TURLOCK (Turlock Livestock Auction Yard) June 8 Receipts: 4800 HD Comment: We saw a large volume of mostly 500-700 lb calves with about 600 yearling 500-700 ID caives with about 500 yearing steers and heifers. The market was 5-10 cents better than the previous week due to quality and volume buyers in the seats. Calves purchased are headed throughout the Western states and Canada. Many thanks to our buyers

Dairy Report Compiled by USDA Market News Service • Madison, Wis.

Fluid Milk and Cream — Western U.S. June 17 Some delivery delays and bottlenecks were reported this week as contacts say that the widespread transportation issues plaguing

the country, including steep freight and tanker shortages, are worst in the West. Little to no precipitation fell in much of the region this week, and the West continued to face higher than normal temperatures. Despite these conditions, and despite normal seasonal patterns of declining yield, Western milk is abundant.

Many of California's water reservoirs are at less than half capacity and nearing record low levels. Melting mountain snowpack, which would typically help replenish reservoirs throughout spring and summer, is largely de-pleted. Some water restrictions are already in effect: farmers in central California have been warned of potential water cutoffs, and more widespread cuts are expected to come.

However, milk output is steady and strong. Contacts report that, so far, June production is trending up year-over-year and down slightly from last month. Class I orders are flat to lower.

Parts of Arizona are experiencing triple-digit temperatures in this week's heatwave. Milk output is beginning to drop as the weather

warms. While some handlers continue to

bring in out-of-state milk, those supplemental volumes are decreasing as well. Class I

Milk output in the Pacific Northwest is strong but starting to dip down in some areas, following typical seasonal patterns. Overbase programs are in place to help keep milk upply in check. Bottling orders are lower, but Class II and III demand is steady.

Milk production is flat in New Mexico. However, milk is widely available as Class I orders

are lower, and Class II demand is level. Some contacts say that balancing is a little stressed

as busy manufacturing plants are working to

achieve equilibrium between high holdover

Utah and Colorado, milk production is heavy in the north but is beginning to taper in the heat further south. Some contacts say spot loads are available in Idaho at discounts of up to \$5.50 under Class IV. Class I and III orders are strong. Condensed skim contracts are steady. Limited

Throughout the mountain states of Idaho,

spot loads are available around flat class pricing, Cream demand is increasing, but supplies are available to meet current dairy manufacturing needs.

Ice cream and butter production are mixed throughout the region, ranging from flat to very active, and cream cheese production is

picking up steam. Cream multiples shifted up

AND STOCKER CATTLE (Federal-State Market News) St. Joseph, Mo. RECEIPTS: This Week Last Week

NATIONAL FEEDER

Compared to last week, steers and heifers sold steady to 5.00 higher; with the largest gains coming in the North Central region. Order buyers are willing to take on early weaned calves or yearlings off short grass in the drought stricken areas up north.

the week after a limit down day on Thursday on Thursday only to bounce back somewhat on Friday as many analysts were thinking that the downturn was overdone. The Cattle Complex was mostly higher on

the week with only the back 4 months being lower on the week. June LC contract was 2.35 higher on the week and front 6 months of feeder cattle contracts were over 3.00 higher for the week. Boxed beef values have cooled dramatically this week with Choice boxed beef closing the week 14.28 lower at 323.28, while Select was 21.60 lower at 283.61 for the same time period. On Friday afternoon, the Choice-Select spread was reported at 39.67, the largest on record.

Negotiated live trading of fed cattle in the Southern Plains sold at 122.00, while dressed sales in Nebraska sold at mostly 195.00. Week ly Cattle Slaughter under federal inspection estimated at 663K for the week, 2K less than last week, and 174K more than a year ago. Auction volume this week included 58 percent weighing over 600 lbs and 45 percent heifers. Northwest Weighted Average Direct Feeder Cattle

Compared to last week's light test: Feeder steers not tested for Current FOB delivery. Feeder heifers lightly tested and 2.00 higher Demand good. Supply included: 100% Feeder Cattle (42.6% Steers, 57.4% Heifers). Feeder cattle supply over 600 lbs was 74%. Unless otherwise noted, Feeder Cattle prices FOB based on net weights after a 2-3% shrink or

The main driver for the higher cattle prices this week was the falling grain prices. For the week, nearby July corn lost near 30 cents on Likewise, soybeans were not fortunate either, with the July Contract down 1.1250 for the week after being near 1.20 lower on Thursday and over 66 cents higher on Friday. The grains complex changes were very much in the red
