posed of four non-Mormons and three Mormons, and it is said that it is probable that the polygamy question will come before it for investigation.

One of the negroes who was recently in bondage to a white citizen told the grand jury in Montgomery, Alabama, recently what he knew of the involuntary servitude of negroes which has a ready caused the arrest of two prominent planters. The negro said he had been in bondage for more than a year for a debt of \$6. He to'd of a negro man and a negro woman having been brutally whipped to death.

H, C. Hussell, the great Australian astronomer, after carefully studying the matter for thirty-six years, says: "I speak positively when I say I have found that the moon controls the rain. My researches extend for thirty-six years. Briefly, when the moon is moving south there is plenty of rain, when it is moving north there are years of drought so there are alternate vet and dry periods, the wet lasting nine years and the dry ten.

The American Society of Equity has issued a bulletin to the farmers of the United States exhorting them not to sell wheat until the Chicago price reaches \$1.00; and then to dump all they have on the market without waiting for a greater rise We never heard of the American Society of Equity, and doubt if the farmers of the country ever heard of it before. Perhaps it has not the least connection with the speculative market; but one thing is certain If the authors of this bulletin could have the assurance that the farmers of the country would follow their advice, they could enrich themselves beyond the dreams of avarice.

The Spinish War only lasted a short time, and there was very little fighting; the larger number of those who enlisted never left the United States, and yet 65,000 have so far applied for pensions. The Pension Office has rejected 18,185 claims, but there were 34,210 pending May 1 About 13.000 pensions on account of the Spanish War have been granted, including 3100 of the widow and dependent class. More pensions have been granted on account of the Spanish War than had been granted up to 1864 on account of the Civil War. In 1862 the applications numbered 2487, and 462 pensions were allowed; in 1863 there were 7884 allowed, and the number was 9977 in 1876 .- Portland Oregonian.

For some weeks past the officials of the Harriman roads have been considering the matter of locating tracts of land in Oregon which will answer the purposes of a colonization scheme in a wholesale way. They are endeavoring to locate low. Chas. Strang, Druggest.

priced properties which can be sold to bands of settlers in the thickly settled eastern centers who might be willing to come to this country, but who could not afford to pay the prevailing prices of higher priced farms ing lands. The Harriman interests are not intending to purchase outin the recent blizzard at 900,000, which have been heretofore agreed An expedition is to be sent out upon. Is everywhere recognized as the one remedy that can always be depended apon and that is pleasant to take. It sespecially valuable for summer disrebasin children and is undoubtedly the means of saving the lives of a great many children each year. For sale by Chas, Strang.

FAMOUS CYCLIST MEETS DEATH IN AN ACCIDENT

D. Elkes of Glens Falls, N. Y., the premier motor-pace follower of the United States, was killed, and Will Stinson, almost as well known a bl cyclist as Elkes, and F. A. Gately, a motor steersman, were seriously injured in an accident at the initial bi-cycle meeting on the new Charles River park track. The accident occurred in the first

lap of the sixteenth mile of a motor paced race, and was due to the burst ing of the rear tire on Elkes' wheel at a point where the track bank is at an angle of about 33 degrees. Elker tried to ston his machine and in doing so was thrown over the handlebarr turning a complete somersault, and with his wheel rolled down the steer embankment in front of Stinson's motor, which was manned by Gately.

The heavy motor struck Elkes throwing Gately and the machine completely over him, and Stinson, who was following, crashed it to the wreck At the time of the accident Elker for his traveler to circumnavigate well in the lead having my world's records for the five, ten and Siteen miles. The injured men were picked up and sent to the hospital, Eikes dying on the way.

Cuts, Bruises and Burns Quickly Healed.

Chamberlain's Pain Balm is an anti-septic liniment, and when applied to cuts, bruises and burns, causes them to heat without maturation and much more quickly than by the usual treat-ment. For sale by Chas. Strang.

An Answer For Gough

John B. Gough, the famous temper ance writer, was once in a New England town lecturing and after painting the tavern as a place of contamination even for the abstaluer asked:
"Don't you all agree with me, friends

that there is no place a man should go and of which he should tell his mother and sisters unless he might take them too there? Should there be any such

"Oh, y-e-s!" came drawlingly from

mar seat.
The audience was aroused from its spell of admiration for the orator and turned to look at the voice in the rear. Gough smiled as though he thought no discussion possible and blandly asked "Where, friend, would you go telling mother and sisters, but refusing to take

A. S. BLITON Subscribed and sworn to before me this 21st day of July, 1902 F. M. STEWART Near, Public Near, Public

TOPEKA, June 1 .- O ie of the most tragic sights in the flooded quarter was the unhappy plight of Mrs. Anderson, who, with a baby in her arms, clung for three days to a tree standing in the midst of the boiling waters. Hundreds of people could see her from the shore, but were powerless to bring her off. She had braced herself in the fork of the tree so that she managed to hold on for days, but in the end, when rescue was near, overcome by exposure, she lost conscioueness and dropped into the flood. Neither mother nor child were seen again. Eighty-five people are penned up by the flood on the Page elevator and have been three days without food. Efforts were made yesterday to send them two boatloads of provisions, but the boats were unable to stem the current. The Rev. A. N. Pearson, who was rescued yesterday, spent three days on the top of his house, with his wife and family. In that time they had but two loaves of bread among four persons. Nearly a hundred people ook refuge in the B-street Colored Baptist Churc's, where they were compelled to stand in the water. It is feared that many of them have died from hunger and exposure, but by hard and risky work some 500 pounds of provisions was got into the building yesterdsy.

Girdling Earth With Gingham.

rom National Magazine. Some conception of the rate of production of the ginghams, sheetings and other textiles for which Manchester, New Hampshire, is famous, may perhaps be gained by an illustration. If the output of its factories were sewed together, as produced, into a single continuous piece and its end were attached to the stern of a departing "ten-days" trans-Atlantic liner, Manchester's busy looms and spindles and its inteen thousand skilled operatives could "pay out" the cloth as fast as called for. Manchester could make a cotton girdle to encircle the earth at the equator in over a week less time than the eighty days which

EX-POSTMASTER GENERAL

it. Its daily output is 350 miles.

Jules Verne imagined as requisite

Washington June in—Postmaster General Payne today made public the reply of former, Postmaster General charles Emory Smith to the charges of former Cashier Tolloch of the Washington City postoffice regarding the postal administration. Smith says he investigated the allegations of irregularities when they were made and that the evidence adduced in most cases was believed to be a justification of the transactions complained of, adding that the criticisms he-trayed a lack of knowledge of conditions incident to the Spanish war and the measures necessary to meet the requirements.
