Thirty years is a long time to fight so painful a trouble as piles, but Jacob Mitchell, of Unionville, Pa., struggled that long before he tried DeWitt's Witch Hazel Salve, which quickly and permanently cured him. A tired stomach is very much like a sprained ankle. If you suffer from any of the symptoms of dyspepsia, your stomach is tired. It needs a crutch. We must relieve it of all work for a time, or until it is restored to its natural strength. To do this successfully, we must use a food which is already digested outside of the body, and which will aid the digestion of other foods that may be taken with it. Such a product is the Shaker Digestive Cordial.

The Shakers have utilized the digestive principles present in plants for the manufacture of this article, and its success has been truly phenomenal. You can try it for the nominal sum of 10 cents, as sample bottles are sold by all druggists at this price.

Laxol is the best medicine for children. Doctors recommend it in place of Castor Oil.

GIRLS WORK IN A MINE.

A reprehensible introduction of Foreign Customs on American Soil.

Four athletic young girls find daily employment at a small coal mine in the Mahoning valley, several miles from Shamokin, says the Atlanta Constitution.

The colliery is owned and operated by Joseph Mans, a hard-working German, who says he has simply introduced the custom of his fatherland in having his four daughters assist him in preparing the fuel for market.

The girls are six-footers, good looking and well formed, each tipping the scales at about 200 pounds. Kate, aged 20 years, has charge of the breakers; Annie, aged 16, runs its mine pumps and breaker engines like a veteran engineer; Lizzie, aged 18, drives a mule attached to a gin for the purpose of hoisting the coal from the slope, and Mary, aged 19, sees that the slate is picked from the coal by her little brothers, whom she helps in the work.

The girls wear short skirts, not bloomers, as might be supposed. Mans formerly worked in the mines at Shamokin, but during the last 12 years, with the assistance of his wife, who runs the farm, and their daughters at the mine, he has managed to buy this coal mine and a large amount of timber land besides.

LIQUOR FROM GAS BURNERS. Device of a Portland, Me. Hotel for Evading the Prohibition Law.

Everybody who visits Maine has a different story to tell on his return of his experience in getting drinks, says the New York Sun. The champion story is, perhaps, told by a well-known traveling salesman. He says that when he asked for a drink at a Portland hotel, he was shown into a room, which had nothing in it but table, on which were a pithier of water and several tumblers, and a few chairs.

Over the table was a chandelier, with apparently half a dozen gas burners. When the socks were turned, however, not gas, but liquor came out of the burners, which were horizontal, on the tips being uncrowded. From one burner came whiskey; from another, rum; from another, gin. Each burner supply pipe connected with a can of some one of these liquors in the room above.

The man who tells this story says that the indictment papers against the hotel in question for selling liquor would fill a bushel basket, but none of them will ever be brought to trial; at least, none has been yet. Since adopting this device, the hotel has evaded detection.

How Electricity Kills.

Experiments have been made by a French scientist upon dogs in order to determine the cause of death in electric shock. The conclusion reached is that for a given animal in normal condition as to health a definite amount of electrical energy will produce fatal results. It is thought that the action of the electrical discharge is to contract the arteries and to increase the pressure of the blood, and that death is due to inability on the part of the heart to sustain the increased pressure of the blood so produced. Post-mortem examinations seem to show that the passage of the current does not cause any anatomical disintegration.

Many of the debutante's gowns are in light-tinted gauzes rather than all white, as formerly.

Professor Sanders, at his fourth trial just ended at Fresno, was found guilty of forgery, in connection with the Wootton case, that has been a mystery in Fresno county so long, and sentenced to fourteen years in prison.

The three-year-old daughter of J. T. Black of Anderson, Cal., was crushed to death by being caught in a tumble rod of a pump.

Ah Con, a partner in a Chinese store at Oroville suffered a horrible death. He was missed by his friends and search revealed him lying in a hog pen to the rear of the building. He had evidently been stricken with a fit and falling to the ground the swine attacked his body. He was still alive when found, but the hogs had torn his abdomen open in a frightful manner and were feeding upon the living vitals of the unfortunate man. He died shortly afterward.

Gin Pon paid the death penalty at Spokane, Wash., Friday for the murder of a fellow-countryman. Four hundred people witnessed the execution.

Scrofula

Is a deep-seated blood disease which all the mineral mixtures in the world cannot cure. S.S.S. (guaranteed purely vegetable) is a real blood remedy for blood diseases and has no equal.

Mrs. Y. T. Buck, of Delaney, Ark., had Scrofula for twenty-five years and most of the time was under the care of the doctors who could not relieve her. A specialist said he could cure her, but he filled her with arsenic and potash which almost ruined her constitution. She then took nearly every so-called blood medicine and drank them by the wholesale, but they did not reach her trouble. Some one advised her to try S.S.S. and she very soon found that she had a real blood remedy at last. She says: "After taking one dozen bottles of S.S.S. I am perfectly well, my skin is clear and healthy and I would not be in my former condition for two thousand dollars. Instead of drying up the poison in my system, like the potash and arsenic, S.S.S. drove the disease out through the skin, and I was permanently rid of it."

A Real Blood Remedy.

S.S.S. never fails to cure Scrofula, Eczema, Rheumatism, Contagious Blood Poison, or any disorder of the blood. Do not rely upon a simple tonic to cure a deep-seated blood disease, but take a real blood remedy.
