

TENDER FEET

LADIES usually have tender feet. They wish a stylish shoe and usually buy one, very often sacrificing comfort on the altar of appearance, for a comfortable shoe is seldom attractive. Realizing this, John Kelly set to work to produce a shoe combining the highest style and greatest comfort. After years of effort he has succeeded as never shoe maker did before.

While we make less money on them than some others we have selected the "Honest John Kelleys" shoe as our leader in Ladies Footwear. In Oxfords they are great bargains at

The old style of **DOUBLE SIGHT** glasses do not look as well, and there is always a dirty line separating the far sight from the near. The **BI-SIGHT BIFOCAL** is ground from **ONE** piece of glass. The difference between the two is illustrated in the cut below. There is no piece simply cemented on to the main glass to work loose in a few months, and when you wipe them they are clean, and no one knows that you are old enough to be compelled to wear double-sight glasses, because they cannot tell them from the kind of glasses worn by young people.

Bi-sight Bifocals are the nearest to one's natural sight of any glass made today. The patent on these bi-sight bifocal glasses was issued August 6, 1906, so they are the newest and most up-to-date glass obtainable.

Fitted and sold by Dr. J. G. Goble, Medford.

The new style. There is no dividing line. The old style bifocal. Notice dividing line.

Samples to be seen at Dr. Goble's Optical Parlor.
