Comments Comments: Monday's feeder special featured over 700 head of cattle, with a large run of cows and yearlings on offer. Slaughter cows were 5-6 cents higher, with the top of the cows bringing 83 cents, and the average price ranging from 67-73 cents per pound. Slaughter bulls were also stronger, topping out at \$1.03 per pound, with an average of 91 cents per pound. Feeder cattle were mixed, with a stronger market on 700-900 weight cattle, while light calves were mixed to lower. 700-800 weight steers topped out at \$1.46, with an average of \$1.36, while same weight heifers brought \$1.32, with an average price of \$1.30 per pound. 800-900 weight steers brought \$1.40 at the top end, and averaged \$1.35. Same weight heifers brought \$1.32 at the top, and averaged \$1.19. 500-600 weight steers brought \$156.50, averaging \$1.49 per pound. Baby Calf: under 300 lbs 95.00-300.00 HD;

pared with 31,000 last week and 37,000 last year.

# **Dairy Report**

Fluid Milk and Cream - Western U.S. July 15 Farm level milk production is decreasing in California, but milk is still widely available for all

needs. Class I orders are level to lower. Class III demand is steady, and cream cheese production is reportedly strong. Arizona milk production is following seasonal patterns and dropping in the hot summer weather. Bottling demand is down. Class II and III

orders are steady. Contacts say wildfires are not impacting dairying operations, manufacturing, or hauling routes. New Mexico milk production is steady. Class

I orders are level to higher. Balancing plants are active, and Class III demand is healthy. Milk output is down in the Pacific Northwest. Contacts say cows are still recovering from recent

heatwaves, and in some areas, milk has dropped

Compiled by USDA Market News Service • Madison, Wis. as much as 20% from peak. Bottling demand is

> Milk production in the mountain states of Idaho, Utah, and Colorado is steady to slightly lower. Despite heat-related decreases in production in Idaho, milk is still abundant. Some contacts report spot loads are available at discounts of up to \$5.50 under Class III. Bottling sales are higher Contracted condensed skim is steady. Cream is tightening. Variations in demand, availability, and cream-based manufacturing production

lower, Class II and III sales are flat to higher.

exist throughout the region. Contacts say cream is shorter in the Pacific Northwest than the Southwest, Limited fluid hauler availability hinders spot cream from moving too far from its origin. Cream multiples shifted up this week.

# **Cattle Market Reports**

Compiled by USDA Market News Service • Oklahoma City-Des

Moines-St. Joseph, Mo.-Moses Lake, Wash. NATIONAL FEEDER AND STOCKER CATTLE (Federal-State Market News) St. Joseph, Mo. July 19

RECEIPTS: This Week Last Week Last year 443,600 366,700 570,600 Compared to last week, steers and heifers sold steady to 2.00 higher in the South Central region and steady to 2.00 lower in the Southeast region. Demand was reported from

moderate to very good depending on the

in the nation this week. Typical southwest

quality and weighing conditions at auctions

summer weather continues to beat down on the earth in the upper third of the country. North Dakota is coming off one of the hottest and driest Junes on record and the hay stockpile situation in that area as ranchers buy feedstuffs to hold their herds in drought. On a typical year, hay will move from North to South, however market reporters are already seeing hay moving inverse to a normal year. Cooler temperatures that lasted longer than normal have hampered forage tonnage and that is what is needed to feed ruminant and

higher protein feedstuffs are easier to procure

to mix with the forage.

Beef cow slaughter persists as over 55% of the country has some sort of drought designation; down near 2% this week. Preliminary data covering the first half of 2021, Year-to-Date heifer and beef cow slaughter is 8% above a year ago, while total cattle slaughter is 6% above a year ago.
For the same period, beef cow slaughter is

over 19% more than the previous five-year average as well as the largest number slaughtered (approx. 1.713 million head) in the last 11 years. Contraction of the beef cow herd is indicated with that type of increase in the mature cow and fed heifer slaughter. The ag economy remains strong as for the seventh straight month, the Creighton

University Rural Mainstreet Index (RMI)

remained above growth neutral. According to

the monthly survey of bank CEOs in rural areas

of a 10-state region dependent on agriculture

and/or energy. The overall index for June fell to a still strong 70.0 from May's record high of 78.8, with 50.0 being growth neutral. The Boxed beef value slide has sounded like a broken record for five weeks now and Choice has lost over 65.00 since the first of June. The

dog days of summer are upon us with demand

shifting to hamburgers and hot dogs.

Choice boxed beef closed the week 10.65 lower at 267.94, while Select was 5.62 lower at 251.79 for the same period. On Friday afternoon, the Choice-Select spread was reported at 16.15. Negotiated live trading of fed cattle in the

Southern Plains sold at 120.00, while dressed sales in Nebraska sold from 196.00 to 202.00. Weekly Cattle Slaughter under federal inspection estimated at 653K for the week, 78K more than last week, and 7K more than a year ago. Auction volume this week included 54% weighing over 600 lbs and 41% heifers
