## A New Cure For Diseases of Men.

Scientific investigation, supplemented by experience, has shown that urinary diseases are more prevalent and destructive to life, health and happiness than any other class known to the medical fraternity. They are not confined to the low and degraded portions of humanity, as many suppose, but are to be found among the pure in heart, the innocent, the truly pious and the wealthy.

Many of them are transmitted from parents to children, from generation to generation. Thousands of people suffer untold agonies from their ravaging effects, and meet an early and untimely death, often ignorant of the cause. Though transmitted innocently, the effects of these diseases are not less terrible. It is a sad truth that the innocent are often greater sufferers than the guilty.

Of all the organs of the body few are more important or worthy of attention than those engaged in the urinary functions. In perfect health—that great blessing which so few enjoy—one will scarcely direct a moment's thought to these important organs, and at the first symptoms good advice, such as may be easily obtained, should be immediately solicited.

Among the chief and most common of diseases is SEMINAL WEAKNESS and NERVOUS DEBILITY, or loss of nerve power, due to masturbation and venial excesses. Thousands of young and middle aged men suffer with nervous diseases and may be ignorant of the causes, when a little timely advice would make life's pathway full of cheer and happiness. When the first symptoms of seminal weakness manifest themselves the sufferer is noticed to become dull and morose and is troubled with indigestion, though the appetite may remain good. But the strength vanishes and the patient grows thin. He becomes indolent and debilitated, and loss of memory and all vigor of the sexual organs may follow. In time he may fall into a complete state of impotency—total loss of sexual power. Among its terrible effects may be mentioned weakness of the memory, confusion of ideas, nervous dependency and general weakness. It needs no mirror; it reflects itself. The pale face, the sunken eye, the downcast countenance, the stooping aged form—all serve to announce the victim's troubles. It seldom kills of itself, but it
