STEAL MAIL SACKS.

London Reports a $500,000 Robbery in New York.

London, April 27.—The postal authorities have learned that two bags of mail from this city, containing valuables worth $500,000, were stolen in New York the latter part of last month.

According to reports received here, the bags were destined to St. Louis and were shipped by the Majestic, which arrived in New York March 26; the other, destined to Brooklyn, were shipped by the Aquilla, which arrived at New York March 29. Efforts are being made to keep the matter a secret for the present.

General Linevitch Is Dead.

St. Petersburg, April 27.—Lieutenant General Linevitch, aide-de-camp to Emperor Nicholas and commander of the First Manchurian army, died from pneumonia Thursday night. He had been ill for a little over a week and on several occasions serious symptoms of heart failure had manifested themselves. On Tuesday he had a serious attack of heart failure, from which he recovered sufficiently, but it was found necessary to perform an operation, after which the patient gradually sank.

Klamath County News.

Klamath Falls Republican:

Already a freight agent has been stationed at Dorris with his headquarters in a box car. He arrived at his new station Tuesday and from now on all freight will be sent to that point. One carload of freight for Klamath Falls was marked Bray, but not unloaded and will be brought on to Dorris at once. While no regular train service will be established at once all freight will be brought on to the new terminal. Capt. McIntire is now at Dorris arranging for the handling of freight.

Archie Mason and A. L. Lambert arrived from Portland Thursday evening. Both of these gentlemen are connected with Mason, Davis & Co., and their visit is in connection with the claims the company has against the Reclamation Service for excess work done while contractors on the government canal. No disposition has yet been made of these claims and a decided effort is now being mad to secure a settlement.

The people of the Upper Prospect are now signing up their lands, and it is very probable that if the bids, either one of them, should be satisfactory that actual construction work may be begun on the Clear Lake Dam this year. A decided effort is being made to get all land owners to sign up at once so that the delay will not be the fault of the peope, if any delay should follow. Several parties have recently visited the parties who have not signed their lands for government irrigation and chances are that the required percentage will be secured within a few weeks. The local Reclamation office has been advised that but two bids were received on the Clear Lake Dam. The work is divided into two schedules, the first being the dam proper and the second the dike at the lower end of the lake. The bids received were as follows: Mahoney Bros., of San Francisco, schedule 1, $84,950, schedule 2, $30,820, total, $115,770 Maney Bros., of Winnemucca, Nev., schedule 1, $157,045, schedule 2, $31,330, total, $188,980. The contractor bidding on this work are the same that bid on the South Branch canal. Maney Bros., were the lowest bidders on that contract, while the other contractors are the lowest bidders in this case. The bids on the South branch are still in the hands of the secretary of the interior awaiting his action. The bids on the Clear Lake Dam will also be submitted to the Secretary for final action.

Bad Attack of Dysentery Cured.

"An honored citizen of this town was suffering from a severe attack of dysentery. He told a friend if he could obtain a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy, he felt confident of being cured, he having used this remedy in the West. He was told that I kept it in stock and lost no time in obtaining it, and was promptly cured," says M. J. Leach, druggist of Wolcott, Vt. For sale by Chas Strang.

Value of Wood Pulp.

More than 3½ million tons of wood were made into pulp during the last year. Most of this was converted into paper, and of the paper the greater proportion was used for printing books and newspapers. The supremacy of the United States in using the greatest amount of reading matter per capita is maintained at the cost of an enormous drain upon the forests.

Yet besides paper there are a number of other special uses to which the great quantity of wood-pulp was put. From pulp factories it went to the establishments where it was made into a number of different articles of very diverse use. Among these articles is the water pail made of wood fiber which is now a more familiar sight than the one made of actual wood. In addition to pails, wood-pulp is used in our homes in the form of basins, dishes, boxes, and picture frames. The use of wood-pulp for car wheels has long been known, but a new use reported from Germany is that for telegraph poles. Articles of wood-pulp have considerable bearing on electrical industries as in the case of conduits and insulators in various forms. Americans now use wood-pulp steam and water pipes, shoe heels, horseshoes, spools, tool handles, buttons, pulleys, paving blocks, and coffins paper—or wood-pulp—surgeon splints have many advantages over other materials, in their lightness strength, and flexibility. Perhaps the most unique use for paper-pulp is for observatory domes. Here again its lightness, strength, and flexibility commend it, and in addition it has none of the disadvantages which arise from the use of metalic substance near to sensitized instruments.
