

## OUR COUNTY . . . Correspondents

TO CORRESPONDENTS.—All correspondents are requested to write on one side of the paper only. This will prevent our re-writing the matter written on the reverse pages, which must invariably be done, and will also prevent many interesting items from being entirely overlooked. Correspondents who are short on supplies should notify this office, and we will promptly furnish what is needed.]

### Eagle Point Eagles.

BY A. C. HOWLETT.  
Rev. L. L. Grove will preach next Sunday at 7:30 p. m.

Cattle buyers are getting to be almost as thick as office seekers in this neighborhood.

On Thursday of last week Drs. Officer and Patterson performed a surgical operation on the son of Dan'l Gray.

Harry Carlton and Charles Jones, who have been to the coast looking after cattle interests, returned home Wednesday.

Miss Daisy Stanfield, formerly of this place, is here visiting friends. She came out on Tuesday of last week with your correspondent and wife.

Mrs. M. S. Wood started for Ashland last Saturday to spend a week among friends and look after the interests of her sister, the late Miss Etta Griffith.

A man by the name of Mitchell came in from Klamath county with Mr. Abbeolose for the purpose of buying up a band of cattle. He has bought several head in this neighborhood.

One of the Ormiston boys, who has been assisting in nursing Prof. P. H. Daley, had a business call to California last week, whether he has gone. Prof. Daley, whose case is pronounced somewhat improved, was quite loth to part with him.

John Irwin, of The Dalles, has been here a few days visiting the Hoyt brothers, and looking up cattle. He and Ed. Hoyt came near getting into trouble in Butte creek. They drove into what proved to be quite deep water, and as a result they had to ride some three miles in wet clothes.

Lorenzo (Bud) Obenchain, of Klamath county, came in on Monday of last week to visit his parents, Mr. and Mrs. John Obenchain, and to help Benj. Abbeolose drive his band of cattle out to his Klamath county ranch. Benj. Abbeolose also came in about the middle of last week, and expects to start out as soon as the weather permits.

Last Saturday, notwithstanding the heavy rain storm, our town was crowded with men, women and children. It had been announced the populists were going to hold their primary, and the result was that they came from every quarter and reminded one of a swarm of bees in May. By a little after 1 o'clock p. m. the hall was thronged with anxious and interested voters. The meeting was called to order and W. H. Bradshaw was chosen chairman and James Kent secretary. After a few appropriate remarks by the chair they proceeded to elect nine delegates to attend the county convention in Medford. One good move, in the right direction, was a resolution doing away with the proxy business—every man was expected to attend in person. The meeting resulted in the election of nine delegates as follows: A. Hoyt, W. W. French, S. A. Carlton, R. R. Minter, J. W. Smith, M. F. Hurst, G. W. Stevens, Wert Pool and James Kent, and Messrs. S. A. Carlton, F. W. Mitchell, W. W. Smith and R. R. Minter as precinct committee and F. W. Mitchell, who is also a member of the county committee, as chairman of the precinct committee.

### Central Point Items.

Rev. W. B. Moore, of Jacksonville, tarried here Saturday night. There are quite a number of our citizens attending circuit court this week.

Peter Applegate has returned home from the state republican convention.

J. E. Harvey was up from Gold Hill on Friday looking after his business here.

Miss Mary Jacobs, who has spent several weeks in Ashland, returned home last week.

Miss Stella Stidham, who is teaching school on Applegate, spent Saturday at home.

Miss Helen Little took charge of the spring term of school on Big Butte last Monday.

Mrs. E. M. Leever and Miss Mary Magruder has opened a dress-making shop on Manzanita street. Stephen Cornutt and family will leave for California in a few days to make that place their future home.

Edward R. Owen died at the residence of his brother, W. A. Owen, on Friday evening after a long and painful illness. He was

buried in the Jacksonville cemetery on Sunday, and was followed to his last resting place by a large concourse of friends.

Mrs. Chas. Murphy, of Wasco county, is paying her parents, Mr. and Mrs. J. G. McDonald, of Tolo, a visit.

Mr. Joseph Downing and wife are at Ashland, at the bedside of Mrs. Joseph Downing, who is in a critical condition.

L. C. Rodenberger, Mrs. Sarah Baker, Mrs. Wm. Nichols, John Jacobs and Wm. Nichols are attending court as witnesses in the Peninger trial.

### Prospect Items.

BY MINERVA.

M. A. Shirley was in Medford last week.

Eugene Blackford called on his friends on Mill creek last week.

Miss Maud Boothby is stopping with Mrs. Geo. Gray, at the Skookum ranch.

Stan. Aiken has replenished his stock. The store is quite a convenience and Stan. is the proper person to supply the wants of all.

Geo. Stockton killed a timber wolf a few days ago not three hundred yards from his door. The wolf stood three feet high and was six feet in length—was shot at twenty paces. The animal was chasing a deer, which deer was nearly run to death and frightened out of its wits as it ran through Stockton's door-yard; it took a rest not two steps in front of E. S. Moore's door, and passed very near R. Rasmussen's house before taking to the woods.

Our postmistress, Mrs. Ada M. Aiken, will have one of the prettiest door-yards to be seen when the plants therein are in bloom. The lady loves flowers, gives them the care they need and the result is very satisfactory. Stan. has had something to do with beautifying the place, bringing a stream of water from the creek to keep flowers and shrubs fresh throughout the summer, said stream finally emptying into a basin forming a good sized lake, the bank of which is but a few steps from the door, and is stocked with carp and other fish.

### Notes From Eden Precinct.

BY FARMER.

I have nothing of especial interest to report from this section this week except a surprise party last Thursday evening, given in honor of Miss Sarah Copeland's 17th birthday. The party was given at Miss Copeland's home; Misses Sloper and Smith did the secret work, and it proved a complete and also an agreeable surprise. The evening was spent in various party plays and the usual round of fun was had. We trust Miss Copeland will have many such pleasant surprises as time rolls on. I am not fully prepared to give the names of those present, but to the best of my knowledge the following list is correct: Misses Minnie and Irene Sloper, Bell and Effie Mills, Lilly Edsall, Messrs. Wm. Mills, Fred Edsall, Ben Sloper, John Stewart, Edward Hughes, Gilbert Anderson, Mr. and Mrs. Gallaher, Mr. and Mrs. A. A. Anderson, W. M. Smith and family.

### Sams Valley Items.

Chas. Moon made a flying trip to Louse creek last week.

S. T. Hodges and family and Mrs. A. L. Gall visited in Ashland several days last week.

Bert Rowe, of Kerbyville, who has been visiting his parents at this place, has returned to his home.

W. S. Gall and J. Wyatt struck some flattering prospects last week in their quartz ledge near Payne gulch.

At the populist convention held in Table Rock precinct Saturday, the following delegates were elected: C. C. Gall, F. L. Rowe, W. P. Van Hardenburg, A. L. Gall, S. M. Nealon, J. E. Potter, M. Perry and Geo. Childers.

### Table Rock Items.

Otis Frierson boasts of being the owner of the smartest pig on record and is willing to prove the assertion

Awarded  
Highest Honors—World's Fair,  
Gold Medal, Midwinter Fair.

**DR. PRICE'S  
CREAM  
BAKING  
POWDER**  
Most Perfect Made.  
40 Years the Standard.

to any and all visitors. For some time a pet Jersey cow has been failing in her milk and in no way could Mr. F. account for this shrinkage; about the same time that the milk began to fail, a small pig (and by the way the only one the mother was blessed with) began to grow exceedingly fat, but imagine the owner's surprise when one day he discovered the youthful swine sitting on his haunches, with his front feet resting against the cow's legs—taking milk by the wholesale. The cow seems to be quite satisfied with her young care and the two can be found together most any time during the day. The cow lost her calf only a few weeks ago, which may have something to do with her liking for the pig. For a few days visitors invited free.

### Call to Action.

Know ye not that there is a silver party in the field? That appeals to the reason of the wage worker, laborer and farmer, saying "How long ye simple ones will ye love simplicity, and fools hate knowledge?" Isn't this a part of your knowledge? That you have bought us by your votes to this calamity we are in, of falling prices, a twenty-five cent horse, two bits a day for work and take your pay in truck and turnover, or a fifty cent dollar, which if you don't like that, then tramp. Keep on selling your votes for a drink, or be forced to vote as the boss says, and times will get no better mighty fast. We think rather than go it blind and split your throats yelling for a party that has cried, "Homes for the Homeless" since 1856, you better quit, for all you have gained is homes for a rich few, and the rest debt ridden homes, poverty stricken homes, homeless homes and national bankruptcy, and your votes have done it. When you have had enough of this deceit then join us quickly and help us yelp, "America for Americans." Then you will see the great land slide of humanity, "coming with hurricane force, crashing down through ten thousand mountain gorges, echoing, "make way for liberty!" Let the coyote howl it, the lone owl hoot it and the grizzly bear growl it. One country, one flag, from Greenland's icy mountains, to Darien's golden strand—E Pluribus Unum.

If you are with us then show it by your work in every precinct in the state of Oregon by forming clubs if not more than three and as many more as you can get. And send a list of the officers and members to the representative secretary of the national executive committee of the silver party, W. J. Bennet, of Medford, Oregon, in order that you can receive papers and documents and don't forget to recommend some man in favor of the silver party in each county for chairman of the county executive committee for provisional work.

E. P. HAMMOND,

Chm State Ex Com, Silver Party,  
W. J. Bennet, Sec.,  
Medford, Oregon.

### Spanish Feeling Against Americans.

The resolutions and speeches at Washington on the subject of Cuba stirred up so much feeling against the United States in Spain that the Spanish government had its hands fully occupied for a good many days in suppressing mobs. The conduct of the university students at Madrid, Cadiz, and Barcelona was of so disorderly a nature that the universities were prematurely closed, and will remain in a state of suspended animation for some time to come. The public burning of American flags, or their trampling in the dust under the feet of angry mobs, has been quite the regular proceeding in all parts of Spain; and nothing but great vigilance on the part of the authorities has prevented the mobbing of the American legation, and several consulates, from going so far as violence to the persons of our representatives. It is much to be regretted that all this feeling against the United States was so needlessly aroused. No possible benefit can result from the outbreak of Spanish wrath against America. Although some of the senatorial speeches were so excessively complimentary to Spain, and although every one in the United States has a very bad opinion of Spanish methods in the government of Cuba, it is not true that there has been any feeling whatever in the United States of hostility toward Spain or the Spanish people. With much sympathy for the Cuban people, and much disapproval of the policy of the Spanish government, there has been no unfriendliness toward the Spanish people. The young students in several American colleges who have, as a mere frolic, indulged in the burning of Spanish flags, have been guilty of a very objectionable sort of folly. Their behavior has been worth notice only because of the danger that it would lead to a misconception of American sentiment in Spain and Europe.—From "The Progress of the World," in the April Review of Reviews.

### Are You Going to Prove up?

Parties who contemplate making final proof on their land can save a big item of expense by having us prepare their paper, which work we will do free of charge. Bring or send us the name of party making proof, description of land, the names of four persons who appear as witnesses and the date upon which proof is to be made, giving time for six weeks' publication.

—Legal blanks at THE MAIL office.

### THROUGH EUROPE.

In the announcements of marriages in Spain, the ages of the contracting parties are always given.

BARRELS of wine, anchors, scythes—in fact all kinds of merchandise—are conveyed by the post office department.

It is the custom for house builders in Germany to leave a small flat place on the roof of each house, for storks to rest and build on.

FRANCE has offered \$100,000,000 to King Leopold for the Congo Free State, in case Belgium will not take it, according to Berlin reports.

SPAIN has just ordered that all steamers flying the Spanish flag or subsidized by the government shall in future carry none but Spanish engineers. The prevailing practice is to carry at least two British engineers, and formerly all were British.

MORTUARY tables show that the average duration of the life of women in European countries is something less than that of men. Notwithstanding this fact, of the list of centenarians collected by the British association, a fraction over two-thirds were women.

GERMANY's proposal for the establishment of international postage stamps is being examined by the British post office authorities. Such a stamp would enable correspondents to inclose return postage for their answers, which they now cannot do. The principle has already been adopted in the international return postal card.

## Cancer Of the Breast.

Mr. A. H. Crausby is one of the best known and most highly respected citizens of Memphis, and resides at 158 Kerr street in that city.

Some years ago his wife noticed a small lump in her breast. She thought nothing of it, but it increased in size rapidly, and soon broke through the skin and commenced to discharge. She was at once put under treatment of the best physicians, but they very soon found that they could do her no good, and simply prescribed antiseptics to keep the place clean. Both her grandmother and aunt, by the way, had died with cancer, and when apprised of this fact the doctors said that they would not attempt to save her; that she was incurable. Although the cancer had by this time become deep-seated and her health very low, one of the most noted specialists of New York then treated her. After treating her awhile, this doctor admitted that the

MRS. A. H. CRAUSBY.

case was hopeless and further treatment useless. "It is difficult to imagine how despondent we all became," said Mr. Crausby, "knowing that she must die and unable to give her any relief. I had spent over five hundred dollars with the best medical skill to be had, and felt that there was no further hope."

"One day I happened to read an advertisement of S. S. S., recommending that remedy for cancer, and in view of the failure of the most eminent physicians in the country, I confess I had little faith left in any human agency. However, I purchased a bottle of S. S. S., and to my delight it seemed to benefit her. After she had taken a couple of bottles the cancer began to heal, and astonishing as it may seem, a few bottles more cured her entirely. You can probably better understand how remarkable this cure was when I explain that the cancer had eaten two holes in the breast two inches deep. These healed up entirely, and although ten years have elapsed, not a sign of the disease has ever returned, and we are assured of the permanence of the cure, which we at first doubted."

"As my wife inherited the cancer, I certainly regard S. S. S. as the most wonderful remedy in the world, and it is truly a Godsend to those afflicted with this terrible disease. You may be sure that I shall always be grateful to that remedy, for without it my home would now be desolate and my children motherless."

The above is but one of many remarkable cures being daily made by S. S. S. Cancer is becoming alarmingly prevalent, and manifests itself in such a variety of forms, that any lump, sore or scab, matters not how small, which does not readily heal up and disappear, may well be regarded with suspicion. We will gladly send to any address, full accounts of several other cures fully as remarkable as this one. For real blood troubles, S. S. S. has no equal. It wipes out completely the most obstinate cases of blood diseases, which other remedies do not seem to touch. S. S. S. gets at the root of the disease, and forces it out permanently.

S. S. S. is guaranteed purely vegetable, and is a positive and permanent cure for Scrofula, Eczema, Cancer, Rheumatism and all traces of bad blood. Our valuable books will be mailed free to any address. Swift Specific Co., Atlanta, Ga.

### A CORNER FOR SCIENTISTS.

It has been found that bees find their way back to their hives from distances of about four miles, and that they fly with a velocity of about thirteen miles an hour.

TYPHOID fever cannot be transmitted by sewer gas, is the report of the experts to the London common council. The bacilli of the disease, also, find it hard to live in town sewage.

THE white rhinoceros has become nearly, if not quite, extinct. There are two stuffed specimens in England and one in the Cape Town museum. It is the largest species of the genus.

SIR BENJAMIN RICHARDSON, a noted English physician, thinks that the normal period of human life is about 119 years, and that seven out of ten average people ought to live that long if they took proper care of themselves.

HEINRICH TRUITL, a Vienna hardware merchant, who died recently at 91, left \$800,000 florins of his fortune to the Vienna Academy of Sciences for the promotion of scientific research. He left a quarter of a million florins besides to charitable institutions.

PROF. MILTON WHITNEY, of Johns Hopkins university, has determined that in an ordinary wheat soil there is at least ten thousand million soil grains in a gram (about a pint), and in some of the finest soil this number has reached twenty-four thousand millions.

DR. SAVORY, an eminent English physician, in writing upon the subject of English gout, asserts that nearly the entire population of England sooner or later will become victims of the gout in one or more of its protean forms, not more than one-tenth of the people of that country escaping.
