Comments: Monday's regular cattle sale featured over 300 head, with a strong cow market and steady feeder market. Slaughter bulls topped out at \$1.19 per pound, with an average price of \$1.07. Cull cows brought up to 93 cents per pound, with an average price of 82-84 cents. Feeder cattle were steady, though not enough in any one class for a true market test. 500-600 weight steers brought \$1.80, with an average of \$1.65, while same weight heifers brought \$1.42, with an average price of \$1.22.

Dairy Report

Compiled by USDA Market News Service • Madison, Wis. Fluid Milk and Cream — Western U.S. March 31

In California milk production is increasing following seasonal trends. Loads of milk are available at a discount due to unplanned down time. Contacts report that there is limited availability at production facilities due to labor shortages and that limited tanker availability is prohibiting their ability

to move loads out of state. Demand is steady across Classes. Contacts report that milk production in Arizona is increasing, but that output remains below 2021 levels. Some processors report that they are no longer utilizing milk from outside the state, as supplies are available locally. Demand for Class I milk is steady to higher as some larger educational

facilities are returning from spring break.
Demand for Class IV is steady. In New Mexico farm level milk production is trending higher, though contacts report that production is down year over year. Milk is available in the state to meet current demands. Demand for Class I milk is steady to lower as spring break season has decreased

educational institution purchasing. Demand for Class II is steady. Pacific Northwest milk production is

increasing, following seasonal trends. Class I demand is lower as some educational institutions have adjourned for spring break. Balancing operations in the area are, reportedly, able to process these additional loads of milk. Class II and III demand is steady. Increased milk production in the mountain states of Idaho, Utah, and Colorado is contributing to greater spot availability. Some stakeholders in the area report that loads of milk are being sold from \$3 to \$5 under Class IV. Plant managers say that they

are unable to run at capacity due to labor shortages. Across all Classes, demand is unchanged. Condensed skim contracts are steady, in the West. Ice cream makers are scooping up more loads of cream as they increase production in preparation for warmer weather. Demand for cream is strong, and stakeholders say that spot inventories are tightening. Cream multiples are unchanged at the bottom, while the top moved higher.

Cattle Market Reports

Compiled by USDA Market News Service • Oklahoma City-Des Moines-St. Joseph, Mo.-Moses Lake, Wash.

NATIONAL FEEDER AND STOCKER CATTLE (Federal-State Market News) St. Joseph, Mo. April 4

RECEIPTS This Week Last Week Last Year 221,700 Compared to last week, steers and heifers sold steady to 3.00 higher. Demand remains very good for light steers and heifers to background, either in a feedyard or on

grass, moderate to good demand for the heavier cattle bound for finishing yards.

The supply of feeders was light to moderate as weather still impacted movement in some areas and regardle of weights, however, quality cattle with good health programs still fetch quality checks. Most producers have completed the marketing of last year's spring calf crop as newborn calves hit the ground, resulting in more limited numbers of feeder cattle being offered in the auctions. This fact is keeping the light-weight cattle market in the driver's seat as yearling operators that still need grass cattle to turn out compete heavily to get these cattle bought.
In addition to feed cost sharply rising, the

CME Live Cattle contracts have retreated and cattle feeders are facing difficulty in buying feeder cattle that will have a breakeven price in line with where the futures contracts are at. The lofty levels of the fall months of the Feeder Cattle futures are making for a very active and highly competitive market for cattle to background and make yearlings of. The supply of these cattle is dwindling greatly, driving the markets to higher levels again. Lack of moisture remains a concern across a good portion of the country, creating more worry for these producers as they just don't know how much stock they can put out on drought affected pastures.

Another notable item across the country is the price of cull cows and bulls, which are at very high levels. The beef cattle industry is in contraction mode at this point

and some cows are leaving farms a bit sooner than they would if price levels were lower. Higher quality slaughter cows are reaching regularly into the 90's with a few high dressing cows hitting 100.00 per cwt. High dressing slaughter bulls have climbed into the mid 130s at some locations as cow buyers are looking for lean product to mix in with the fed cattle trimmings.

Negotiated live trading of fed cattle in the Southern Plains sold steady from the

previous week at 138.00, while dressed sales in Nebraska sold 1.00 higher at The Boxed beef cutout gained again this week as sooner or later warm temperatures will encompass the country and bring on more BBQ'ing outside. Choice boxed beef closed the week 4.50 higher at 267.14,

while Select was 10.38 higher at 262.52 for the same period.
Weekly Cattle Slaughter under federal inspection estimated at 639K for the week 20K less than last week and 36K more than a year ago. Auction volume this week included 53 percent weighing over 600 lbs

nd 46 percent heifers. Northwest Weighted Average Direct Feeder Cattle Weekly Summary WA-OR-ID-UT
April 1

RECEIPTS

This Week Last Week 226 120 Compared to last week: Feeders were not well tested. Trade slow, demand light. Supply included: 100% Feeder Cattle (88.9% Steers, 11.1% Heifers). Feeder cattle supply over 600 lbs was 100%. Unless otherwise

noted, Feeder Cattle prices FOB based on net weights after a 0% shrink or equivalent, with a 0 cent slide >600 lbs. Livestock reported this week originated from ID, UT.
