Jacksonville, - - Oregon.

A LITTLE OF EVERYTHING.

A rainfall of two inches delivers upon an acre of ground 54,436 gallons of water.

It is estimated by experts that the black race embraces about one-tenth of the living members of the human species, or 150,000,000 individuals.

The potato crop of the United States last year amounted to 264,015,964 bushels, valued at $89,643,000. This is an average yield of 64.7 bushels to the acre.

Commissioner Hermann of the General Land Office has recommended that the land office now at Weare, Alaska, be moved to Rampart City, which is sixty miles further up the Yukon.

In the Island of Minora the humming birds are pugnacious little creatures. Thousands of them frequently attack huntsmen without any provocation, inflicting sometimes serious wounds on the face and neck.

Jack Carr, Alaskan mail carrier, has broke the record from Dawson to Skagway, coming out in ten days. He reports that the Yukon is giving its first signs of breaking up and that the ice will undoubtedly go out very early this year.

A newspaper is published in Paris exclusively in the interests of professional beggars. It notes the times and places of holding fashionable funerals, weddings and popular meetings, besides furnishing other news of interest to mendicants.

San Francisco has a saloon on the corner of Halleck and Sansome streets, the floor of which is inlaid with Uncle Sam's silver dollars. Seattle, Wash., has one on the corner of Front and Marion streets, the floor of which is inlaid with Uncle Sam's double eagles.

Sheriff Behrens, of Redding, has ordered some bloodhound pups from Lexington, Ky., which he will raise and use if necessary for hunting criminals escaping from justice. A well armed criminal, however, could shoot them about as easy as any other dog.—Yreka Journal.

The United States revenue cutter Thetis is to be fitted out for a cruise in the Okhotsk sea and along the coast of Siberia. The postal department proposes to use reindeer to carry the mails in Alaska, and it is for the purpose of securing the proper breed of these animals that the Thetis has been sent to the Arctic.

A movement has been started by former residents of Vermont to erect a memorial to Admiral Dewey, to be placed at the entrance to the state house, in Montpelier. Ex-Governor Levi P. Morton, of New York; Senator John M. Thurston, of Nebraska, and other Vermonters by birth are interested in the project. It is proposed to erect an appropriate statue.

There are 184 distilleries in the United Kingdom, and 143 of them are in Scotland. At the end of March, 1898, the accumulated stock in bond amounted to 137,500,000 gallons. For many years the product of whisky in the United Kingdom has been far in excess of consumption and export. The whisky now in Scotland is estimated at more than enough to meet all demands for the next four years.

The total rail shipments of lumber and shingles from Washington for 1898 amounted to 30,123 cars; lumber, 10,400 cars; and shingles, 19,622 cars. Taking the combined shipments of lumber and shingles by rail only, coupled together as one solid train, the cars containing this lumber and shingle output for the year 1898 would present a train 228 miles long. The shingles alone would make a train 149 miles long.

Captain William A. Andrews, who crossed the Atlantic to Paris in 1878 in a small boat, the Nautilus, will on June 17 of this year start on another voyage across the Atlantic in a tiny craft. The boat will be constructed of aluminum and canvas, and will be small and light enough when collapsed to carry under the arm. The voyage, Captain Andrews calculates, will take him 60 days.

As the result of reading a sensational story about cerebro spinal meningitis, Bertha Schreiber, of St. Louis, is dangerously ill of that disease, according to the statements made by her physicians. Hers is what is known in the medical world as a case of sympathetic contagion. The young woman is lying at the point of death. She is attended by three physicians, who declare the case most peculiar, although similar cases have been chronicled in the medical records.

On Monday of this week when everything in Southern Oregon was covered over with a warm spring sunshine, the people of the Middle Western states were having blizzards. The telegrams of April 3d told us that at Salina, Kans., "The worst blizzard of the year is in progress today." At St. Joseph, Mo., "Another blinding snowstorm is raging here today." At Des Moines, Iowa, "It has been snowing here for 36 hours, with no evidence of letting up." In another part of Iowa, "The heaviest snow ever known here in April is falling Railroads and street cars are operated with difficulty. Fifteen inches of snow since Thursday is the record."

The railway from Manila extends up the middle of the valley along which our troops have been advancing, says a writer who is familiar with the country. The country in which recent operations have taken place is very flat, and is simply a succession of rice fields. Between this valley and the sea is a low range of hills, and on the other hand is the coast range of mountains, perhaps 5000 or 6000 feet high. The rice fields are quite small and are separated by dikes, so that they can be flooded. It is an excellent country for defensive operations. The natives can use the dikes for trenches, retreating from one to another, and then abandoning a position, they can flood the fields and thus hinder the advance of our men.

Sugar and rice are the principal crops of the Philippines. Millet, maize, sago and indigo do well and are ordinarily profitable crops. Philippine coffee, of which there were formerly many plantations, has a peculiar rich and pleasant flavor. Cocoanuts, pineapples, bananas, oranges, grapes, figs and many other fruits grow almost spontaneously. The Philippines abound in valuable woods for building furniture, dye woods and some yielding gums. According to the best authority nearly two-thirds of the land is still public and passes to the United States with the title. If opened for settlement to soldiers many of our young men will remain and become permanent settlers. Some associations of this kind have already been organized. The price of improved land ranges from $4 to $20 per acre, depending upon the location and value of improvements. Reports of the observatory at Manila show that the average rainfall for the past thirty years has been 75.4 inches. The temperature is quite uniform, averaging during the past eighteen years, 77 degrees for January, the coldest month, and 83.8 degrees for May, the warmest month. Within this period the thermometer only once reached 100 degrees and once fell to 70.4 degrees.

A Swiss law compels every newly married couple to plant trees shortly after the ceremony of marriage. The pine and weeping willow alone are prescribed.

Do You Know
Consumption is preventable? Science has proven that, and also that neglect is suicidal. The worst cold or cough can be cured with Shiloh's Cough and Consumption Cure. Sold on positive guarantee for over fifty years. Sold by Chas. Strang, druggist.

Youth and beauty, with millions of money, were joined together in holy matrimony in New York city when Virginia Fair became the bride of William K. Vanderbilt, Jr.

Tell Your Sister
A beautiful complexion is an impossibility without good pure blood, the sort that only exists in connection with good digestion, a healthy liver and bowels. Karl's Clover Root Tea acts directly on the bowels, liver and kidneys keeping them in perfect health. Price 25 cts. and 50 cts. Sold by Chas. Strang, druggist.

The Chicago police are much disgusted because the man they accused of cutting up his wife into sausage meat says he only pushed her off a pier into the lake. If they had known it was such a tame, ordinary murder as that, they never would have taken the trouble to make an arrest.

How Is Your Wife?
Has she lost her beauty? If so, constipation, indigestion, sick headache are the principal causes. Karl's Clover Root Tea has cured these ills for half a century. Price 25 cts. and 50 cts. Money refunded if results are not satisfactory. Sold by Chas. Strang, druggist.

The rolling mills at Columbia, Pa., have posted notice that beginning May 1 the price for puddling will be raised from $2 75 to $3, and that a general readjustment of the wages of the mill hands will be made. The employes of the Aetna Standard Iron and Steel Works at Bellaire, O., were also notified of an advance in wages of 10 per cent., to go into effect immediately. About 4500 men are affected.

Bismarck's Iron Nerve
Was the result of his splendid health. Indomitable will and tremendous energy are not found where stomach, liver, kidneys and bowels are out of order. If you want these qualities and the success they bring, use Dr. King's New Life Pills. They develop every power of brain and body. Only 55c at Chas. Strang's drug store.

An inquisitive person in New York city has been examining the Easter hats, and she says the women of that city spend $500,000 each Easter for hats. As for this year's variety she says: "I give you my word some of them measured two by three feet. If size is what you are looking for, you will find it in the April extravaganza—and you will pay for it. In fact, the hat seems to be in direct ratio to its traditional bill. Humility has a way of showing itself in blushes that cost $14 a bunch. Clever French roses they are, with such a natural look that the Fifth avenue bee pauses to sip of their painted honey. The price of a single hat, to be really swell, must be at least $35. After that, anywhere into the hundreds. Fifty dollars is by no means an uncommon price for a New York woman to pay for a hat that takes her fancy."
