

OUR COUNTY . . .

Correspondents

Eagle Point Eaglets.

BY A. C. HOWLETT.

Wm. Nicholson and family camped here last Monday night on their way to Klamath county.

Mrs. Elizabeth Simon, who has been visiting friends in Medford, is now the guest of Mr. and Mrs. John Hader.

Mrs. Ora Bellows moved, the first of the week, to the Lee sawmill, to join her husband, who is working for Mr. Lee on the lumber yard. Mr. Owings did the transfer work.

David Cingadeo is building a new barn on his place, so that he will not have to stack his hay out and let it spoil in the winter. John Miller is doing the carpenter work.

Your scribe has been afflicted with granulated sore eyes during the last week, so that he was confined to the house and could neither read or write, and now can hardly see to write as I would like to.

J. A. Abbott and family started last week for an outing in the Rogue river mountains, where they expect to spend a few weeks and then proceed on their way across the divide via Crater lake and spend the summer in Klamath county.

Mr. Aikon, of Prospect, stopped with us last Saturday night, on his way home. He reports that the way across the mountains is so that several teams have already passed over the route and that there is but little snow to contend with.

Died—At Meed, Washington, June 25, 1905, Mrs. Ida Bell Winkle (nee Mayham); aged thirty-three years, eleven months and seven days. She leaves a husband, four children, mother, father, four sisters and two brothers and a number of friends to mourn her loss.

Dr. J. S. Pierce, son, Floyd, and wife and daughter, Miss Gladys Pierce, came over from Forest creek last Monday, to visit Mrs. Floyd Pierce's parents and while here Mr. P., the elder, is looking around with an eye to purchasing property in this section.

There was a school entertainment at the Yankee creek school house last Friday night. Miss Bertha Poncey, the teacher, and those who attended report having a fine time. After the exercises were over the young folk spent a few hours in "tripping the light fantastic toe."

Mrs. Valina Cunningham, (nee Williscroft) her two children and her little brother arrived at the Sunny Side hotel last Monday. She came out to visit her father and a large circle of friends, who gave her a cordial welcome. After the death of her mother, she with the rest of the children went back to their old home in North Dakota, where her sister and husband, Mr. Parliament, resided and now returns to meet her old friends and schoolmates. She will remain in this neighborhood for a few days on account of having the measles in the family where her father is now living on Trail creek.

On Monday last week, your Eagle Point scribe took a trip to the Lee & Healy sawmill, to take provisions, etc., for the company. Found everybody busy and the mill doing fine work, cutting about 12,000 feet of lumber a day. The head Sawyer told me that he could easily cut 20,000 feet per day in twenty-four hours.

While I was there the deal was about consumed, whereby Mr. Healy sold his interests in the mill and surrounding to his partner, Mr. Lee, and Mr. Lee proposes to cut and stack his lumber, so that this fall he will have a good supply on hand. Mr. H. has interests on Elk creek, where he will turn his attention. Particulars later.

Last Monday, June 23rd, our new doctor was called to the home of David Pence, of Elk creek, and your Eagle Point correspondent accompanied him, or rather drove the team to take him. We found the roads in a very good condition, consisting of the nature of the country we had to go over. When we reached the place we found a new girl baby, weighing thirteen pounds. The doctor made the mother as comfortable as possible and after partaking of a good dinner started on our return trip, reaching home at 5 o'clock p. m. While there he gave me a bunch of alfalfa for exhibition, measuring over five feet in length and a bunch of native grass that measures seven feet which were raised on his place, on Elk creek. There is not much farming land in the immediate neighborhood, but what little there is is remarkably productive.

Three Physicians Treated Him Without Success.

W. L. Yancy, Paducah, Ky., writes: "I had a severe case of kidney disease and three of the best physicians in Kentucky treated me without success. I then took Foley's Kidney Cure. The first bottle gave immediate relief, and three bottles cured me permanently. I gladly recommend this wonderful remedy." For sale at the Medford Pharmacy.

Kanes Creek Items.

Herman Staunger, who has been at-

tending the Lewis and Clark fair at Portland, has returned home.

Mrs. Roten, who has been the guest of her daughter at Fort Jones for the past two months, has returned.

Ada Swinden has returned home from Tofo, where she has been staying with Mrs. Adams for the past two months.

Elmer Nichols has the hay bales at his place this week and when done he will have something like 200 tons of baled hay.

Ed. Miner, Jr., who has been the guest of his parents here for several days, has returned to his home in San Francisco.

Henry Nutt and John Marden have returned home from Prospect for a few days, where they have employment for the summer.

School meeting was held at the Dardanelles school house on the 19th. Officers elected were: clerk, M. Foley; director, Anna Higginbotham; for a term of three years. Miss Edith Dugony closed a very successful term of four months on the 23d. Much credit is due Edith as an instructor.

Have You a Cough?

A dose of Ballard's Horehound Syrup will relieve it. Have you a cold? A dose of Horehound at bedtime and frequent small doses of Horehound Syrup during the day will cure it. Try it for whooping cough, for asthma, for consumption, for bronchitis. Mrs. J. M. McGrath, 327 E. 1st street, Hutchinson, Kan., writes: "I have used Ballard's Horehound Syrup in my family for 5 years, and find it the best and most palatable medicine I ever used." 25c, 50c, \$1.00. Sold by Chas. Strang.

Missed the Mark.

Mr. McDougall was a Scotsman, and of him a good story is told. He was a large, pompous man, intolerably self conceited and arrogant—in fact, his conduct toward his neighbors was so offensive that the good people successfully requested their minister to preach a sermon directed at their vain neighbor.

The day came. The little kirk was packed, though a few tender hearted ones stayed at home, not wishing to witness their neighbor's humiliation.

The sermon began, and Mr. McDougall disposed himself to listen. The man's infirmity was sketched with bold, severe strokes. He smiled with lofty superiority. As the denunciation grew more scathing his smile deepened with a touch of complacent pity.

At the conclusion of the service he swaggered down the aisle. One of the officers joined him.

"Well, what did ye think of the sermon?" the latter ventured to ask.

"A great effort, sir," was the answer. "but personal. The minister aimed his shots too directly. Poor MacTavish! I felt sorry for him, but the man's conceit is enormous, sir!"

Kindness of an Ostrich.

During an exceptionally heavy tropical rain in Durban two ducks of the common half bred native and Bombay variety got washed in the flood down the Umgeni river, which flows through the town gardens. The ducks both got entangled in the barbed wire and wire netting which crosses from bank to bank. One managed, by much jangling of wings, to extricate itself; the other seemed, however, to be on the point of drowning when a large ostrich stalked out of the bush and waded into the river, lifted it bodily out of the water and carried it ashore by one wing.

The duck was not badly hurt, but its rescuer was severely torn on his thigh muscles by the barbed wire. The incident is all the more remarkable, as the ostrich, with rare exceptions, buries its head in the sand during a storm and will starve to death sooner than move.

Smoking in a Powder Magazine.

Is courting death more suddenly but not more surely than neglecting kidney disorders. Foley's Kidney cure will cure a slight disorder in a few days and its continued use will cure the most obstinate cases. It has cured many people of Bright's disease and diabetes who were thought to be incurable. If you have kidney or bladder trouble, commence taking Foley's Kidney Cure today, before it is too late. Sold by Medford Pharmacy.

Queer Ways of the Toad.

Paternal affection is not perhaps the prebit emotion that we should be disposed to look for in the cold blooded frog, but the Surinam toad appears to exhibit this praiseworthy attitude of mind toward his numerous progeny. When his mate lays her eggs the solicitous father places them carefully upon her back, where in due time their presence causes an irritation that produces numerous small holes, into which the eggs forthwith drop. In these cells, which from natural pressure get to be hexagonal, like honeycomb, the young frogs are finally hatched and for a bit scramble about their mother's back, hiding in their nurseries when danger threatens.

The Sea Anemone.

The sea anemone resembles in shape a morning glory. Its mouth opens like the cup of that flower, and above it are seen a number of tentacles waving in the water. Its food consists of anything it can get, but generally it gets the minute insects that float in the sea. At any alarm it closes its cup and is then hardly distinguishable from the rock on which it is rooted. It has a set of sucker muscles that attach it so firmly to the rock that it will sometimes be torn in pieces rather than let go.

One Bird Barred.

"Can we keep birds?" inquired Mr. Youngusband, who was looking at the flat.

"Well, you can keep canaries and such birds as them," replied the genial landlord, "but there's one bird barred from these apartments."

"What bird is that?"

"Lousville Courier-Journal.

Scholarly Versos.

On the campus of Emory college, in Oxford, Ga., there is a table to the memory of Ignatius Few, the first president. One day a freshman was crossing the campus with his cousin, who asked him to explain the inscription on the stone.

"Virtu non mortuus est," she read slowly. "What does that mean, Will?"

"That," said the freshman sadly, "oh, that means, 'He lives—no, he don't, he's dead.'"

SUNBEAM AND HER OWNER.

Lord Brassey and His Achievements on Land and Sea.

One of the best known of the yachts which sailed from Sandy Hook on May 17 in the international contest for the Kaiser's cup was the Sunbeam, owned by the famous British yachtsman, Lord Thomas Brassey. He has been fifty years a yachtsman, has owned the Sunbeam thirty-four years and has sailed 800,000 miles in her, a distance equal to twelve times around the globe. After thirty-four years of continuous service the Sunbeam is today as sound as a nut and is rated high in Lloyd's, her iron frames and tank plank are the same that were shaped into her hull thirty-four years ago and there has been little change in her topwork. Lord Brassey, who is the dean of the yachting fraternity, is in his seventieth year and is as well preserved as his yacht. His career has been a very active one on both land and sea. His title is not inherited, but was conferred on him in recognition of his great service in the upbuilding of the British navy and the British maritime industry. He has written

several works of importance, including one on the wage question, which was highly commended by Gladstone.

In 1870 Lord Brassey and his family circumnavigated the globe on their yacht, and the late Lady Brassey wrote an account of the voyage, which was highly entertaining and has been translated into seven languages. She could herself navigate the Sunbeam in tempestuous seas and met death on the ocean in 1887 on a voyage from Ceylon to Australia. Lord Brassey married again in 1890. The present Lady Brassey is talented as a sculptor.

Lord Brassey's father was plain Thomas Brassey, a railroad contractor, who was poor in his youth, but died very rich. There is a story that he was one day almost starving in the streets of Liverpool when a girl who was selling matches, seeing his distress, loaned him a penny to buy a loaf of bread. Her kindness touched the boy's heart, and he registered an oath to marry her, a vow which he kept in after years.

SENATOR ELECT BRANDEGEE.

Congressman Who Takes the Late Senator O. H. Platt's Seat.

Connecticut, though a small state, has a reputation for furnishing some of the ablest members of the lawmaking body at Washington. Senator Joseph R. Hawley and Orville H. Platt were veteran statesmen whose familiarity with national affairs had made

them useful to the nation as a whole for the past quarter of a century. They died within a few months of each other, and their places have now been filled, ex-Governor Morgan G. Bulkeley of Hartford taking the late Senator Hawley's seat and Congressman Frank Bosworth Brandegee of New London having been chosen a few days ago to the seat of the late Senator Platt. Representative Brandegee was elected to the Fifty-seventh congress to fill a vacancy and made so good a record that he was twice re-elected. He is considered a brilliant orator, and it is predicted that he will be heard from in the upper branch of congress.

The senator was born in New London July 8, 1834, and distinguished himself while at Yale, from which he graduated in 1855, by his high standing both in scholarship and in athletics. He rowed in the varsity crew as bow oar. He was admitted to the bar in 1858 and has practiced his profession in New London since that year.

Special Pins for Insect Collectors.

"Much care," said a taxidermist, "has to be taken in selecting the long pins used in fastening the specimens in insect collections. For cheap collections of butterflies and bugs we use the ordinary brass pins mostly, but every one of these must be carefully examined before impaling the insect to see that it is well tinned, for were the tin coating imperfect or the slightest flaw evident it would be in nine cases out of ten liable to oxidize in the body of the insect and thus destroy it. We also use black varnished pins, but who are almost as bad, for the glazed coating soon cracks, leaving the metal exposed, and consequently it is not very long before oxidation sets in. Even the more expensive kind, the nickel plated pins, are not much better. The latest things we have now are solid silver pins and bronze pins, and there is being used as an experiment a nickel and aluminum alloy, which possesses decided advantages over all the other kinds used."
