We are sorry to hear Prof. Jasper Miller being one of the many unsuccessful applicants for a school certificate at the last teachers' examination.

It was officially announced that the school at Antioch would begin the first Monday in March but the school board met on Friday, Feb. 28th, and decided not to begin until the 20th of March, owing to the bad weather and muddy roads.

Robt. Dearman, one of our most energetic and prosperous farmers, has returned from his trip to Linn County and is so favorable impressed with the outlook in that section of Oregon that he may exchange his farm here for one in that county.

The ever resolute and ambitious mail carrier, G. A. Hollenbeck, who has carried the mail continuously for the past eight years on the route from Sams Valley to Prospect, was in our midst a few days last week enjoying a well earned rest. He informs us that his son, Bert, who has been seriously ill for some time, is very much improved.

March 1st was ushered in as one of those warm-hearted soul-cheering spring like days and the whole Table Rock country seemed to be of a new lease of life and activity. When we listen to the singing of so many spring birds and see the country carpeted with the beautiful yellow flowers we all join in the well coming return of spring, the most beautiful season of the year.

You will never wish to take another dose of pills if you once try Chamberlain's Stomach and Liver Tablets. They are easier to take and more pleasant in effect. They cleanse the stomach and regulate the liver and bowels. For sale by Chas. Strang, druggist.

BY ORDER OF CLUBS.

Klamath County Items.

from the Klamath Falls Republican.

We are informed that Topograde, between here and the railroad, is dangerous and very much in want of repair. It very precipitous and needs rocks reinforced and otherwise fixed. This should be done before an accident occurs.

The Republican County Convention for Klamath County will be held in Klamath Falls, March 22d, and primaries in the various precincts on the 15th inst. The convention will be made up of 39 delegates apportioned to the various precincts as follows: Linkville 10, Dairy 4, Klamath Lake 1, Langell Valley 2, Lost River 3, Plymouth 5, Poe Valley 2, Sprague River 2, Snow 2, Tule Lake 4, and Wood River 4.

Hon. H. E. Ankeny arrived here Sunday to attend the stockholders' meeting of the Klamath Falls Irrigating Co. Both Mr. Ankeny and Mr. Marple, who was conveying him to this place, were considerably bruised as the result of a run-away, which occurred near Spencer creek. One of the horses became frightened, both ran and the two occupants of the vehicle were thrown violently to the ground. The buggy was badly wrecked. Fortunately neither Mr. Ankeny nor Mr. Marple was seriously hurt.

Jury Found Them Not Guilty.

The trial of James Brown, who with a number of other residents of Modoc County, California, was charged with lynching Calvin Hall and his sons several months ago, which has been going on in Alturas, and attracting considerable attention, mainly on account of rows continually breaking out between the lawyers, witnesses and the court, resulted in a verdict of acquittal by the jury on the second ballot.

Chinese Points For Hosts.

"Don't eat with your ears," says Yuan Mel, a Chinese writer, "by which I mean do not aim at having extraordinary out of the way foods. Just to astonish your guests, for that is to eat with your ears, not with your mouth. Bean curd, if good, is actually nicer than birds' nest. And better than sea slugs, which are not first rate, is a dish of bamboo shoots.

"The chicken, the pig, the fish and the duck—these are the four heroes of the table. Sea slugs and birds' nest have no characteristic flavors of their own. They are but usurpers in the house. I once dined with a friend who gave us birds' nests in bowls like vats, holding each about four ounces of the plain boiled article. The other guests applauded vigorously, but I smiled and said I came here to eat birds' nest, not to take delivery of it wholesale."

GASSING TREES FOR INSECTS.

New Method Employed in California Orange Orchards to Save the Trees.

The United States department of agriculture has just reported on a unique and effective method for killing the scale insects which are causing so much destruction to orange trees in California. The principal injury is the extraction of the juices of the tree. As the scale insect is a mere pumping machine, it is continually absorbing the sap from the tree. There is likewise a poisoning caused by the irritation excited by the beak of the insect, or some liquid injected through the same.

It has now been found that the only sure means of destroying these pests is by subjecting them to the fumes of hydrocyanic acid gas, commonly designated as "gassing." For most species of scaled insects one good gassing, when done at the right season, will almost, if not quite, exterminate them.

The treatment consists in enclosing a tree at night with a tent and filling the latter with the poisonous fumes generated by treating refined potassium cyanide, 98 per cent, strength, with commercial sulphuric acid, 66 per cent, and water. The proportions of the chemicals as now employed in California are considerably in excess of the amounts recommended a few years since.

For small trees ordinary earthenware vessels are used to generate the gas. For larger ones, running heavy doses, tall wooden pails are employed, two generators being used.

The extremely dangerous nature of the gas demands that the greatest caution should be taken to avoid inhaling it by an operator. The treatment is made at night, and the person handling the chemicals holds up the tent and quickly drops the cyanide into the generator and makes a prompt exit. The gassing is often done for cultivators by individuals who make a regular business of it, charging a fixed rate per tree, depending on size, ranging from ten cents to a dollar or more.

About 50 trees of the largest size, 30 feet high or thereabouts, can be treated in a night with an equipment of 12 or 15 tents. With smaller trees the number which can be treated in a single night is very considerable, it being possible to gas from 300 to 500 trees, averaging ten feet in height, in 11 or 12 hours, employing about 40 ring tents.

Help... Nature

Babies and children need proper food, rarely ever medicine. If they do not thrive on their food something is wrong. They need a little help to get their digestive machinery working properly.

SCOTT'S EMULSION OF COD LIVER OIL WITH HYPOPHOSPHITES OF LIME & SODA

will generally correct this difficulty.

If you will put from one-fourth to half a teaspoonful in baby's bottle three or four times a day you will soon see a marked improvement. For larger children, from half to a teaspoonful, according to age, dissolved in their milk, if you so desire, will very soon show its great nourishing power. If the mother's milk does not nourish the baby, she needs the emulsion. It will show an effect at once both upon mother and child.
