DYING FROM LACK OF COAL

POOR PEOPLE OF CHICAGO ARE SUFFERING WHILE FUEL IS WITHHELD.

Twenty-five coal men and officials of six railroads will be summoned before the inquisitors to explain why fuel is being withheld from the market and prices are being sent skyward.

Special scouts sent out by the Manufacturers' association reported yesterday that 15,000 carloads of coal were standing on the tracks in and about Chicago. Meanwhile, with zero temperature and a bitter cold wind, big office buildings, schools and hundreds of residences are almost without fire and can get hardly any coal.

Trainsloads of coal cars sidetracked and labeled with placards instructing railroad freight crews to hold the consignments indefinitely have been discovered, it is said by the persons who caused the investigation to be made.

Two thousand persons in Chicago are suffering from ailments directly due to cold and exposure resulting from the coal shortage, according to the weekly bulletin of the health department, issued yesterday. Serious results are already seen in a heavy increase in the death rate, and the health department brands the men responsible for the situation as guilty of constructive homicide.
