The Road to Wealth

Cannot be successfully traveled without
good health. To reach wealth or any
coveted position in life requires the full
possession and operation of all the
faculties kind nature has endowed us with.
These conditions cannot exist unless the
physical being is in perfect working
order, and this is impossible when the
liver and spleen are torpid, thus obstruct-
ing the secretions, causing indigestion
and dyspepsia, with all of their accom-
panying horrors.

DR. HENLEY'S
English Dandelion Tonic
exerts a specific influence over the liver,
excites it to healthy action, resolves its
chronic engorgements, and promotes the
secretions; cures indigestion and consti-
pation, sharpens the appetite, tones up
the entire system, and creates life worth
living.

ELECTION PRECINCTS.

How the Matter Stands at Present.
The Petition and the Delegation.
Section 2—Australian Ballot Law of Oregon.—"It shall be the duty of the county court in the several counties of the state at the regular term in January preceding the general election, to set off and establish election precincts within the county. Said court may set off and establish within said county as many election precincts as may be deemed necessary or convenient; and providing, that no election precinct shall contain more than 250 electors."

The fruits of the above mandate as carried out by our county court at its January term were published in full in the columns of the MAIL last week and the results of its perusal by almost every voter in Jackson county has been an almost universal complaint that justice has not been done in readjusting these boundaries.

Ashland, Central Point, Willow Spring and others have been heard from, but Medford apparently being the biggest sufferer, a delegation composed of Messrs F. M. Plympton and Postmaster Howard, boarded the train in his own Monday and found upon investigation that contrary to the published reports the principal boundaries of Medford had not been materially tampered with, the dimensions as they now stand, being three by four miles.

But this delegation had to make a far more important mission to do with and that was to have the precinct of Medford enlarged so as to embrace all of Tp 37 S., R 1 W. and Secs 34, 35 and 36 of Tp 36 S., R 1 W. as petitioned for by over 20 voters who have for the last six years been compelled to go to Central Point to vote, when they voted at all, which they seldom did, instead of being allowed to come to Medford which is their postoffice and trading point in every case and is much nearer.

The petition was presented in ample time to the court with all the requirements of the law, but nothing came of it, and it seemed as though another year would roll around without justice being done. Our indignant citizens, after expressing themselves quite freely and forcibly, decided to make one last supreme effort to have these wrongs adjusted and, as we have said above, a delegation repaired to Jacksonville Monday and succeeded in being heard to the extent that at the February meeting, January 3, it has been promised the petition would be recognized as described above. It is to be hoped this will be done, for although it is impossible to please everybody, the court cannot but admit this petition to be a just and reasonable one.

RAILROAD NEWS.

Something New and Interesting
About the R. V. E. R.
Mr. I. A. Webb, our enterprising furniture dealer, exhibited to us this week a letter bearing date of Jan. 4, '92, and written to him from Omaha by a friend who is prominent in railroad circles in the East. The following extract explains itself:

"Dear Friend:—I wrote you some time ago regarding the probability of my taking hold of the Rogue River Valley Railway. I have since that time got some definite figures out of the present owners and the road can be purchased, providing sufficient inducements could be given our Company in your town and other towns along the line."

"The plan will be to extend the line both ways from Medford, thus entering a large amount of trade at that point; and I think it would be very advantageous to your people to give the plan their generous support."

We think comment is unnecessary under the circumstance. It is certain the project is a feasible one and the parties in question are responsible to take the matter in hand. Would sufficient inducements be offered?

There is plenty of money back of the project and the prospects are that in the near future something definite will come to light. One or two of our responsible citizens are in communication with the projectors and a number of very interesting epistles have been exchanged.
