Comments: Really good cow market this week. In our 35 years of owning a livestock market you can count on one hand the times the cow market has been stronger in August the commander has been stonger in August than it was in June, and you might say this is a first. The big cow numbers might not be there. USDA reports reduced cow kill across the nation. A few feeder cattle are starting to show up and the interest is picking up among the buyers. Steers (Average-Top): 300-400 lbs NT; 400-

Aug. 1
Comments: Monday's all class cattle sale featured a good run of cows and bulls, and a light run of yearlings on offer. Slaughter bulls were higher, topping out at \$1.23. with an average price of \$1.17-\$1.20 on 1500- to 2500-pound bulls. Slaughter cows were also higher, topping out at \$1.05. Cows averaged 97-99 cents per pound. Not enough feeders for a market test, though heavier yearlings continue to be in demand, along with light

calves under 500 pounds.

pared with 33,000 last week and 32,000 last year.

Dairy Report

Compiled by USDA Market News Service • Madison, Wis.

Fluid Milk and Cream — Western U.S Aug. 11
Milk output varies throughout the state of California. Some contacts report high tem-

peratures and dry weather are contributing to reduced production in some areas. Meanwhile, others say milk production is strong and remains unchanged week to week Processors in the state say milk is available for them to run busy schedules. Some plant man agers are selling loads of milk to other parts of the region where supplies are tighter.

Educational institutions in the state are

increasing their purchasing of Class I milk as they prepare for fall classes. Steady demand is present for Class II and III. High temperatures in Arizona are contributing to seasonally declining milk production. Extreme rain and flooding are reducing the ability of some producers to move volumes of milk from farms to processing facilities. This has caused some downtime at drying operations that were unable to obtain sufficient milk volumes. Milk supplies are tight

in the state, and some processors continue to source loads of milk from parts of the region. Demand is steady across all Classes. Farm level milk production is declining. following seasonal trends in New Mexico. Contacts report overall output remains down compared to last year. Milk availability is limited and causing some processors to move loads from other states to meet

current production demands. Class I sales are

trending higher, due to increased educationa purchasing.

Meanwhile, Class II and III demands are unchanged. In the Pacific Northwest, high temperatures continue to contribute to declining milk production. Stakeholders say milk remains available for processing, despite seasonally declining output. Contact reports labor shortages and transportation issues are causing them to sell some loads of milk at a

discount. Demand is steady to higher for Class I. Class II and III demands are unchanged. Seasonally high temperatures are contributing to declining milk production in the mountain states of Idaho, Utah, and Colorado. Milk is available for processing in the area. Spot loads of milk are being traded from \$3 to \$6 under Class IV. Plant managers say loads of milk continue to move at a discount due to labor shortages. Across all Classes, demand is unchanged. Condensed skim demand is strong, as contract purchasers are pulling at the higher ends of their availability. Some

spot purchasers are searching for additional loads of condensed skim, as inventories are tightening in the region.

Cream production is declining, and invento ries are tightening, in the West. Some butter makers say high cream multiples and labor shortages are causing them to sell additional loads of cream. Cream demand is strong. Western cream multiples are unchanged

for auction cattle receipts. Calves are showing up in more and more sales as cattle producers

market, hoping to save the flesh condition on their cow herd moving forward. New owners

of those bawling calves seem to be getting

along as they are hungry and eager to get to the feed bunk.

Live sales in the Southern Plains were reported 4.00 to 5.00 higher at 140.00.00. Choice

263.37, while Select was 0.92 higher at 239.59

Cattle Market Reports Compiled by USDA Market News Service • Oklahoma City-Des

this week.

Moines-St. Joseph, Mo.-Moses Lake, Wash. NATIONAL FEEDER AND STOCKER CATTLE (Federal-State Market News) St. Joseph, Mo. Aug. 15

RECEIPTS This Week Last Week 85,800 413,900 272,70 Compared to last week, steers and heifers 285.800 272,700 sold steady to 4.00 higher in the North and South Central regions, while the Southeast region sold steers and heifers 4.00 to 7.00 higher. Demand ranged from good to very good this week as cattle feeders are feeling very optimistic about the coming months in

the fed cattle market.

Grass yearlings are in a lighter supply this year in the North Central region due to last year's drought, which prevented cattle producers from overwintering cattle the way they normally would. Buyers are competing heavily to get these cattle bought while they are available. The market is extremely active for these feeder cattle as the cash fat market is so much better than what was expected for Fed cattle this week continues to hold a positive basis over the board in the North

which is only adding to the positive vibes that cattle feeders are feeling. The supply of fat cattle in the north is generally the heaviest during the summer months and with the cash market outperforming the futures market so greatly cattle feeders are really going all out for the winter months, where supplies are Feed costs continue to be high, and efficiency is key during times like this, which adds fuel to the fire that is lit under the yearling market.

Cattle feeders want these grass cattle that are in that light flesh condition to get that quick compensatory gain.

In the South Central region, oppressive heat early week kept some cattle from making it to town and recent rains over some of the driest

however, slim hope it is.

areas have provided some hope to those that haven't already sold calves earlier than usual Overall, this week's offering was typical of a late summer run; in the 140K to 160K range

Northwest Weighted Average Direct Feeder Cattle Weekly Summary WA-OR-ID-UT Aug. 12 RECEIPTS This Week Last Week Last Year
