostly 191.00. Choice boxed beef values hit a plateau and closed the week 1.42 lower at 337.56, while Select was 6.52 lower at 305.21 for the same time period. Boxed-beef values seem to have topped with prices staying in line with last week's trade range with analysts
