# **Sheep/Wool Market Reports**

Compiled by USDA Market News Service • Greeley, Colo.

-San Angelo, Texas

National Wool Review Feb. 18

Domestic wool trading on a clean basis had no confirmed trades reported this week **National Sheep Summary** 

Feb. 11
Compared to last week: Slaughter lambs sold very unevenly. At San Angelo, TX, and New Holland, PA, slaughter lambs were 5.00 to as much as 35.00 higher. At Sioux Falls, SD; Ft. Collins, CO; and Kalona, IA, lambs were weak to 25.00 lower. Slaughter ewes were mostly steady to 30.00 lower, except at New Holland 10.00-20.00 higher. No comparison on feeder lambs. At San Angelo, TX, 4,064 head sold. Equity Cooperative Auction sold 310 slaughter lambs in Colorado, 335 slaughter lambs in Kansas and 500 feeder lambs in Idaho. In direct trading slaughter ewes and feeder lambs were not tested, 4,529 lamb carcasses traded with no trend due to confidentiality. All sheep sold per hundred weight (CWT) unless

pared with 29,000 last week and 37,000 last year.

**Dairy Report** 

Compiled by USDA Market News Service • Madison, Wis. Fluid Milk and Cream — Western U.S.

Seasonally warmer weather is increasing cow comfort levels in California. With increased cow comfort, producers say that milk output is increasing. Some processing facilities are running below capacity due to labor shortages. Plant managers say that these labor shortages are limiting their ability to take additional loads of milk. Demand for Class II has declined, while

Class I demand is unchanged. Producers in Arizona say that farm level milk production is trending higher, but that milk output is down year over year. Transportation delays are causing some processing plants in the state to run

below capacity, while milk continues to be available. Demand is steady to higher across all Classes. Milk production is increasing in New Mexico, as some producers say they are sending loads to other regions to help meet demand. Contacts report that milk is available for production. Some loads are facing delays due to staffing shortages and an ongoing shortage of truck drivers. Class II demand is steady, while Class I demand

is trending higher. Warmer weather in the Pacific Northwest is contributing to higher milk production. Contacts report that the number of truck drivers and tankers in the area are limited.

reducing their ability to send milk to potential purchasers in other parts of the West. These shortages are also delaying the delivery of milk to some processing facilities. Some plant managers say that these delays, combined with labor shortages, are causing them to run below capacity. Demand is steady across all Classes. As in other parts of the West, milk

production is increasing in the mountain states of Idaho, Utah, and Colorado. Farm

portedly, down year over year. Some plant managers say that they have some space

level milk production in the area is, re-

to take on additional loads of milk, but that they are limiting their purchasing as labor shortages are causing them to run re duced schedules. Demand is steady across all Classes. Condensed skim contracts are steady throughout the region. Contacts say that there is some interest in loads of condensed skim from purchasers in the Midwest and Mexico. Stakeholders say that they are having some difficulty noving loads of condensed skim to these

areas due to a shortage of available truck drivers. The shortage of available truck drivers in the region is also affecting loads of cream. Cream inventories are available to meet steady demand. Western cream multiples moved higher at the top of the range,

while the bottom is unchanged.

# **Cattle Market Reports**

Compiled by USDA Market News Service • Oklahoma City-Des

Moines-St. Joseph, Mo.-Moses Lake, Wash. NATIONAL FEEDER AND STOCKER CATTLE (Federal-State Market News) St. Joseph. Mo.

**RECEIPTS** This Week Last Week Last Year 41,300 227,500 208,30 Compared to last week, steers and heifers 341,300 208.300 sold 5.00 to 9.00 higher. Demand continues to be good to very good nationwide this week as there weren't any winter storms to disrupt the

marketing flow of cattle.

The best demand was for the mid to lighter weight cattle that would be suitable for grazing once grass arrives; the calendar has now moved to the middle of February and turn out time will be here before ranchers realize. In many Midwestern states this week, many light 5-weight steer calves eclipsed the 200.00 mark and 8-weight steers have moved past the 160.00 level.

The feeder cattle futures for the summer and fall months are bullish and a higher feeder market may be on the horizon.
Cattle feeders remain optimistic for the

spring fat market and are willing to chase the feeder market as they want to have stock ready to market. In the Northern Plains, this winter has been open for the most part, which is allowing cattle to stay clean and grow easily. After the previous week surge in the CME Cattle Complex, last week the futures had difficulty keeping the momentum up. For this week, the Cattle Complex was mixed with the February through August Live contracts were lower with the Fall/Winter months being higher. The only Feeder Cattle contract higher for the week was the March contract and that was only 0.125 higher on the week. The rest of the listed months were 0.225 to 0.900 lower for the week.

Negotiated live trading of fed cattle in the

Southern Plains sold steady to 1.00 higher from the previous week at 140.00, while dressed sales in Nebraska sold 2.00 higher at 224.00. Cutout prices were pressured again this week as Choice boxed beef closed the

week 5.29 lower at 274.52, while Select was 8.22 lower at 267.83 for the same period. Weekly Cattle Slaughter under federal inspection estimated at 659K for the week,  $20\dot{K}$  more than last week, and 53K more than a year ago. If realized, the weekly Cattle Slaughter will be the largest this year so far and largest since the beginning of December 2021.

Auction volume this week included 61 percent weighing over 600 lbs and 43 percent Northwest Weighted Average Direct Feeder

Cattle Weekly Summary WA-OR-ID-UT RECEIPTS

This Week

1340 1624 932 Compared to last week: Not enough trades last week for current FOB to test trends. Slaughter cattle prices improved this week and slaughter rates finally showing an increase over last week and last year. Feeder demand good. Supply included: 100% Feeder
