LEBANON

(Lebanon Auction Yard) April 7 Receipts: 436 HD total, 436 HD cattle

Comments: Smaller run of both feeder cattle and cows this week. The majority of the feeder cattle were unvaccinated bawlers but still sold well with the farmer activity. The cow market was on fire this week with a few honest cows selling for over 1 dollar. I would call it 5-8 stronger.

DAVENPORT (Stockland Livestock Auction) April 4

Comments: Monday's feeder special featured 450 head of cattle, with a good run of 600-700 weight calves and cows. Slaughter cows were up a bit over last week, with an average price of 85 to 87 cents per pound, and a top price of 94 cents per pound. Bulls were steady, with a top price of \$1.06, and an average of 95 cents on a light run. Cow calf pairs brought \$1325 to \$1800. We had an excellent feeder market, with good farmer trade and commercial buyers on the market. 400-500 weight steers brought \$2.01, with an average of \$192.00, while same weight heifers brought \$1.54 and averaged \$1.34. 600-700 weight steers brought \$175.25 at the top end, and averaged \$157.15. Heifers weighing 700-800 pounds brought up to \$155.00, and averaged \$146.05. Dairy Report

Compiled by USDA Market News Service • Madison, Wis.

Fluid Milk and Cream — Western U.S.

April 7 Milk production is steady to higher in Califor-nia. Contacts report that milk production is flat compared to this time last year. Limited tanker availability is prohibiting stakeholders from moving loads of milk to other states. Some production facilities in the area are, reportedly, selling loads of milk at a discount due to labor shortages and unplanned down time. Steady

demand is present across all Classes. Farm level milk production is trending higher in Arizona, though contacts report that output is down compared to this time last year. Milk is available for processing in the state, and some plant managers report that they are no longer using milk produced in other states. Demand for both Class I and Class IV are steady.

New Mexico milk production is increasing following seasonal trends. Processors in the state say that milk is available to meet current production demand. Class I demand is steady to lower, as some educational institutions are closed for spring break. Class II demand is steady.

In the Pacific Northwest, farm level milk production is trending higher. Spring break at some educational institutions in the area has contributed to decreased Class I demand. Loads of milk that have become available due to this are being processed at balancing operations in the area. Demand is steady for Class II and III. In the mountain states of Idaho, Utah and Colorado, weather favorable to milk production is increasing cow comfort and contributing to higher milk production. Stakeholders say that spot milk is available and that some loads are being sold from \$2 to \$5 under Class IV. Some processing facilities in the area are running be low capacity, due to labor shortages. Demand is steady across all Classes

In the West, contracts for condensed skim are steady. Demand for cream is strengthening, as ice cream and butter makers are running seasonally active schedules. Cream inventories are available to meet current production needs. Stakeholders say that some purchasers from other regions, where inventories are tighter, have expressed interest in purchasing loads of cream from the West.

Cattle Market Reports

Compiled by USDA Market News Service • Oklahoma City-Des

Moines-St. Joseph, Mo.-Moses Lake, Wash.

NATIONAL FEEDER AND STOCKER CATTLE (Federal-State Market News) St. Joseph. Mo. April 11

RECEIPTS This Week Last Week Last Year 330,500 224.000 343.600

Compared to last week, steers and heifers sold steady to 3.00 lower. Demand was reported from moderate to very good depending on flesh condition and area. Buyers were willing to take on inventory albeit at lower prices due to sharply higher grain futures and falling upfront feeder cattle futures. Nearby Feeder futures were 5.025 and 6.750 lower for the week, while June Live cattle lost 2.025 this week.

In the grain pit this week, July corn was 0.39 higher and July soybeans were 1.0125 higher. December new crop corn closed the week at 7.16; 2.20 higher than last year same time and that has pressured futures this week.

The supply of feeders would be considered moderate at this point in the season, and Year to-Date auction receipts on this report are only around 44K less than a year ago. New crop unweaned fall calves have started

to make their way to town as ranchers are not willing to graze drought affected fields with calves this year. Demand was moderate for those kind and discounts are applied to those cattle that won't go to grass and take to gaining in a hurry.

Most ranchers are trying to hold their herd genetics together by keeping their best females. Cows that are somewhat borderline on production traits may find their way to town sooner rather than later as input costs have grown substantially in the last year.

Weather in the Plains continues to be a roller coaster as snow was seen flying in areas this week only to be followed by a warm-up into 70s and 80s over the weekend. Due to the fluctuating temperatures, farmers are now itching to get in the field even though the ground temperature may not be ideal they like to look at the calendar when making those first planting decisions. Negotiated live trading of fed cattle in the Southern Plains sold steady to 1.00 lower from the previous week at 137.00 to 138.00, while dressed sales in Nebraska sold steady at 222.00.

The Boxed beef cutout was mixed this week with Choice higher and Select lower. Whole-sale buyers will now turn to Mother's Day and Memorial Day holidays as Easter ham sales are this week in the grocery stores. Choice boxed beef closed the week 3.33 higher at 270.47, while Select was 2.19 lower at 260.33 for the same period

Weekly Cattle Slaughter under federal inspection estimated at 676K for the week, 37K more than last week and 34K more than a year ago. If realized, this week's cattle slaughter would be the fifth largest since 2011. Auction volume this week included 54 percent weigh-ing over 600 lbs and 46 percent heifers.
