count to their sorrow that breeding scrub stock does not pay. Wa has observed a coregon have found to their sorrow that breeding serial stock does not pay. We must either breed for saleable draft horses or for speedy trotters. Either class is in demand and will bring good prices, and white the Mongrei is unsaleable at from twenty-five to fifty dollars the well bred, heavy draft horse is in good demand at from \$130 to \$230 each. The English Shire is the draft horse for this mountainous country; in them is combined the action of the pony and the strength of the draft horse. Did you ever see an English Shire that would balk, or had carbs or spavins on his limbs! We think not. Have you ever seen a breed of horses as free from discase, as hardy and as easily Roys in good condition as the Saire horse? Statistics say no! The horse breeder of Oregon who are now so liberally patronizing Maximillion this season will find they have made no mistake in so doing.
