OUR COUNTY Correspondents

EAGLE POINT EAGLETS.
(By A. C. Howlett.)

Arthur Smith came over to our place to see his brothers, Leon and Ed, last Monday.

A. C. Howlett will preach in East Falls next Sunday, at 11 o'clock a.m. and 8 p. m.

J. A. Jones has had the carpenters making some improvements on his premises.

At this writing, John Watkins has the carpenters at work putting a neat porch on the front of his house.

I should have mentioned in my last correspondence that Mrs. Dr. Holt had returned from her visit with relatives in San Francisco, but it slipped my mind.

Mr. Jordan, the man who bought the Cook property here, is planning to build a new house this fall. He has had Warmley and Son to draw a plan of the house.

Misses Zoe Redden, of Fresno, Cal., and Bernice Carder, of Medford, were pleasant callers at the Sunnyside, Tuesday morning, on their way to visit Miss Jose Riley.

Frank Brown has had three large windows put in his house, greatly improving the looks of the place. Also he had James Klinger do the painting act.

There was quite a number of our townspeople went to Ashland to attend the Chatauqua, but I have not heard of their return, but know that they will have a fine time.

E. S. Bouce and Mr. Grover of the Unserviced, have taken the contract to build the Dr. Holt house in Eagle Point, and are at work on it, pushing the work as fast as possible.

Judge S. S. Pense, of Butte Falls, and Mr. Mahoney came out from Medford last Monday night on their way to Butte Falls with a load of cement for the new school house.

G. W. Skeen, of Eugene, an employe of the S. P. R. R. Co., stopped with us two nights last week, going from here to several different points where he had business.

Mrs. Arylee Green of Oxnard, Cal., and her son, Fred, a stenographer in the S. P. R. R. office in San Francisco, are here on a visit with her parents, Mr. and Mrs. J. J. Foyer.

Rev. M. C. Davis came over to Eagle Point last Saturday eve, but I was not at home, but in a letter he says he will preach in Eagle Point

the next time he comes out south. He is a very busy man.

Warmley & Son have been putting in some more doors in our school house and changing those that were in so that they will swing outward instead of inward as they have been, so in case of fire there would be less danger to the children.

Last Monday E. H. Jemmy came out to the Sunnyside and on Tuesday he was joined by S. E. Mormon and Mr. Perkins and Claude Metz, a company of surveyors who are here surveying for different parties. They expect to commence on the place Mr. Haak bought of R. J. Brown.

W. L. Denton, A. E. Moor, James Rummel and Aaron Wyland called at the Sunnyside for dinner last Monday, on their way home. They had been, via the Pelican Bay route, to Fort Klammath, Crater Lake, etc., and were on their way home to Medford. They report the road in fine condition from here to Crater Lake by the Rogue River route.

Last Monday Mr. C. F. Cook, traveling salesman for the Russellville nursery, called on us for dinner.

Last Saturday eve, Mrs. Arylee Green gave a party to the young folk of our town so that they all could meet and be met by her sons, Fred and Austin. Fred was on his way back to San Francisco. He had a lay-off for a fortnight and took a trip to Salt Lake City, Ogden, Portland, Ore., and stopped off to see his mother, brother, grandparents and old time friends, of which he has a host in these parts.

There were two gentlemen from Medford came out last Saturday, and wanted to go to the Tom Fredenburg place, on Big Butte, to fish and have a good time, and so I took them up Saturday night and returned to John Allen's that night and preached for the people of Derby on Sunday. They have a nice Sunday school organized there. The hay crop in that section is very good considering the backward season.

On Thursday of last week, the news reached us that the Round Top sawmill had been burned and about 250,000 feet of lumber and Mr. Iseli's barn. With no insurance the loss falls heavy on the three owners of the mill although they have the satisfaction of knowing that they are out of debt. It is not only a severe calamity on the owners of the mill, but it is felt in the valley, for it was the nearest and best place to get lumber, and the straight and honorable way they have of doing business has made them many warm friends in these parts.

We came near having to record another fire in Eagle Point. Last week as Miss Mabel Warmley was cleaning up a room in her home, she

had occasion to move a commode and in rolling it out of one of the rollers ran over a match unnoticed by her. As she was at work she smelled cotton burning and looking around discovered that there was a hole burned in the carpet and all that saved the house was her staying there a few minutes longer than she expected.

A few of Mrs. Howlett's neighbors came in on her one day last week and assisted her in sewing her carpet together for her rooms in the Sunnyside Hotel. They were: Mesdames Dr. Holt, S. B. Holmes, J. H. Carlton, S. H. Harnish, James Gordon-Walker; Miss Dollie Harnish and Miss Lorine Walker. And later in the evening Mesdames Aggie Green, Cora Officer, Gladys Pierce and the Misses Lottie Taylor, Anna Little and Lorraine Ulrich came in to help but the work was all done. Cake and strawberries were served and after spending awhile visiting and having a good time the company dispersed to their homes, feeling that they had had a very pleasant time.

SPEAKS OF OUR ROADS.

John F. Campbell, a prominent civil and mining engineer of Kalgoolie, West Australia, is spending the summer in this section of the country looking over several mining propositions here. He is especially interested in the subject of good roads and states that he hopes there will be an improvement in the roads of Southern Oregon before a great while.

"We in Australia are in the throes of a mighty good-roads movement," said Mr. Campbell yesterday, "and I naturally am interested in the matter of good roads wherever I go. I understand that there was some agitation of this subject in this valley some time ago, and I trust that there will be a revival soon."

"In many ways I find conditions here in Oregon very similar to those in Australia, though of course our country is newer and not so fully developed. Road building in Australia is attracting much public attention; highways, many miles in length, are being constructed into districts which a few years ago were given up entirely to sheep grazing."

"We are using a foundation composed of nine inches of concrete, upon the top of which we lay a surface of hardwood blocks. You will understand that hardwood is much more plentiful with us than with you here, so the cost of the surfacing is not prohibitive."

"I must admit that the roads here have been a source of disappointment to me. In the mining districts of Australia we expect to put up with inconveniences, but such a paradise as Oregon should not be without good roads."

Mr. Campbell also spoke of another matter which may prove of interest to our farmers. He said:

"In Australia the dairy cow is queen. She has redeemed the country and hundreds of farmers, who lost nearly all they had by the drought of 1902, are now better off than they ever were, and it is all due to the cow. Australian butter ranks well up with the best butter in the world. The Danish butter is perhaps the best made, and next comes the New Zealand product, while Australian butter is a good third."

"Our butter making is all done by the co-operative creamery system. It has been years since the farmer made butter on the farm. We have little use for a dual-purpose cow in Australia. That is, the dairy farmer wants a cow that will give milk ten months in the year, and he uses it for no other purpose, while those who raise cattle for beef have no thought of milk production. The best dairy cow we find comes from crossing the Ayrshire and the Short-horn."

"There seems to be a lot of go in America, and I think I shall carry back a good impression of your country."

"Just now the politicians of New South Wales are in a tangle over the location of the site for the federal capital. Under the constitutional agreement, the capital must be located in New South Wales, but not in Sydney. The parliament of New South Wales has the decision of this matter, but the members who have it in charge cannot get together."

COMMERCIAL CLUB MEETING.

"Recall," "executive sessions," "water committee," "hired engineers," "Wasson canyon" and "council" were a few of the words called most frequently into use last evening at the regular meeting of the Commercial club, and thereby hangs a tale.

Editor Putman of the Tribune is anxious to know what the special water committee of the city council has been doing at the recent executive sessions held by them, and last evening he started in to find out. Councilman Merrick was the only member of the special water committee of the city council who was present, and upon him devolved the duty of telling the reasons why the committee held executive sessions. A great debate followed, which ended exactly where it started, after a discussion of nearly two hours.

Many members of the club discussed the matter. A member could see no reason why the matter should not be given publicity, and some thought that the water committee was right.

Mr. Merrick stated that he knew that the matter was one of public business, but that the committee could do more if they were left to themselves, thus closing deals as do busy firms, it being a bad policy to "hunt ducks with a brass band." He stated that if any one had not confided in the committee that they were entitled to start the recall and that he, for one, stood ready to resign when asked to.

Although much of the discussion was of a most unsatisfactory nature, still some light was shed among those present.

The meeting of the club was well attended, about 40 being present. The following bills were allowed and ordered paid: Medford Book store, \$2.20; rent, \$20; secretary's salary, \$100; William Garnett, \$10; R. R. Electric Co., \$1.75; Henderson-Ames Co., \$0.62; H. E. Boyden, \$4.50; Capital Abstract Co., \$2; Sunset, \$1.20; Pacific Monthly, \$87; A. S. Rosenbaum, \$41.60.

It was decided to sell booklets to John M. Sweeney at \$100 a thousand.

Guy Fabrick, L. M. Lyons and G. M. O'Brien were admitted to membership.

A communication was received from the committee in charge of the Rose festival in Portland, thanking the club for its assistance during the festival and asking for aid for next year.

The committee on the matter of having the road to Crater lake fixed reported that Judge Neil would lend his support towards having \$5,000 appropriated to put the road in shape.

Within a week or ten days the matter of cleaning up the city will be undertaken. The city is to be cleaned by sections, according to a plan mapped out by Chairman Welsh of the 2,000 club.

The Southern Pacific company agreed to park their right-of-way through the city, and will do so when they get the time. They also agree to keep the park in good shape.

John M. Root spoke on the matter of an incinerator and, though no vote was taken, it seemed to be the consensus of opinion at the club that such a plant should be installed by this city.

DECISION REVERSED.

SALEM, July 15.—In an opinion by Chief Justice Bean, the Supreme court today reversed the case of McKenna vs. the City of Portland, and upheld the amendment to the Portland charter, authorizing the issuance of bonds for enlarging the water system. The amendment was adopted by the people of Portland in June, 1907, the amendment having been submitted to a vote by the city council. This suit to enjoin the issuance of the bonds was brought upon the ground that the council had no authority to submit the question without an initiative petition. In the court below Judge J. B. Cleland held the amendment invalid. The Supreme court reverses this in one of the shortest and most direct opinions ever handed down in an important case.

As a result of this opinion the city of Portland will be permitted to expend on city utilities the sum of \$5,225,000, which was voted in 1907, and will be distributed as follows:

Additional pipe line to Bull Run, \$2,000,000; park and boulevard systems, \$1,000,000; public dock, \$500,000; new Madison street bridge, \$450,000; fireboat and water mains, \$275,000.

Finds Old Gun.

E. A. Eldred, Sr., who is in from Butte Falls, in the northern part of the county, brought in a curio in the shape of a muzzle-loading musket of ancient vintage found in the woods near Rancherie recently, where it evidently had been lying rusting for many years. Old residents of the region believe that the antiquated and weatherbeaten firearm is the identical one with which a man named Hards shot and killed a relative named Arnold many years ago, the find being made in the vicinity of where the crime occurred.—Tidings.

There will be a great many people that will be sorry they did not buy one of the five or ten acre tracts in Medford Heights.

WOOLEN MILL.

PORTLAND, Or., July 14.—The Oregonian tomorrow will say that the first textile manufacturing town on the Pacific coast will be established on the Columbia river, about 30 miles from Portland, by a company of eastern and Pacific coast capitalists, who will erect woolen mills and scouring plants to convert Pacific coast wools into blankets, fine cloths and other woolen products. The company, according to the Oregonian, controls one of the finest streams and water-power sites in the west. This is believed to be the first attempt ever made to establish a textile town west of the Mississippi.

OLYMPIC GAMES.

LONDON, July 15.—Gold medals went to Great Britain, France and Sweden as winners of the finals of today's events at the Olympic games. Great Britain was double a winner and France and Sweden each secured one first. The United States had to be satisfied with only a silver medal, symbolic of second place in the three-mile team race. The American representation in various events was, however, small. England won the 660-yard cycling race, and mile team race. France won the 2,000-meter tandem cycle race, and Lemming, for Sweden, threw the javelin 178 feet 7 1/2 inches. Greece, France and Great Britain each took a silver medal for second in javelin throwing, the 660-yard cycling and the 2,000-meter event, while Norway, Germany and Sweden took bronze medals in the same events.

NEARLY BEATEN TO DEATH.

MERLIN, Or., July 11.—Miss Emily G. Robinson, for 20 years a teacher in the Portland public schools, who has a mining location near Galice, was perhaps fatally beaten to death by unknown persons who broke into her cabin on Friday night. In addition to beating the woman, the assailant tied her hands and tore the clothes from her body. Miss Robinson is in a serious condition. The sheriff is at present running down a clew which he expects to end with the arrest of Miss Robinson's assailant.

The attack is believed to be the outgrowth of trouble over mining claims. Miss Robinson is in the neighborhood of 50 years of age. She has a brother connected with the Idaho university at Moscow.

BUILD NEW BARN.

Work was started yesterday to tear out the buildings for the large new store belonging to Deuel & Ketter. The Union livery stable is one of the buildings to go, and for the present temporary quarters have been arranged for one block south of the present location. Duncan & Koontz announce that they will erect a large new barn on the lot between A and B streets, south of the present location. The livery will be moved tomorrow.

There will be a great many people that will be sorry they did not buy one of the five or ten acre tracts in Medford Heights.

Don't be one of them.

—Automobile for sale for \$300—Runabout that cost \$550 for sale; thoroughly equipped with adometer, top, acetylene lights, etc. A. C. Allen, Medford. 29-17

Card of Thanks.

We desire to express our many thanks to our kind neighbors and friends who attended us in the sickness and death of little Ray. THOMAS N. COY and FAMILY.

Married.

The Morning Mail is in receipt of the announcement of the marriage at San Francisco of Marie Edna Otto, daughter of Mrs. Julia Otto, to Eugene J. Reinhart. Mr. Reinhart is an old-time Medford boy and his friends here will be glad of this opportunity to extend congratulations.

FIRST NATIONAL BANK DECLARES DIVIDEND

The First National bank yesterday declared its usual semi-annual dividend of 4 per cent. The bank continues in a most flourishing condition.

Bryan's nomination makes things look better for John A. Johnson in 1912.
