

THE OLD, OLD STORY.

It had told her in the spring.
When the sparrow and robin began to sing
And the plovers were over cheery.

A MEMORABLE GAME.

Fifty years ago, in Mehemet Ali's time,
Suleiman Pasha, a naturalized Frenchman,
was commander-in-chief of the Egyptian
artillery, and universally acknowledged to
be the best chess player in Cairo.

When peace had succeeded war, Suleiman
Pasha returned to the city of the
caliphs to enjoy the pomp and
splendor of a high official.

The two masters were generally
surrounded by all the best players of Cairo,
who followed their moves with eager
and attentive looks.

"A hundred ducats won't be too much,
my friend," Suleiman Pasha replied,
again looking inquiringly at the
other's face.

"Then he would be said in eight moves,"
Reshid Aga said, gleefully rubbing his
hands.

"Then if he does not take her?"
"Then he will lose his own."

For a moment the stranger appeared
amazed; but his eyes, fixed on
Reshid's hand descended on the board.
Quickly and calmly he moved one of his pawns
a square ahead.

With mastery skill White now led
his force into the file, and the
king in a powerful grasp and keeping him
within an iron ring.

threatened to crush us completely. And
this man, whose genius made our brave
deeds seem to flight, and whom it was
impossible to withstand, was the
cold North.

"Thou hast hit it, Pasha," the stranger
calmly replied. "My name is Moltke."
His name was known to Reshid Aga.

LOBSTERS AND CRABS.

Some Facts About the Creatures That
Carry Their Jaws at Arm's Length.
"Once upon a time," said an expert in
matters crustacea, "there were crabs
and lobsters in existence for which
the world would have gone
demented with joy."

"Only a few little specimens are left
to illustrate the great crustacean
forms of that ancient epoch. It is known how
crabs and lobsters are hatched from
eggs, and how they grow to maturity."

"The first experiments in the adaptation
of knowledge on this subject to the
artificial propagation of lobsters were
made simply in glass jars with sea
water that was changed every day."

"There is no reason apparent, where-
fore the same success should be ob-
tained with lobsters, as with salmon,
achieved with salmon, which have been
made to swarm once more by myriads
in streams populated by them."

"The purpose of a lobster farm
rocky ground should be chosen, because
that is their natural haunt and there
they find suitable places to hide."

"I was held up once in a way that I
admittedly regretted. I was walking
towards him and I saw the top of a
woman's head and a pair of eyes."

EDISON'S GREATEST.

HIS WONDERFUL NEW MACHINE CALLED
THE KINETOGRAPH.
It Will Reproduce the Scenes, Voices
and Movements of an Opera in Your
Parlor—Photographs Taken at the
Rate of Forty-Six a Second.

RECENTLY EDISON WENT TO
Chicago, Illinois, where some one
who was interested in the world's
fair asked him if he would consent to
place up some electric novelty to
show on exhibition at the big ex-
position.

"I have a machine projected,"
replied Edison, "but the details are not
perfected yet. My intention is to have
such a happy combination of electricity
and photography that a man can sit in
his own parlor and see reproduced on a screen
the forms of the players in an opera
produced on a distant stage, and as he sees
their movements and hears their voices."

"Yes, it is true," he said. "You can sit
in your parlor and look at a big screen
and see the actors and actresses of the
Metropolitan opera house."

A Person Can Think a Hole Through
an Inch Board.
A writer in an electrical journal has
proposed to measure thought by means of
the galvanometer.

THE KINETOGRAPH.
A—Funnel. B—Kineto-graph.
C—Electric battery.
"Just as the screen with an opera. You
sit in your parlor and see reproduced on a
stage all the scenes of the opera."

"The bell seen on a cow's neck looks
like a very ordinary article, but in reality it
is a very important article."

Experience of a Modern Doctor.
The clerk Guy C. Cox, with a cargo of
\$500,000 worth of tea, dropped anchor here
before the steamer 'Sue'.

One Horse Power.
When men first began to become familiar
with the use of a steam engine, they
often speculated on when the
power of horses is to be found that
can keep at work raising 30,000 pounds
per minute.

while ago to print pictures of an object
in motion, but it would not work fast
enough to convey a complete and
jerky motion, like this," and he illustrated
by raising his arm in a series of short
jerks to his shoulder.

"The man upstairs with the step of a boy
and the gait of a girl, and the
woman who is so full of grace and
grace, and the man who is so full of
grace and grace."

"The man upstairs with the step of a boy
and the gait of a girl, and the
woman who is so full of grace and
grace, and the man who is so full of
grace and grace."

Force in Thinking.
The inhabitants of cold climates have
little idea of the fierceness of the conflict
which has been carried on from time
immemorial between the human mind
and the human body.

Freezing out the Ants.

A Millionaire's Bank-Steer.

I object to millionaire's masquerading
They will do it. Jay Gould, the last time
he pulled a con over me with me on the
platform of his great car, wore a shabby
and shiny coat that most of his employees
would decline contemptuously.

A friendly Pittsburger warned me on
my arrival to keep an eye open for bank-
steers, who-said were rather numerous.
It has been my experience that by some
subtle instinct, the bank-steer seems to
be able to identify a newspaper man, and
to tell him how glibly his appearance, and
I hoped but did not expect to be tackled by
one of the gold brick and lottery ticket
salesmen.

"I shall have to tell M.," said he;
"I guess he's never been accused of bank-
steering before."

Even in most temperate regions, like
those of our northern States, ants are
troublesome enemies, and the suggestion
made in the November issue of the Trop-
ical Agriculture, that the ants of the
Ceylon, may be worth trying in some parts
of this country.

These freezing mixtures are not very ex-
pensive, and as our contemporary sug-
gests, they are not very difficult to make.
Science has here achieved a victory in the
interest of man for which so many genera-
tions have contended in vain.—Garden and
Forest.

Notary in Tangiers.

SHOWERS ON A Glacier.

In 1888 Mr. John W. Kelly discovered on
the northeast coast of Alaska, emptying
into the Arctic Ocean, just above Cape
Lidzbarne, a new river, which has been named
the Pitmegea River.

Such a spectacle is not often witnessed in
the arctic regions. This mass of green,
diversified by the brilliant colors of arctic
flowers, has started in the performance of
its brilliant role, the great ice mass on which
the soil rests.

"The meanest man I have ever come
across in my hotel career was a woman,"
said a man before I had seen her. She
was the daughter of the Grand Union.

LA GRIPPE,
Or Influenza, Pneumonia, Coughs,
Colds and All Throat and Lung
Troubles Cured in Less Time with
R. HALL'S
Pulmonary Balsam.

I CURE FITS!
When I say cure I do not mean merely to stop them
for a time and then have them return again. I mean a
radical cure. I have cured thousands of cases of
LEPESY or FALLING SICKNESS—a long standing, I
warn you, remedy to cure the worst cases. Because
these cases are so numerous, I have had to make a
copy of a good one for a treatise and a Free Bottle of
this medicine. Give your name and address to
H. G. Root, M. C., 152 Pearl Street, N. Y.

Tower's
Improved
SLICKER
is Guaranteed
Absolutely Water
Proof.
Will Not Peel
or Leak
or Stick
Soft Woolen
Watch Out! Collar.

CHILLED POWS,
For Orchard
and Vineyard.

THE TAILOR
MAKES THE BEST CLOTHES
IN THE STATE
AT 25 PER CENT LESS
THAN ANY OTHER HOUSE.

CONSUMPTION
I have personally tried the above medicine in
thousands of cases of the worst kind and long
standing have been cured. Indeed so strong is my faith
in this medicine that I have written a
VALUABLE TREATISE on the disease to any
sufferer who will send their name and address to
H. A. Siegel, M. C., 152 Pearl Street, N. Y.

THE HEIR OF THE LIONPARK.
Prince Napoleon, who is now twenty years old,
has the statue of his father, Prince
Napoleon, and is a superbly handsome
man. His head is imposing. Roman strength
and courage are his. He is a noble and
gentlemanly man. The countess are full and
ample toward the skull, but softened down
in the lower part of the face. He is sur-
prisingly a great lover of the great
Napoleon. The eye is kindly, but it is
grave and firm in expression. His hair is
black and wavy, and his eyes are
dark and deep. He is a noble and
gentlemanly man. The countess are full and
ample toward the skull, but softened down
in the lower part of the face. He is sur-
prisingly a great lover of the great
