Needs to be Shown.

A Missourian, who, according to a l reports, really needs to be "shown" is Representative-elect W. T. Tyndall, one of the nine Republicans who were carried along by the Roosevelt high tide in that state last November, and who has arrived in Washington to learn the ropes. Tyndall is a typical mountaineer, tall and straight as a pine and unused to the ways of large cities. Prior to his election to congress he had never ridden on a street ear, and to him an elevator exists oncar, and to him an elevator exists on-ly in newspapers. Tyndall comes from Sparta, Taney county. That county never heard the scream of a locomotive. It abounds with mountain peaks and razor-back hogs. It s in the midst of the Ozark district, and there Tyndall taught school for years before the political fever struck him. No Republican sought the nomination in Ozark district last fall, and the party, in despair, finally turned to Tyndal, who accepted, it, as he himself says, because he did not feel like spending a 2-cent stamp o decline it

NATURALIZED TOO EASILY.

Subjects of Foreign Governments Be come Citizens Fraudulently. Whahington, March 11.—The special commission created by the president to consider the subject of naturaliza-tion will, it is expected, be prepared to minut tion will, it is expected, be proposed submit to congress at the next regular session a full report upon this im-portant subject. The president has shown a lively interest in the matter, not only having before him reports of federal officers containing many speci-fic instances of gross fraud and error in connection with the application of the naturalization laws, but having himself, while connected with the mu-nicipal government of New York city, noted many of these evils. Besides internal fraud, the insufficiency of the existing naturalization laws has in-volved the state department in endless controversies with Europe growing out of a doubtful naturalization. Galllard Hunt, the present chief of the passport bureau of the state department, who will be the chairman of the new commission, has given much study to this subject and his report thereon has been laid before congress. It reveals an amazing number of cases It reveals an amazing number of cases of false, fraudulent, improper and improvident naturalizations and a whole-some forgory and sale of gaurious certificates, particularly in the case of those issued to italian and Haytien subjects. Some of the questions which are likely to come before the commission are these:

The propriety of restricting closely to certain courts the right to natural-ize. A particular definition of the testimony necessary to secure naturalization. The advisability of printing cer-tificates on distinctive paper to pre-vent counterfelting and to separate certificates of intention from the final cortificates. The advisability of re-quiring in the cortificates a statement of birth and of date of arrival in this country of holder and finally the propriety of requiring returns at stated periods to the general government of all naturalization and declarations of intention to become citizens.
