Fluid Milk and Cream — Western U.S. Julv 28

In California contacts report higher tem-peratures and dry weather are contributing to reduced cow comfort. Due to these conditions, milk output is declining in the state. Despite this reduction in output, milk remains available for processing. Some plant managers say they are sending loads of milk to other parts of the region where inventories are tighter. Demand for Class I is trending higher, while Class II and III demands are steady.

In Arizona milk production is declining, following seasonal trends. Supplies of milk are tight in the state, and some plant managers are sourcing loads from nearby states to meet their current production needs. Class I demand is trending higher, but demand is steady for all other Classes Milk production in New Mexico is steady to lower and inventories remain tight. Some processors in the state are sourcing loads of milk from areas with more ample supplies. Class I demand is trending higher as some educational institutions are preparing for the start of the fall semester. Demand for Class II and III is unchanged. In the Pacific Northwest, overall milk

output is steady to higher. Some contacts report pockets of higher temperatures that are contributing to reduced milk production. Processors say milk is plentiful in the area. Some plant managers say they are selling loads to other parts of the region Class II and III demands are steady to higher, while Class I demand is unchanged.

In the mountain states of Idaho, Utah and Colorado, milk output is unchanged this week. Spot loads of milk remain available for processing in the area. Contacts report loads of milk being traded from \$3 to \$6 under Class IV. Some plant managers are selling excess loads to customers in other parts of the country. Across all Classes. demand is steady. Contacts report contract purchasers of condensed skim are pulling on the higher ends of their availability in the West. Strong demand is present for condensed skim as some spot purchasers are looking for additional loads. Ice cream and butter makers in the region are steadily purchasing loads of cream to run active production schedules.

Meanwhile, declining milk output is contributing to reduced cream production. Cream volumes are tightening

Cattle Market Reports

Compiled by USDA Market News Service • Oklahoma City-Des

Moines-St. Joseph, Mo.-Moses Lake, Wash.

NATIONAL FEEDER AND STOCKER CATTLE (Federal-State Market News) St. Joseph, Mo. Aug. 1 RECEIPTS Last Week 329,600 This Week Last Year 221,400 203,600 Compared to last week, steers and heifers sold mostly 2.00 to 7.00 higher, with some places in the North Central region being up to 15.00 higher on calves coming from drought stressed areas. Demand reported from good to very good for calves and year-lings. Many long strings of yearlings were on offer this week as these cattle came to town in several Plains states.

Whether they were off grass or out of grow yards, cattle feeders were eagerly

bidding and chasing the market higher Drought conditions in the Northern Plains are causing yearlings to be pushed off grass early and cattle feeders want the chance to buy these green cattle when they are offered as their light flesh condition is so desirable. The market is extremely active currently as the supply of grass yearlings is more limited this year. On another note, bawling calves were

marketed this week in Southwest Nebraska as their pastures are brown and very short. Most of these calve are selling two to three months earlier than normal and pay weights a lot lighter than a typical year and some of those calves are still grossing over 1,000.00 per head. With increased input costs, that may not leave much on the table for any extras in the stocking come Christmas time.

Several loads of yearlings were on offer this past Saturday at Winter Livestock in Dodge City, KS at their "King of the Ring" Special. Over 2,000 head of 8-weight steers sold with an average price of 171.84 or over 1450.00 per head. With 50 loads of cattle

in that weight category it had relatively high auction prices for those yearlings even though there are some loftier individual prices higher than that. The Feeder Cattle board has seen better

weeks. This week, the losses on the FC contracts were around 3.00 for the front 7 months. The Grain complex was the inverse of that this week, with new crop corn gaining 55 cents and new crop soybeans being over 1.50 higher. Negotiated cash fed cattle trade in the

Nebraska sold at 138.00, while the dressed sales sold at 225.00.

Live sales in the Southern Plains were reported 1.00 lower at 135.00. Choice boxed beef closed the week 2.12 higher at 269.24, while Select was 0.25 lower at 242.25 for the same period. Weekly Cattle Slaughter under federal inspection estimated at 669K for the week, 4K more than last week and 23K more than a year ago. Auction volume this week included 61 percent weighing over 600 lbs and 40 percent heifers. Northwest Weighted Average Direct Feeder
