Mr. Lawton on Water of Wason Creek

D. T. Lawton, who has made an inspection of the territory from which the city council proposes securing water for city purposes, is enthusiastic over the prospect and has asked The Mail to give its readers his opinion in talking with Mr. Lawton upon this matter he said in substance this:—

"Why, Mr. Bliton, I have traversed Wason creek from very near its head and I am going to say to you that the water is as clear, cold and sparkling as any I ever saw or drank. It is in my opinion the best source of water supply in Southern Oregon today. When Medford people get to using that water, if they should be so fortunate, there will never be a question as to its quality and the quantity. I was up there last October and there was a good supply of water there then. Portland people boast of and boom their city on their pure Bull Run water. I would like to see Medford in a position to boast with Wason creek spring water as one of the favors with which to boast."

Store Methods

Pa was reading in a book of finance the other evening, where it said, "Don't put all your eggs in one basket; try an incubator." It takes more than an incubator to hatch out any new schemes for increasing business now-a-days. I tell you the people are getting to be wise old owls. My boss used to go into all kinds of gift enterprises that looked anywhere near right, and give away valuable premiums with every purchase. We don't do that any more excepting a few coupons that the manufacturers put up in their packages. The only scheme we use to make people buy goods of us is good goods, courteous treatment and your money back if you want it without any back talk. The boss says, "We've been giving the people better and better values every year, but we want to give still better values. It is not how much will an article bring, but how low can we sell it." You trade with us, don't you?
