DAVENPORT (Stockland Livestock Auction) Aug. 15

Comments: Monday's regular cattle sale featured near 200 head of cattle, with a good run of cows and some nice calves and year-lings, though not enough cattle for a true market test. Good high-yielding cows were steady to slightly lower this week, topping out at \$1.04 per pound, with an average price of 98 cents per pound. Thin, lower yielding cows under 1300 pounds were a bit lower, bringing up to \$1.00 per pound, with an average of 89 cents. Slaughter bulls were steady, with a top of \$1.20, and an average of \$1.15 cents per pound. Feeder cattle were steady on a light run, with good light steers weighing 500-600 pounds bringing up to \$1.87 and averaging in the mid \$1.60s Heifers sold well also, with a highlight being 800-900 weights bringing up to \$1.43. Dairy Report

Compiled by USDA Market News Service • Madison, Wis.

Fluid Milk and Cream — Western U.S. Aug. 18

High temperatures are contributing to reduced cow comfort and milk output in California. Despite a decline in production, milk volumes are available for processors in the state to run busy schedules. Contacts report they continue to move loads of milk to other parts of the region where supplies are tighter. Class I milk sales are steady to higher as educational institutions are returning from their summer breaks Demands for Class II and III are steady.

Milk production continues to decline in Arizona, following seasonal trends. Some producers in the state say recent rain and flooding have limited their ability to transport some volumes of milk to processing facilities. Plant managers at some drying operations in the state say this has contributed to unplanned down time Some processors in Arizona are receiving milk from other parts of the region to meet current production demands. Demand for milk is steady across all Classes.

In New Mexico, farm level milk production is steady to lower. Stakeholders say milk volumes are limited in the state. Some plant managers say they continue to source loads of milk from other states. Educational facilities are resuming classes for their fall semester and are increasing their purchas ing of Class I milk. Sales of Class II and Class Ill are steady. Milk production is declining in the Pacific

Northwest, as hot temperatures persist in

Cattle Market Reports

RECEIPTS
This Week Last Week Last Year
265,000 285,800 439,900
Compared to last week, steers and heifers
sold 1.00 to 5.00 higher. Demand was good
to very good again this week nationwide. As the cash fed cattle market continues
to strengthen, so does the feeder cattle
market. Cattle feeders want to get pur-
chase yearlings while they are available,
whether they are off grass or out of grow-
ing yards, which is resulting in a market
that is extremely active.
The negotiated cash fed cattle market
in the north is retaining the positive basis
over the board, 7.00 this week, which is
really helping to fuel the fire that is lit
under the feeder cattle market, as this
has been a counter seasonal rally. This is
the time of year where fed cattle supplies

are traditionally the greatest and where the market usually gets very sluggish. The fact that this has not happened this year as caused cattle producers to really get bullish on the future.

The Aug. 1 Cattle on Feed report was re-leased on Friday afternoon with the report being slightly bearish as placements were larger than expected. Cattle on feed was reported at 101 percent, placements at 102 percent and marketings at 96 percent.

Negotiated cash fed cattle trade in the Nebraska sold 0.50 to 2.00 higher at 146.00 to 148.50, while the dressed sales sold 4.00 to 5.00 higher from 234.00

Live sales in the Southern Plains were

the area. Contacts report milk is available for processing. Some plant managers in the area say labor shortages and high temperatures are causing them to run reduced production schedules. Volumes of milk remain available, and some are being sold at a discount. Demand is steady across all Classes.

In the mountain states of Idaho, Utah, and Colorado, contacts report declining milk production amid seasonally high temperatures. Despite this decline, milk remains available for processing. Some plant manage ers say they are moving loads at a discount due to labor shortages and limited tanker availability. Purchasers from other states in the region are buying loads of milk from the mountain states to meet local production demands. Class I demand is steady to higher, due to increased educational purchasing Demands for Class II and Class III are steady. Contract purchasers of condensed skim continue to pull at the higher ends of their availability. Contacts report strong demand from ice cream makers. Condensed skim supplies are tightening in the region. Cream

availability is tightening. Stakeholders say cream production is declining and demand is strong. Ice cream makers continue to purchase loads of cream to maintain steady production. Some regional butter makers say they are

selling loads of cream, due to high cream multiples and labor shortages Strong demand is present for cream.

reported 1.00 to 2.00 higher at 141.00 to 142.00. Choice boxed beef closed the week 0.91 higher at 264.28, while Select was 1.65 lower at 237.94 for the same period. Weekly Cattle Slaughter under federal inspection estimated at 661K for the week, 14K more than last week and 5K less than a year ago. Auction volume this week included 49 percent weighing over 600 lbs and 42 percent heifers. Northwest Weighted Average Direct Feeder Cattle Weekly Summary WA-OR-ID-UT Aug. 19 RECEIPTS

This Week Last Week Last Year 1233 1863 866

Compared to last week: Not enough comparable trades to test trends. Demand moderate to good. Supply included: 100% Feeder Cattle (32% Steers, 20.3% Dairy Steers, 47.7% Heifers). Feeder cattle supply over 600 lbs was 79%. Unless otherwise noted, Feeder Cattle prices FOB based on net weights after a 2-3% shrink or equiv alent, with a 4-8 cent slide >600 lbs. and 8-12 cent slide <600 lbs. Livestock
