condition and the chances for recovery are not the most flattering. At the time of going to press she is improved and will undoubtedly recover.
-Y. Webster is putting up a very neat little 1x18 cottage just west of Merchant Erford's residence. Mr. Webster is a single man yet the fact of his building a dwelling does not of necessity carry with it the proof that a part of the furniture of the boudoir will be a pair of curling tongs; however, this may be the case. W. K. Davis is the artist-not of the curling tongs but of the building.

-Rev. Merley, recently from Indiana, took a drive through, past and around several of our fruit orchards one day this week and upon returning he talked to great length of what he had seen with Merchant Hutchison. Upon completing his very laudatory remarks Mr. Hutchison found time to say that if Rev. Merley would accept it he could get him a good paying position with some of our real estate dealers-he was just the man they have long been looking for.
-Sunday was another wet day and the local prognosticator is getting in any amount of conjecture as to the very probable wet season there is ahead of us. Old timers say that when our rains begin in September or early in October, the rule has been to follow up with an open winter. In California the dry winters are usually preceded by September rains. Be the season wet or dry there is some solace in knowing that we are not compelled to hibernate as many do in eastern and northern states.
-What is it? Conserves Alimentis res Pettis Pois. Do you kumtuz? Ask Wolters, the grocer.
-There was quite a howl round about the S. P. depot Monday morning and not wholly without cause. Engineer Barnum had run in on the S. P. sidetrack with his engine and car to load freight for Jacksonville and had pushed several cars down over the south crossing and left them standing there while the freight loading was going on, and by so doing blocked the crossing for both man and team-hence the howl. It's "agin" the law, Mr. Barnum, and "agin" the grain of the best dispositioned man in this city to walk several lengths in the mud.
-An eminent beet culturist says that bees always seek the society of man. So do hornets, good brother, so do hornets, and "yaller jackets" swarm thickets where man congregates most plentiful, and both the bee and "jacket" takes as naturally to man as the editor of THE MAIL does to jack rabbit when it is palled off on him as venison, but "revenge is mine" saith Bilton. George Buffington and Renuis Hamilton can consider themselves doomed to an early, though very timely taking off, and in their innocence-which they never had-they will know not the pleasures even of a fruitless appeal for mercy.
-Ed. Pottenger met with an accident the fore part of this week which came very near proving fatal. He was engaged in handling a dressed beef at the packing house and as he ran under a quarter of a beef to catch it on the swing and throw it onto his shoulder something above gave away and the whole of one side of the beef came down upon him and as his body was in a position leaning backward the weight of the beef bent him almost double and threw him to the floor. For some little time afterwards it was thought he had received injuries of a fatal nature, but in a short time he revived a little and was taken to his home on F street.
-Out on Griffin creek last week the boys gave a newly married couple a tin pan serenade. Meeting with no response from the inside one of the bold ones of the crowd ventured to raise a window which, unfortunately for him, was located immediately over the sleeping couch of the house's occupants. A white robed form rose before him and he was looking down the gleaming barrel of a large sized revolver-he fell to the ground and was quickly hustled away by his comrades. The rattle-tang of tin pans didn't rattle-to-bang any more that night and the young men of that neighborhood are now endeavoring to cultivate a little better sense of propriety.
-There is a new law firm in town, or to get closer to the line of facts, part of the firm is new to our city. G. W. White, recently from the Sound country, and a law graduate of an Ohio university, has formed a partnership with S. S. Pentz. The latter gentleman has practiced his profession in Medford for the past six years and needs no introduction to our people. Mr. White is a stranger but that we will be better acquainted with him, now that he is here to stay, goes without the saying. He is apparently a very fine gentleman and will doubtless prove himself worthy our people's support. In addition to

S. ROSENTHAL returned last Friday from his quite lengthy visit in New York City and at the world's fair. He is brim full of good things to say of the big eastern cities and the manner in which he was treated by his friends. Medford isn't quite herself without "Rosy" and all are glad he is with us again.
Rev. and Mrs. MERLEY, of Denver, Ind., arrived in Medford Monday night. They are friends of Mr. and Mrs. C. I. Hutchison and are here in quest of a suitable farm purchase. Hood's Cures

Numerous Boils And Catarrh in the Head

Mr. W. L. Tucker Rosburg, Oregon

"I feel that it is impossible for me to say too much in favor of Hood's Sarsaparilla. I was a great sufferer from impure blood and Catarrh in my head. Job's comforters failed to comfort me, and I suffered from numerous boils.

Hood's Cures

When I began to take Hood's Sarsaparilla I had six of them, only four of which came to a head, and since then, thanks to this good medicine, I have been free from this great affliction. I gained 11 pounds in three weeks. The Catarrh in my head which has troubled me for years has also been cured by Hood's Sarsaparilla and I am now enjoying good general health. I earnestly recommend Hood's Sarsaparilla to all who are afflicted with Blood Poison, Rosburg, Oregon.

bright young fellows and such as will make intelligent, upright and thorough business men.

J. K. ROBERTS was over from Applegate last Saturday. The gentleman is teaching school in that vicinity. It was he who had the fracas with Clifton, the four bin man, and who had his hand bitten by him, from the effects of which he has not yet recovered. As a matter of fact he is very little impaired, the poison from the bite having scattered quite generally through his whole system. His eyesight has also been impaired considerably.

JAS. WILEY and T. A. CULBERTSON, both of Klamath Falls, were loading up big loads of groceries and "sich like" in Medford Wednesday. These are the kind of men whose trade our merchants are after-and they are getting a right smart sprinkling of it, too. The time was once when Ashland caught all the Klamath county trade but its different now, a mighty sight different, and the liberality of Medford business men is responsible.

In Memoriam.

The following sketch may be interesting to the pioneers of Southern Oregon.

In the recent death of Mrs. Mary E. Gore, the wife of Mr. E. E. Gore, of Phoenix, it is but just to record that the neighborhood has lost a noble friend, the church a wise and faithful worker, and the home a dearly beloved and trustworthy wife and mother.

Mrs. Gore came of that sturdy, Scotch-Irish Presbyterian stock, from the North of Ireland, many of whom emigrated to this country in an early day. She was a direct descendant of the family of the Gilmoors and Gibsons, who heved out their homes in the forests of Pennsylvania, and who have been so honorably identified with the religious, educational and noble enterprises of this country in those states where they have lived. Her father, Robert Gilmoor, located in Mercer county, Pa. in 1788, and when he had prepared a good home, he was married in May 1804 to Miss Nancy Smith, of Indiana county, Pa, who was also a descendant of Scotch-Irish parentage. Mrs. Gore was the youngest of a family of ten children, three sons and seven daughters, and was born Feb. 6, 1827. Her father died when she was but sixteen months old. In this Pennsylvania home she was reared and educated in the midst of a pious community, and under the fostering care of the school and church. To the rural scenes and joyous experiences of her childhood home she delighted to refer. From early youth she was a lover of books, and became a woman of more than ordinary ability and literary tastes. The one book, however, she prized above all others was the Bible. She was familiarly conversant with its doctrines and precepts, and loved to impart a knowledge of its precious truths to others. When nearly 15 years of age she was married to Lewis A. Rose, a man of whom she speaks of as being "eminently pious," and with whom she moved to Charleston, Iowa, where he died Sept. 20, 1846, leaving her with an infant son, who is now the present L. A. Rose, of Phoenix, Or. On Sept. 20, 1849, she was married to Mr. E. E. Gore, and with him crossed the plains coming to this coast. They left Charleston, Iowa, April 27, 1852, and arrived in the Rogue river valley Sept. 27th of the same year. For a time their residence was in Jacksonville, Or., where Dec. 3, 1852, Walter S. Gore was born; he being the first white male child born in Jackson county.

Mrs. Gore was the mother of ten children, five sons and five daughters, nine of whom are still living to mourn her death. She was a woman of strong and positive christian character, and with a firm reliance upon Christ, she passed away Oct. 7, 1893. Her funeral was largely attended, and took place Oct. 15th from the little church of Phoenix, of which she was a worthy member, and where she loved to worship and teach in the Sabbath school. The services were of an appropriate character, and were conducted by the Rev. M. A. Williams, the aged pioneer Presbyterian minister of Southern Oregon, assisted by the present pastor of the church. The interment took place in the cemetery near the church.

In heart-felt sympathy with the bereaved family and in the language of assured hope, we unite in saying, "Blessed are the dead which die in the Lord for some months and the two latter have been with Engineer Howland's surveying party. All are very

WOLTERS, THE GROCER. The Young Man's Fancy doesn't turn to thoughts of love in the fall. On the contrary, he begins to think of Underwear. WE HAVE UNDERWEAR THAT WILL OUTWEAR ANY UNDERWEAR SOLD ANYWHERE. "Words are Women, Deeds are Men," is a slander on the gentle sex. If the author of that expression could have seen the women about our counters yesterday as they gathered in the bargains in dinner sets, he would have retraced on the spot. What a pleasure to Invite a Friend to Dinner when you know that every dish brought on the table will excite admiration. We have dinner sets that are really works of art-you don't have to go broke on them. AND DID YOU NOTICE that we have a full line of crockery-all sizes-and fruit jars. When looking for something in the crockery line, remember Wolters.
