Notwithstanding the reports that fish can't get over the Ray dam, there are more salmon being caught around the Bybee bridge than at any time in the ten years we have lived here.

There is more catarrh in this section of the country than all other diseases put together, and until the last four years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. CHENEY & CO., Toledo, Ohio. Take Hall's Family Pills for constipation.

**RARE JUNGLE BEASTS.**

All the Wonders of the Creation Are to Be Found in Ringling Brothers' Big Zoo.

The most valuable collection of wild animals in the world is the menagerie feature of Ringling Brothers' show, the largest circus organization of all time. Among the odd creatures, no where else to be seen, and above price, are two giraffes, the last of their tribe; the only rhinoceros in captivity; the almost extinct gnu, or horned horse; a real baby elephant, American born, standing no higher than its mother's knees, and the only one ever bred, born and reared in captivity; and a gigantic troop of forty elephants, the largest company ever shown under canvas, and more than twice as many as are with any other show in America. In this price-less collection of odd animal creatures the specimens are all perfect types, and 108 cages, lairs and dens are required to carry them. The big menagerie tent is the largest ever made for a circus, and so big that an army of 5,000 men could be easily maneuvered within its walls. Naturalists and explorers of fame positively pronounce this menagerie the rarest, largest and most valuable in existence. Frequently colleges and schools are closed so that students may have the privilege of inspecting this wonderful exhibition of wild animal life. One may practically make a tour of the world in the time devoted to the study of this immense zoological display and never again will an opportunity present itself of seeing a great many animals almost extinct. The horse exhibition of the Ringling Brothers' World's Greatest Shows is another surpassing feature that separates this marvelous show from all others. There are 675 horses with the big enterprise, over two hundred of which are performing animals of blue blooded pedigree. The capital invested in this department of the World's Greatest Shows is enormous and beyond the reach of the promoters of other exhibitions. The vastness of the different departments of the Ringling Brothers' great shows indicate the spirit of progression which has always characterized their policy.

The big show will be here one day only, Saturday, September 31, and give two performances, at 2 o'clock and 8 o'clock. Admission tickets and numbered reserved seats may be purchased on circus day at the same price as charged on the show grounds at Haskin's Drug Store.

**First Class Educational Institution.**  
Southern Oregon is boasting of a first class educational institution. The teaching fraternity throughout the state are speaking in highest praise of the opportunities offered and the work done in the State Normal School located at Ashland. New buildings, new apparatus, a new system of water works, a large faculty composed of specialists in their several lines, a large appropriation from the state for maintenance, all speak for the recognized merit of the school. The department of education and oratory, and the department of music, both vocal and instrumental, last year reached a high degree of usefulness, and a large number of pupils were enrolled in these departments. The school has three good pianos, and an experienced

instructor of instrumental music, and also of vocal music.

Manual training, school gardening, and a kindergarten are among the important features of the coming year. The moral and social environment of Ashland are of the best. The health conditions are such as to enable the pupil to do a maximum amount of work with a minimum of outlay of energy and time.

Last year 283 pupils were enrolled in all departments. A greater attendance for next year is already assured. School opens September 14th. Catalogues are cheerfully sent on application to the President.
