The Double Front Grocer

—Rev. G. L. Hall arrived in Medford last week from Pendleton, Oregon, and presided at the Baptist church last Sunday, morning and evening, to a large and appreciative audience. The reverend gentleman has been called to the Medford charge and in August or September he will take up his permanent residence here. He will preach in Medford the next two Sundays and will then return to Pendleton and pack his household effects preparatory to moving here with his family after they have taken their summer vacation. Mr. Hall is a young man, a native of Pennsylvania, in the cities of which state he received his college education. Later he entered a theological seminary at Rochester, New York, from which he graduated. He has been six and one-half years in the ministry, the first three and a half years of which was at Clyde, New York, a city of no small importance in that part of the grand old Empire state. Incidentally we might say right here that Rev. Hall's preaching field, outside of his pulpit in Clyde, was in the little red school house where the publisher of The Mail took his first "padding" over the recitation bench. The meeting with Rev. Hall, when this bit of information was made known at one of our socials, was a link of friendship which we hope, prove lasting. Mr. Hall is an earnest and faithful worker in his chosen field and his coming to Medford cannot fail to be fruitful of good results to his church and the community generally. A remarkable fact connected with Rev. Hall's education preparatory to entering the ministry is that during vacation times he was a traveling salesman. By this work he was enabled to complete his education, and having worked his way through the several colleges the acquired education is especially dear to him.

—The Fish Lake Ditch Company are now considering the advisability of extending their ditch to points in the vicinity of Phoenix. Should they extend that far south and cross the railroad at a point near the town water can be taken from it to irrigate a vast territory of orchard and alfalfa land. While it is not absolutely necessary that these lands be irrigated, the water, applied properly, and timely, materially increases the quality of the products.

—Ask a member of Tallman Lodge K. of P. what kind of a time he had Monday night, and a beaming smile o'erspreads his countenance as he informs you that it was the best ever, the banquet the best they ever had, and some where in the story he will hand a few bouquets to Brother Ebert, who had charge of the spread. Messrs. Woods and Perry were also on the committee, but were unavoidably absent. The banquet wasn't the only thing that happened that night. Before the banquet some degree work was gone through, which had the effect of heightening the appreciation of all the boys for the good things provided, especially the candidate.

—The Medford Ice and Storage Company came out Tuesday morning with a wonderfully pretty and very substantial ice wagon, and that day it made its first delivery of ice about the city. Until the plant here is in operation ice will be shipped from Ashland, and for the present the retail price will be eighty cents per hundred but when the plant is in operation here this price it is expected will be reduced to some extent. It is really surprising the number of people who have been waiting and watching for this company's wagon to appear on our streets. The ice is said to be a first class article and it is giving general satisfaction. Charlie Talent is the driver—and a better choice could not have been made. Pretty nearly everybody knows him—and they all like him.
