490 sheep, 155 goats

Comments: The feeder cattle were steady with good farmer interest on the 800 lbs and up cattle. Limited number of weaned and vaccinated calves this week We are moving into the season of bawling fall calves. The cow market took a hit this week off \$5-10. Looks like big numbers coming to town have the plants backed up. They went from being short bought to having them in pens everywhere. The high prices just brought a lot of cows to town. The best of the light lambs sold in excess of 3.00 a pound with heavy lambs

taking a downturn again. Steers (Average-Top): 300-400 lbs NT; 400-500 lbs 132.94-166.00; 500-600 lbs 138.93-157.50; 600-700 lbs 142.55-160.50; 700-800 lbs 130.00-133.00 800-900 lbs 149.40-167.00; 900-1000 lbs NT; 1000-1200 lbs 127.00-130.00 Heifers (Average-Top): 300-400 lbs NT;

DAVENPORT

(Stockland Livestock Auction) April 25

Comments: Monday's regular cattle sale featured over 500 head of cattle, with a large offering of cull cows, bulls, and pairs. Slaughter cows were steady to lower on average, mostly due to a higher number of thinner, lower yielding cows than in previous weeks. Cows topped out at 98 cents per pound, with an average of 80-90 cents per pound depending on weight. Slaughter bulls were similar to the cow market, slightly lower on average. Bulls topped out at \$1.13, and averaged \$1.03-\$1.07. Cow calf pairs brought \$1100-\$1500, though bigger cows with calves over 200 pounds brought higher split. Feeder cattle were lower, though the difference in guality compared to last week's feeder sale was considerable. April 28

In California milk production is steady to higher. Contacts report that while volumes are up over the previous weeks, they remain below production levels this time last year. Some processors in the state are, reportedly, unable to utilize additional volumes of available milk, due to labor shortages.

Some processors in the state report that nearby states, with lighter milk production, are looking for loads to meet current market demands. Shortages of availabl tankers and truck drivers are limiting the ability of some processors from fulfilling these out of state orders. Demand is steady across all Classes.

Warmer weather in Arizona caused milk production to decline this week. Milk output is, reportedly, down year over year. Processing plants in the region are pulling in volumes of milk from other nearby states. Demand for Class I and II is steady

Milk production in New Mexico is steady this week, though some producers in the area say that overall output is down year over year. Some additional loads of milk have become available in the state due to unplanned down time. Processors report that they can relocate these loads to nearby balancing operations, and some say they have moved loads to nearby states with tighter milk availability. Class II demand is steady, while Class I demand is

Farm level milk production is increasing in the Pacific Northwest. Contacts say that improving weather in the area is increasing cow comfort. Milk is available, allowing processing facilities to run busy schedules. Demand for Class I and III is steady.

In the mountain states of Idaho, Utah and Colorado milk production is trending higher. Labor shortages in the area are, re portedly, contributing to some unplanned downtime at plants in the area. Milk loads are plentiful in the area, and loads are being actively sold on the spot market Stakeholders say that loads are currently being sold from \$3 to \$5 under Class IV. Stakeholders say that they are moving loads of milk to areas with tighter supplies Across all Classes, demand is steady

Condensed skim contracts are steady in the West. Stakeholders say that overall demand for condensed skim has been strong for the last few weeks. Demand for cream is steady. Ice cream and butter makers are running active schedules and pulling at regional supplies. Some purchasers from other regions are, reportedly, looking to the West for supplies to meet current production needs. Stakeholders say that limited tanker availability is causing them to focus their cream sales on local customers.

Cattle Market Reports

Compiled by USDA Market News Service • Oklahoma City-Des Moines-St. Joseph, Mo.-Moses Lake, Wash.

NATIONAL FEEDER AND STOCKER CATTLE (Federal-State Market News) St. Joseph, Mo. May 2 RECEIPTS

This Week Last Year 241.800 229.700 182.900 Compared to last week, steers and heifers sold steady to 3.00 lower nationwide. Demand was moderate throughout the country as the CME Cattle Complex had significant weakness all week long and cattle buyers were more

Fall born calves are making their way to market this time of year, and Year-to-Date auction receipts on this report are near 100k

under a year ago. If the cow sell-off started last year, less calves would be expected for this fall as well and the receipt disparity between last year and this year will continue to widen.

For the week, May through October Feeder Cattle futures were 7.400 to 8.625 lower. This sent a substantial message after the bearish Cattle on Feed from the previous week. The Live Cattle contracts were affected as well with the June and August futures 5.775 and 5.100

lower for the week, respectively. There were 107 total loads tendered for the month of April with all of those being in the Texas Panhandle area. The cash fed cattle trade was steady this

week at 140.00 in the Southern Plains, howe er the Nebraska dressed trade was mostly 2.00 higher at 232.00.

Recent rains across a drought-plagued nation have given some optimism to be able to turn cattle out on grass this week. Even though temperatures have been lower than normal for this time, farmers are working against the calendar to get corn and soybeans in the ground to maximize yield. Just a little extra boost in yield this year will help the bottom line if rains come timely. Hopefully there is enough moisture in places to get a crop up

out of the ground and running to a profit. Boxed Beef prices have struggled in recent weeks after Choice topped around 273.00 in early to mid-April. Choice boxed beef closed the week 7.13 lower at 260.78, while Select was 10.93 lower at 247.97 for the same period. Weekly Cattle Slaughter under federal inspec-tion estimated at 656K for the week, 9K less than last week and 3K more than a year ago Auction volume this week included 54 percent weighing over 600 lbs and 46 percent . heifers.

Northwest Weighted Average Direct Feeder

Cattle Weekly Summary WA-OR-ID-UT April 29

RECEIPTS This Week Last Week Last Year 1561 65 1003

Compared to last week: Feeder steers and heifers not well tested last week to test trends this week. Demand moderate to good. Slaugh ter cattle trade was mostly steady with last week, however grain futures continue to inch higher, pushing feeder futures lower. Much of the western states remain very dry. Supply included: 100% Feeder Cattle (19.2% Steers, 36.4% Dairy Steers, 11.7% Heifers, 32.7% Dairy Heifers). Feeder cattle supply over 600 lbs was 30%. Unless otherwise noted, Feeder Cattle prices FOB based on net weights after a 2-3% shrink or equivalent, with a 4-8 cent slide &qt;600 lbs. and 8-12 cent slide <600 lbs. Livestock reported this week originated from ID, NV.
