

SOCIETIES OF MEDFORD.

J. O. U. F.—Lodge No. 28, meets in J. O. U. F. hall every Saturday at 8 p. m. Visiting brothers always welcome. E. W. CALKINS, N. G. A. D. NAYLOR, Sec. 2nd.

Methodist Episcopal Church—Rev. H. Moore, pastor. Preaching every Sabbath at 11 a. m. and 7:30 p. m. Sunday school at 10 a. m. G. L. Gilkey, supt. Class meeting every Sabbath at close of sermon. Love Fausett, leader. E. C. South, organist. Regular weekly prayer meeting every Thursday evening at 7:30. Ladies' sewing circle every week. Missionary society meets the first Friday in each month.

Pres. Yvonne Church—Rev. A. Haberly, pastor. Preaching at the manse in the rear of the church. Preaching every Sabbath at 11 a. m. and 7:30 p. m. Sunday school at 10 a. m. David Day, supt. Christian Endeavor meeting one hour before the evening service. Miss Hilda Decker, pres. Ladies Aid Society every other Thursday afternoon. Mrs. E. U. Wall, Pres. Ladies' Missionary Society 2d Tuesday of each month at 1:30 p. m. Mrs. L. T. Pierce, Pres.

Christian church—Corner of Sixth and I streets. Preaching at 11 a. m. and 7 p. m. Sunday school at 10 a. m. Junior Endeavor at 2 p. m. V. P. S. C. at 6:30 p. m. Prayer meeting every Thursday evening. Ladies' Missionary Auxiliary to C. W. B. E. First Thursday 7:30 p. m. Second Thursday 7:30 p. m. Third Thursday 7:30 p. m. People welcome. O. J. Gist pastor. Resides at the church.

Methodist Episcopal Church South—Rev. M. L. Farley, pastor. Preaching every Sabbath at 11 a. m. and evening. Sunday school at 10 a. m. Prayer meeting Thursday evening at 8 o'clock. Woman's Home Mission Society meets first Thursday of each month at 7:30 p. m. Everyone is cordially invited to all our services.

Notice for Publication. United States Land Office, Roseburg, Oregon, Feb. 27, 1922. Notice is hereby given that in compliance with the provisions of the act of Congress of June 3, 1878, entitled "An act for the sale of timber lands in the States of California, Oregon, Nevada, and Washington Territory," as extended to all the Public Land States by act of August 4, 1892.

When the Power is Off What Happens?

Every factory worker and mechanic knows what happens when the power is off. Everything stops. The machinery is idle. If a mechanic were taken into a factory and saw the machinery silent and motionless he'd know at once that the power was off. When you shut off the power from a plant you shut off its activity.

If every factory and mill-hand, every mechanic and workman, understood the mechanism of his body as he understands the machinery of the mill, he would know that when a man is weak and run down, when his activities are slowed down if not altogether stopped, there is something wrong with the power plant of the body.

mechanism of his body as he understands the machinery of the mill, he would know that when a man is weak and run down, when his activities are slowed down if not altogether stopped, there is something wrong with the power plant of the body.

The power plant of the body includes the stomach and its associated organs of digestion and nutrition. All physical strength is derived from food digested and converted into nutrition. Nutrition is the power which runs the body.

When nutrition fails the body fails. The chemical changes by which food is converted into nutrition take place in the stomach and digestive and nutritive tracts. When the stomach is diseased, the nutrition is reduced and the body's power is reduced in proportion.

A DOCTOR'S DICTUM. An eminent physician in a lecture to medical students, said in substance, "When you are called on by a sick person the first examination must be directed to the stomach."

Just as the mechanic knows the power's off when the machinery stops, so the physician when he sees a man weak, tired, and helpless, knows the power is off. The food the man eats is not being converted into nutrition.

When you have related the weak physical condition to the "weak" stomach and the "run-down" condition to

She Read the Signal. There is a romantic story about Lord Kelvin's second marriage. In the early seventies he, then Sir William Thomson, was in West Indian waters, on board his schooner yacht, the Lalla Rookh. As a recreation he took up the question of simplifying the method of signals at sea.

"I quite understand it, Sir William," she said. "Are you sure?" he questioned, half doubtfully. "If I sent you a signal from my yacht, do you think you could read it and could answer me?"

"Well, I would try," she responded. "I believe I should succeed in making it out." The signal was sent, and she did succeed in making it out and in transmitting the reply.

A Homely Greeting. According to Ainslee's Magazine, when the governor of Newfoundland, Sir Henry McCallum, K. C. M. G., went ashore at a small harbor of the east coast he was met at the landing place by a grizzled old fisherman, who sought to make the stranger welcome, whoever he might be.

"Be you comin' ashore, sir?" he asked. "Yes," said the governor. "Be you here about the he (seal oil)?" the fisherman pursued.

"No," said the governor. "Be you one of 'Sam' Lewis' men from Red bay, sir, come about the timber?" "I am the governor of Newfoundland," Sir Henry announced, with some show of dignity.

"Be you, now?" said the fisherman, with a friendly offer of his hand. "Well, 'tis a mighty good job—if you can hold it. An' I hopes you will. Would you like a cup of tea, sir?"

"A Lot of 'n'r." The inhabitants of the little town of Somersby, in England, where Tennyson was born, are frank in giving their opinion of their distinguished fellow townsman.

One sharp November day, says the Philadelphia Record, a boy entered a car, leaving the door open, much to the discomfort of an old gentleman who sat next. As the wind chilled his marrow his temper rose.

"If you'd met 'im goin' along this dusty road, you'd 'a' takken 'im for a tramp goin' to Brigg for a night's lodgin'." It Reminded Him. One sharp November day, says the Philadelphia Record, a boy entered a car, leaving the door open, much to the discomfort of an old gentleman who sat next.

An Interesting Coin. An interesting coin has just been sold in Germany. It is one of the few coins in the history of the world which can be accused of having a humorous side to it.

His Man Was Appointed. As an instance of the acuteness of Al Daggett, the former Republican leader of Kings county, N. Y., the story is told that when Seth Low was elected mayor of Brooklyn some years ago he wrote to Mr. Daggett, offering to appoint as commissioner of elections one of any three men he might name.

Her Pet Fnd. Mrs. Jones—Mrs. Robinson is the greatest woman to stick to a fad I ever saw. Mrs. Brown—Why, I never heard anybody mention that before.

Taken Seriously Now. Bunker—I used to get considerable amusement out of golf. Ascent—Ah, then you don't play any more? Bunker—Yes, indeed. I was referring to the time before I began to play.—Philadelphia Press.

Mid Case. Wife (anxiously)—Is my husband very ill, doctor? Dr. Stukum—Oh, no. Only about \$100 worth.—Exchange.

Conversational French. "Can you speak French?" "A little. That is, I can shrug my shoulders."—London Answers.

PECULIARITIES OF SOUND.

The Kind of Note Best Suited For Long Range Signals. Signals made by sounds of explosion are not the most reliable. Their penetration is obviously often uncertain, while, their duration being brief, they may be missed by momentary inattention.

The siren horn was the more efficient instrument as compared with gun-cotton cartridges over London. The siren would probably have been yet more efficient as also doubtless a horn capable of producing two notes differing, say, by the interval of a third or a fifth, a conclusion arrived at many years ago by experiments which have been unhappily too much lost sight of.

And the same result has been arrived at in another way. The peculiar cry of the Alpine guide, which is, in fact, of that nature which Professor Smith advocates, has doubtless been taught by the exigencies of his situation, where his voice is required to carry across broad and deep ravines. Nature has taught the same lesson in the Australian wilds, where the characteristic "Cowl, cowl!" appears essential to penetrate the deep woods.

Nor indeed need we look farther for an example of the same kind than our own village lanes. The high pitched voices of children are very far-reaching. Their shouting can be heard farther away in the sky than that of man, and in calling to their fellows they always employ a trick of the voice taught doubtless by experience. The child will summon her playmate from far away with a well practiced "Sally," the first syllable, high pitched and prolonged, giving place to the second syllable uttered abruptly in a yet higher note.

THE TURQUOISE. The turquoise, the birthstone for December, signifies prosperity.

The turquoise was a familiar and favorite gem among the ancient Mexicans and Indians of the west. The turquoise fades when its owner is ill, and dies when the wearer is attacked by an incurable malady—so they say.

The Germans claim that by its varying shades the turquoise turns telltale on the caprices and moods of its wearer. Shakespeare gives these words to Shylock: "He would not have lost his turquoise ring for a whole wilderness of monkeys."

The turquoise derives its name from a word meaning Turkish and is so called because the first turquoisees were found in Turkey. If your birthday comes in December and you wear a turquoise, you need never be afraid of falling off a high place.

It is also said that it has the power of protecting its wearer against contagion. A turquoise, would certainly be an ornamental substitute for vaccination. Its efficiency would probably depend upon the "faith" of the wearer.

Rabbits play in this way: Two of them—I have not seen it played with more—run quickly toward each other, and when on the point of contact each leaps into the air, but one higher than the other, clearing him completely. They come down with their tails toward each other, but instantly, with an, as it were, "Excuse my tail!" both turn and run and leap again, and this they will do from two or three to half a dozen times, always leaping up at the exact moment when they would otherwise come into collision and one always taking the higher leap—sometimes an astonishingly high one—right over his companion. They never meet in the air, nor can I see how this can be avoided except by a plan or figure being mutually followed by them, as with ourselves in a game or dance.

I believe that each clears the other alternately, but I have not yet convinced myself of this.—Saturday Review.

The Quick Craze. The quick craze is by no means new, but seems just now to be more intrusive than ever before. Here is a young woman practicing fourteen hours a day to cultivate her voice. It's not lost voice. Nearly all the pugilists, active and retired, are writing volumes on "How to Get Strong Quick," and the readers are exercising two or three hours a day, when ten minutes are quite enough. Result, lost health. The get rich quick fellows, in jail and out, are hiring able lawyers to help them devise schemes that will defy the law and enable them to fleece lambs regardless of the code.—New York Press.

His Touch of Humor. "Always," says the astute news editor to the new reporter, "always be on the lookout for any little touch of humor that may brighten up our columns." That evening the new reporter handed in an account of a burglary in a butcher's shop which commenced, "Mr. Jeremiah Cleaver, the well known butcher, is losing flesh rapidly of late."—Exchange.

Conversational French. "Can you speak French?" "A little. That is, I can shrug my shoulders."—London Answers.

IN THE PHILIPPINES.

Hundreds of insurgents surrender to the Americans. General Frederick D. Grant's expedition in the gunboats Baseo and Florida, several steam launches and native lighters, ascended the Gandara river, in the island of Samar, and brought the insurgent leader Guevarra and his entire command down the coast. This command consists of Rafael Sebastian, Abaki and 38 other officers, 189 men and 161 rifles. Several hundred insurgents, with arms, forlornly surrendered to the Americans at Catabalogan and Sulat, also in Samar.

Captain L. W. V. Kennon of the Sixth Infantry reports from the island of Negros the surrender of the ladro leader Bufo with 158 officers and men of his command, together with 12 guns, 140 bolos, seven spears and a few revolvers and daggers. This surrender means the opening up of the whole of the southern coast of Negros.

At the trial by court martial of General Jacob H. Smith, at Manila, on the charge of conduct prejudicial to good order and discipline, it was admitted that General Smith gave instructions to Major Waller to kill and burn, and make Samar a howling wilderness; that he wanted killed everybody capable of bearing arms, and that he did specify all over 10 years, as the Samar boys of that age were as dangerous as their elders.

\$100 Reward, \$100. The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known for the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address, F. J. CHENEY & CO., Toledo, O. Sold by druggists, 7c. Hall's Family Pills are the best.

P. J. Fickus, a steamboat engineer on one of the California Navigation and Improvement company's boats plying between San Francisco and Stockton, has brought suit in the superior court at San Diego against D. H. Hewitt, a capitalist, for damages in the sum of \$30,000 for the alienation of his wife's affections. Hewitt was once the husband of the woman whom he is now accused of stealing from plaintiff. In 1900, the complaint recites, Hewitt promised Mr. Fickus that if she would procure a divorce from the plaintiff he would give her \$25 a month for her use; that he would provide her with a horse and buggy; that in his will he would bequeath to her one-fourth of his estate, and that he would bequeath the remainder to the two children born of their marriage. The divorce was granted in June, 1900. The plaintiff says that the reason he did not bring suit before was that he has but recently learned of the foregoing facts.

Dangerous If Neglected. Burns, cuts and other wounds often fail to heal properly if neglected and become troublesome sores. DeWitt's Witch Hazel Salve prevents such consequences. Even when delay has aggravated the injury DeWitt's Witch Hazel Salve effects a cure. "I had a ruinous sore on my leg thirty years," says H. C. Hartly Yanketown, Ind. "After using many remedies I tried DeWitt's Witch Hazel Salve. A few boxes healed the sore." Cures all skin diseases. Files yield to it at once. Beware of counterfeits. Chas. Strang.

A large area of land extending back from the ocean between San Pedro and Long Beach, Cal., is about to be converted into solar salt manufacturing plant by the San Pedro Salt company. Sea water, brought in by a long ditch, where, by evaporation, the water will be removed from the salt. The tanks will be so arranged that when evaporation from any one has been accomplished the concentrated brine may be drawn off into a crystallizing tank for final drying.

Wants Others to Know. "I have used DeWitt's Little Early Rider for constipation and torpid liver and they are all right. I am glad to induce them for I think when we find a good thing we ought to let others know it," writes Alfred Heinez Quincy, Ill. They never gripe or distress. Sure, safe pills. Chas. Strang.

Just before leaving Salt Lake for California, Frank Wardrip, alias Wade, confessed to the officers who had him in charge that he is the man who, while robbing a house recently in Sacramento, murdered Hugh Duffy. Wardrip said that while he was in the house Duffy attempted to catch his accomplice, a boy, who was watching on the outside. A scuffle ensued, during which, Wardrip says, he picked up a revolver from a dresser near by and shot through the window at Duffy, killing him. Wardrip gave the officers the names of his father and sister—David Wardrip and Miss Nellie Wardrip—who live in Ned-Loe, Mead county, Ky.

Soft Harness EUREKA Harness Oil. You can make your harness as soft as a glove and as tough as wire by using EUREKA Harness Oil. You can lengthen its life—make it last twice as long as it ordinarily would. makes a poor looking harness like new. Made of pure, heavy bodied oil, especially prepared to withstand the weather. Sold everywhere in cans—all sizes. Made by STANDARD OIL CO.
