Arkansas has been fortunate in collecting fines from Standard Oil; but the state was wise in making only \$10,000 strikes.

Mr. Carnegie was in an automobile smashup recently. Great risk for a man who is too rich to sue a chauffeur for damages.

Even vice-presidential candidates go down to history, and history is accommodating, and may have standing room for them all.

The Chicago Tribune holds out little or no hope to the campaign poets of the Independence party. The name of Higson is unrhymable.

While Harry Shaw is not seriously ill, it is not believed he is devoting much time to studying summer resort folders this year.

The wealthy Omaha man who is reported to be living on \$75 a year may find that while his prospective heirs approve of his frugality, they have no intention of following his example.

The mortality among the married men must be dreadful in that town!—Exchange.

NOBLEMEN MADE COIN.
NEW HAVEN, Conn., Aug. 10.—Nine well dressed educated Italians, said to have been posing as noblemen here for some time, were arrested on a farm near Branchville. They were captured after a sensational raid by the sheriff and a dozen deputies.

Secret service men had had the "noblemen" under surveillance for some time. They had been spending money lavishly at summer resorts and were suspected of being counterfeiters. A detective reported last night that he had seen the men redivers at the farm house, and the officers went out there early today to make the arrest. The house was surrounded and the men rushed the place with their guns ready for action.

The Italians gave in without any resistance. A quantity of spurious money and a complete outfit for manufacturing American coin were found in the basement of the house.

STRIKERS ARE GETTING VIOLENT

WINNIPEG, Man., Aug. 11.—The first act of violence of the Canadian Pacific railroad strike occurred at midnight when almost all the windows of the coaches of a passenger train were broken by stones hurled by unknown persons in the St. Boniface yard, across Red river from here. No one was injured. Today 12 workmen who had begun work yesterday walked out of the yard, remarking to the strikers' pickets at the gates "that they did not propose to remain imprisoned like convicts."

With regard to an assertion that the present struggle is between the railroad and union leaders rather than the men, J. H. McVety said: "Such a statement is absurd. There was not time enough between the issuing of the arbitration commission award and the beginning of the strike for us to influence the men. Nor was any such attempt made. All that was submitted to the men was the question whether the men would accept or not. The vote for a strike was an absolutely spontaneous movement by the men themselves and they are sticking to it with practical unanimity."

Local strikers emphatically deny that the engineers' union will support them. The strikers say that in another week many of the trains will be unfit for the road.

At A Brandon, Man., where 200 men are out, the strike situation was given new life last evening when the company brought in from the East 21 men. A majority of them are expert mechanics and boiler-makers.

The railroad yards are patrolled at night by guards armed with rifles.

Hayes and William McKinley four years in the 23rd Ohio regiment, and have no ailment except chronic diarrhoea, which this remedy stops at once." For sale by Charles Strong.

Dietz, a Cleveland dentist, were in the touring car, but escaped injury.

Correct Glasses Correctly Fitted

Notice the difference in the way the rays of light pass through the OLD style lens and the new TORIC glass.

When looking through the TORIC lens you get the same vision clear out to the edge of the glass, in all directions, that you do ONLY through the center of the old-style of lens, thus giving you more freedom of vision without the strain upon the Rectus muscles, which constantly occurs when wearing the old-style glasses.

With the old-style before the eye you see like this. With the new TORIC lens you get the same results at all angles without turning your head that you do directly through the center of the old style.

Dr. Goble makes a specialty of the above lenses; also fits the EIGHT bi-focal ground from ONE piece of glass. Optical artor in Perry's Warehouse, Seventh Street, Medford.
