A Free Trip to Paris!

Reliable persons of a mechanical or inventive mind desiring a trip to Paris, France, with a party and expenses, should write The PATENT RECORD, Baltimore, Md.

Business Methods

of today require a complete and neatly printed line of stationery. Your business should be represented in an attractive manner upon every piece of stationery you send out. It costs but little more in the long run and carries with it an air of prosperity. THE MAIL job department is replete with facilities for printing letter heads, envelopes, cards, etc.

That Win.

OUR TRADE POSSIBILITIES.

From the Eugene Register.

One of the first things that will demand attention in our new trade relations with the Orient will be the introduction of Oregon apples and other fruit.

Already a demand has come across the water for a trial shipment and 1000 boxes will be shipped at once. This is only an opening wedge for a vast and important trade that is bound to open up in the far East for Oregon products.

One of the most important moves for the future is introduction of Pacific coast flour. This will do more toward raising the price of wheat in Oregon than anything else and will make wheat raising in Willamette valley profitable, whereas at present there is little money in the industry.

A prosperous future is in store for Oregon and nothing will tend to make us so thoroughly prosperous as the opening of trade relations with the Orient.

FARM INTERESTS LOOKED AFTER.

The diseases of farm animals have received special study in the Department of Agriculture in the last four years. Nearly 2,000,000 doses of blackleg vaccine have been distributed among the farmers and cattle owners in the infected districts, with the result that the mortality among the young cattle in the infected districts has been reduced from 10 to 15 per cent annually to one-half of 1 per cent. In the case of sheep, the gasoline process for exterminating parasites has met with great success. In hog cholera and swine plague, 70 to 80 per cent of treated animals have been saved. Of some 24,000 animals treated in Iowa, only two or three herds failed to show good results.

Siberia has a poor grain crop this year. Crops in her best cereal districts are almost a failure and the people are actually suffering.

A Village Blacksmith Saved His Little Son's Life.

Mr. H. E. Black, the well-known village blacksmith at Grahamsville, Sullivan County, N. Y., says: "Our little son, five years old, has always been subject to croup, and so had the attacks been that we have feared many times that he would die. We have had the doctor and used many medicines, but Chamberlain's Cough Remedy is now our sole reliance. It seems to dissolve the tough mucus and by giving frequent doses when the croupy symptoms appear we have found that the dreaded croup is cured before it gets settled." There is no danger in giving this remedy for it contains no opium or other injurious drug and may be given as confidently to a babe as to an adult. For sale by Chas. Stang, druggist.

Tarantulas are being raised in Australia for the sake of their webs, filaments of which are made into thread for balloons. They are lighter than silk and when woven lighter than canvas.

HARDWARE, GUNS AND AMMUNITION. J. Beck & Co.

Undertaking Goods kept on hand. Picture framing and upholstering.

Seventh Street, Medford, Oregon

IT IS UNFAIR

To send out of town for articles that can be procured at home.

THE MERCHANT

expects all the people of a town to trade with him. And that is quite proper and right, because it is a fair business proposition.

IT IS JUST AS FAIR

for mill men to expect merchants and all builders to buy their Doors, Sash, Mouldings, Flooring, Rustic, and all Mill Products at home.

GRAY & BRADBURY'S PLANING MILL

is a home institution. Why not patronize it?

New Lumber Yard

O. E. GORSLINE & SONS

MEDFORD, OREGON

JACKSONVILLE MARBLE WORKS

J. C. WHIPP, Prop'r.

Does General Contracting in all Lines.

GRANITE AND MARBLE WORKS.

CEMETERY WORK A SPECIALTY Jacksonville, Oregon.

A LITTLE OF EVERYTHING

The total registration of Greater New York for 1900 is 658,154.

The Spanish cabinet has resigned as a protest against the appointment of Weyler as Captain General of Madrid.

A Methodist Episcopal Church was dedicated at Manila August 12, being the first Protestant church dedicated in the Philippines.

The money expended on the common school system of the United States is equal to the combined outlay for public education in England, France and Germany. In this country seventy per cent of the children of school age are registered in schools.

In 1894 a partial franchise was granted to women in Illinois, and in Chicago that year 29,815 female voters registered and a few voted for the novelty of the thing. In 1898 but 1448 registered, and this year they have disdained to go near the registration booths.

A new mile of standard single track railroad, without taking into consideration the switch tracks and side tracks, requires about 4500 ties. The average life of a railroad tie is about five years, so that in ten years a railroad will use ties at the rate of about 9000 for every mile of track.

Word has been received at the War Department that the cable ship Burnside is at Port Said on her way to Manila. This vessel left New York on September 26 and carries a full equipment of cable paraphernalia to connect Manila with all the islands of the Philippine Archipelago.

Perhaps, after all, the men who could not get away from Nome this fall will be the lucky ones. Nature, it is said, through the action of wind and wave, has renewed to a considerable extent the deposit of ruby sand on the beach, and stranded miners are again out with their rockers washing the sands with profit.—Oregonian.

Tree owners in various states are being humbugged by the purchase of an insecticide which, when placed in an augur hole in a tree trunk, will permeate the tree and render it distasteful to insects. It is a new application of the old idea of feeding a hen with dyes in order to produce Easter eggs, and an equally apt illustration of the unfortunate inharmony between theory and practice.—American Lumberman.

The four-masted ship Lindfield, loaded at the Hastings mill at Vancouver last month for Southampton and London. She had a very large cargo of lumber including four ship's spars of unusually large size. They are carried on her deck and are 32 by 32 inches and are about 105 feet long. They are to fill a special order for the Admiralty, and will be used for masts for the Queen's yacht, Albert, replacing the iron masts now in use.

A novel point has been decided in St. Clair County, Illinois. David S. Gage and wife were killed in a terrible storm that swept over the county four years ago. The bodies were found lying side by side. They had one daughter, the only lineal heir. In a suit for a settlement of the estate, the question arose as to which had died first. If Gage, then his wife's relatives would be entitled to her award, consisting of the homestead. If his wife died first, then her relatives would be entitled to nothing, but the whole estate, amounting to about \$10,000, would fall to Miss Mabel Gage, the daughter. There was no way of proving which had died first, and the court held that since woman

physically is weaker than man, Mrs. Gage must have died first, and upon this hypothesis awarded the estate to the daughter.

An officer in the Austrian army in Vienna has invented balloons which will float both men and horses across a river. They are to be fastened to belts around the men and the harness of the horses.

The government is preparing to relieve the suffering of the drought-stricken Indians on the Sacaton reservation, in Arizona. Several carloads of rations will leave Phoenix, Arizona, in a few days, and will be distributed among the destitute.

Last year two Italian railway lines passing through swampy regions supplied all their station houses with mosquito nets. In consequence, there has been such a diminution in the number of cases of malaria that other lines in Italy and in Sicily are about to adopt the same measures.

Alvard, the bank robber, who stole \$700,000 from the First National bank, New York City, has been caught in Boston. He was note teller in the bank and squandered the money he robbed the bank of on race horses and in fast living. Part of the amount has been returned to the bank.

The Chinese exclusion act will expire in 1902. Chairman Maguire of the Central Labor Union says: "I wish to give this timely warning so that laboring men and women throughout the United States shall take measures to have another exclusion bill passed. Visit your congressman and see how he stands on the question. Put him on record."

A college student visited a Philadelphia photographer the other day and sat for his picture. When the plate was developed the astonished photographer saw plainly on the young man's forehead a clearly defined death's head with crossbones beneath it. Thinking it was some imperfection in the plate, the photographer arranged another sitting. Again the skull and cross bones appeared in the picture, and the mystified photographer was fairly struck dumb with amazement. Then he noticed the smiling sitter and finally induced him to tell the joke. The trick simply consisted of painting on the forehead the grim design with a solution of bisulphate of quinine. This is invisible to the eye, but shows pure white to the camera.

For the fiscal year, ending June 30, the government printed of notes, certificates of deposit, bonds and National bank notes, 26,032,718; internal revenue stamps, 48,784,045; custom stamps, 225,000; postage stamps, 40,042,547; postage stamps for Cuba, 162,300; postage stamps for Porto Rico, 16,550; postage stamps for the Philippines, 52,010; postage stamps for Guam, 1570; checks, certificates, drafts, etc., 1,592,683. The number of sheets printed, which was 116,909,423, does not really give a fair conception of the amount of work done. There were for instance 40,042,150 sheets of postage stamps, but the number of stamps in the sheets was 4,026,452,574. The number of internal revenue stamps was 2,439,747,312. It is estimated that for the fiscal year 1902 the bureau will have to print 142,357,100 sheets of the various classes of the work.
