THE MEDFORD MAIL

Published every Friday.

A. S. BLITON, Publisher.

MEDFORD, ORE., AUGUST 13, 1909

SUBSCRIPTION $1.50 a Year

Entered in the postoffice at Medford, Oregon as second class mail matter.

WEARY OF WELL DOING.

There is not nearly so good an exhibit of fruits, flowers and vegetables at the Exhibition building this season as usual, this undoubtedly because of the fact that the novelty has worn off to a certain extent, and again, everybody is so all-fired busy that they have little time for dress parade—even too busy to display the products of their soil—and it's a pity, too, that this condition exists—just at a time when such a great number of people are traveling through the valley and are ever and always on the alert to catch a glimpse of the attractions of the various places through which they travel. An effort should be made on the part of those most interested to the end that fresh flowers, fruit and vegetables be kept continually on exhibition there. The exhibits placed there are of too much importance as an advertising feature to be treated lightly.

FAVORS GOOD ROADS.

President Taft has again indicated his interest in good roads, the latest expression being elicited in connection with a movement for better highways in Virginia, says an exchange, this taking shape in an immediate plan for a road from Washington to Richmond. In a letter on the subject, the president says:

"I regard this as part of the general good roads movement in the country, and I have pleasure in saying that there is no movement that I know of that will have a more direct effect to alleviate the difficulties and burdens of the farmer's life, will stimulate the traffic and add to the general happiness of the people more than the establishment of good roads throughout the country.

"I do not think that, because this may have been stimulated by people using automobiles it is to be frowned upon, for, while persons using automobiles are by no means the most important in the community, the fact that their sharp interest has focused the attention of the public on the movement entitles them to credit.

"It have no doubt that within the authority which is his, the secretary of Agriculture will be glad to assist by recommendation and practical advice the methods to be pursued in good road building in Virginia."

THE LAND GAMBLE.

The great national land lottery conducted by the government in Montana, Washington and Idaho has broken all records for affairs of the kind, says the Oregonian. In the number of victims it makes a fairly good showing in comparison with the late Louisiana lottery.

That the chances of the victims for drawing any kind of a prize were much greater in the Louisiana lottery is easily apparent when it is stated that only one out of 100 of the applicants stands any show to draw a claim. One of the notaries who took depositions of the applicants made nearly $3000, and others made as high as $135 per day. The railroads received [illegible] and the hotels, lodging houses and [illegible] also profited greatly by the rush.

[illegible] the victims can stand the loss which they have been obliged to incur, but among them are thousands of poor people who can ill afford [illegible] the money spent on this greatest of modern lotteries. If there is anything in connection with this [illegible] that is creditable to the [illegible] it has not yet been made public.

BREAD UPON THE WATERS.

The Morning Mail cannot but think that Medford is losing a grand advertising opportunity when it does not have someone at the depot with advertising matter to hand out to [illegible] passengers going through who are anxious to learn of the products of the valley. True it is that the railroad company objects to great bunches of advertising matter be strewn broadcast on the trains and about the grounds, still the company would hardly object if a few of these beautiful booklets were given out.

The woman who is said to have left $10,000 to her dogs and only $2,000 to her husband, was Mrs. Snow, of Massachusetts; and that was snowing the old man under with a vengeance.—Exchange.

The tariff has all along been in the fix of the old negro who said that if he had to go, he would rather be lynched by his friends.

Mayor McClellan, of New York, says office-holders "need a check." Pre-eminently the one on pay day.

The new $50-bill has Grant's picture, while Lincoln is on the new pennies. We'll have to pull through with Lincoln.

It is said that a Kansan has written the Great American Novel—just when that state was beginning to act orderly.

Glad Congres didn't give Uncle Joe an automobile. The stunts he pulls off in the house are spectacular enough.

Texas is a big state, but we predict that they'll make an unsuccessful effort to lose Mr. Bryan in it.

Speaker Cannon will not take the lecture platform. Which is joyous news to Senator Beveridge.

The editors of the Congressional Record have decided to give their readers a holiday.

Proffessor Zueblin says "hell is not noble enough." Well, was nobility the intention of it?

In unquiet kingdoms kings should hasten to invent airships ready for a hury call.

HITS YACHT OWNERS

Neew Tariff Law Makes Heavy Levy on Foreign Built Craft

WASHINGTON, Aug. 9.—Sailing the high seas on palatial foreign-built yachts wil come pretty high to American millionaires who own such craft, now that the new tariff bill becomes effective, and well-known Americans will have to help swel Uncle Sam's coffers. Others owning yachts built by American labor wil not be affected by the tariff revision.

The new tariff bill contains a provision for the taxation of $7 per ton per year of foreign built yachts now or hereafter owned or chartered by American citizens.

It is provided, however, that as an alternative to the annual tax, the owner of a foreign vesel may pay a duty of 35 per cent ad valorem, and secure an American registry, exempting the vessel from further federal taxation. The value of these yachts ranges from $50,000 and $800,000.

The following on September 1 will be subject to the anual tax at the rates indicated.

James Gordon Bennett, $13,594; W. K. Vanderbilt, $12,761; A. J. Drexel, $12,400; Mrs. Robert Goelet, $12,173; Morton Plant, $11,529; Joseph Pulitzer, $11,249; Eugene Higgins, $11,011; George J. Gould, $9,121; Roy A. Rainey, $8,589; Fred W. Vanderbilt, $7,679; C. K. G. Billings, $7,637; G. W. C. Drexel, $6,881; Cornelius Vanderbilt, $5,726;, and so down the scale.

Besides these Americans own about 50 smaler foreign-built yachts on which the annual tax will range from $75 to $2,800, amounting in all to aout $235,000 revenue from this source.

TRAFFICKING IN INFANTS

Superintendent of California Orphanage Sells Children to Chinese

SAN FRANCISCO, Cal., Aug. 9.—The Rev. H. W. Brayton, Superintendent of the Children's Home Finding Society of Berkeley, yesterday made the astounding admission that he has practically sold five white babies to Chinese for from $5 to $20 apiece.

"At the time I gave these children into Chinese homes," said Brayton, "I did not think anything of it."

Brayton kept no records. He does not know the parentage of the white babies he condemned to slavery and squalor in Chinese dens. He does not even know the names of the Chinese to whom he gave the babies. He simply gave them—"placed them" he calls it—sold them—other people declare—to the oblivion of a life in the Chinese quarters, to live or die as best they could in hovels or dens, to be petted or abused, as their fate might be.

"I thought nothing of it", said Brayton to a reporter yesterday.

Apparently it was nthing to him that he had—for $5 or $20—deprived a white baby of its natural born right to be reared as a white man or a white woman—a chance to gain a white child's education and to take an honored place in the social and home life of a white man's world. For $5, $10, and in one case $20, Brayton sent these white children to the reeking, filthy, basement homes in the Chinese quarters, to be reared as Orientals, with all the odium that attaches to a place in Oriental life!

KILLED STOCK IN ANGER.

Wife Sues for Divorce, Saying Husband Beat Horses to Death.

ALBANY, Or., Aug. 6.—Asserting that her husband is a man of such ungovernable temper that he beat two horses to death and drowned two cows, Eliza M. Hamilton filed suit for divorce in the state circuit court here today against Gaven Hamilton. She alleges that he was subject to fits of insane anger, and not only abused the animals, but was a menace to the neighbors in general and his wife in particular.

Mrs. Hamilton claims that her husband abused her almost continually from their marriage in Calgary, Alberta, Canada, May 15, 1898, until they separated in Linn county, May 16, 1902, following a period of a few months in which Hamilton's temper is alleged to have been unusually severe.

ELECTRICITY AID FRUIT GROWING

Colonel Frank Ray, on behalf of the Rogue River Electric company, has offered a unique plant to the state horticulture department. Providing that the department will send an expert scientist here to superintend experiments, they will donate 50 acres of the finest irrigated land in the valley, furnish all the water, all necessary farm and house labor, furnish a house, supply all necessary implements and electricity free, for the experiment of the effect of electricity on plant life.

There are three ways of using electricity, on plants and shrubbery.

1—By arc lights.

2—By direct current.

3—By nitrogen, separated from the air by electricity.

In Polar Regions.

In the Polar regions it has been noticed that plant life, as soon as the sun begins to shine during the short summer season, makes plant life grow faster and more luxuriantly, as is proven by the vegetation near the equator.

At Gold Ray dam Colonel Ray set out quite a few roses and trees on the hillside. Those under or near the arc lights have grown wonderfully fast and luxuriant; those farther away died or were stunted either by frost or barrenness of ground, yet all were planted in the same way. An eucalyptus tree, a native of Australia and California, and which was thought up to this time could not be grown in Oregon, has flourished at Gold Ray, adding the remarkable height of 21 feet in only three years. This tree is easily affected by frost, but the electric treatment it gets at Gold Ray makes it proof against frost.

Safe From Damage.

In orchards this would be almost invaluable, for many a sleepless night could be passed with no worry, knowing the fruit would be safe from damage. Then again, fruit could be picked at night, and in the busy season a good deal be saved which is lost from insufficient sunlight to see to pick.

The arcs should be placed every 20 feet apart to get good results.

The second way, that of applying electricity direct, was discovered in 1885 by Prof. S. Lindstrom of Finland. He found that by using electricity four or five hours a day on vegetables and fruit that they grew quicker, larger, and although they ripened about 35 days sooner and contained 28 per cent more sugar than those which were not so treated. He discovered also that those treated in this way, because of the better circulation which the electricity inspired, were able to withstand every frost and to ward off all disease. This discovery has also been tested in England and Germany with the same results.

Network of Wires.

Two ways are open for the experimentor. One, to put a negative pole at the top of every tree and a positive at the base, and use grounded wires. The other, and which is used more widely, is to place a network of charged wires high enough above the ground to allow all farm implements to pass under. The electricity by some method escapes and enters the trees. A peculiar feeling is experienced when one walks or rides underneath the wires, as it feels as though your hair is "standing on end."

In Belgium, it is said, they have another plan, or, namely, the third way. That is to use nitrogen taken from the air by electricity. A huge static electric machine of high voltage is placed in an air-tight building. In the floor a nitrogen receiver is placed. The sparks from this machine enter the receiver and come in contact with the hydrogen and nitrogen molecules contained in the air. Since the nitrogen molecules are heavier, they separate and fall into the receiver in the form of nitric acid, in which a chalklike substance is placed to absorb the acid. This is then scattered over the fields and produces wonderful results. In Belgium alone 20,000-horsepower is used in this way alone.

Purpose of Experiments.

The purpose of the experiments here is to find out the best method. As to the benefits, since it makes fruit sweeter, larger, not subject to disease, able to withstand the frosts, its value is incalculable. Besides this, fruit ripens sooner, and we will be able to place fruit in market long before California.

The Rogue River valley will come into its own.

BUSINESS COLLEGE

Wil Be Opened in Medford by Well-known Educator

What could truthfully be termed a "long-felt want" in Medford is soon to be filled. That is an up-to-date business college, which will be run under the management and supervision of a principal and teachers who will be perfectly qualifified to handle the business and the wark as well as those in any business college in the country.

J. B. Mack was in Portland for the purpose of looking over the field with a view of starting the college there, when he was informed by several parties that Medford was a coming city, and strongly advised him to come here and se the place. He came, he saw, and inside of two days he made up his mond that this was a splendid point for an institution of the kind he was going to run.

Begins September 1st.

The only drawback, or rather obstacle in the road is that of a location for the school. However, Mr. Mack has two or three differeut ones in view and wil make a choice in the course of few days time. He is already ordering the furnishings and other things necessary and expects to open September 1. From that time on there will be both day and night classes.

Prof. Mack comes from the East and has taught in some of the best business colleges there. Although he is only 38 years of age, he has had 15 years' experience in teaching and running colleges of his own. He has colleges now in other places, but intends to give this one his personal attention and will make him a residence in Medford.

All Branches Taught.

It might also be stated that Prof. Mack is the author f a number of books in connection with commercial colege work, which are used in hundreds of other colleges as well as his own. All business branches will be taught and special efforts will be directed towards to getting students from outside the city for a considerable distance, which in itself will be a good thing for Medford.

SUPERINTENDENT ARRIVES

G. H. Brower Takes Charge of the Glen Rogue Orchard Tract

G. H. Brower, the recently appointed superintendent of the Glen Rogue Orchards, has arived in Medford, and after looking over some of the vineyards in the valley will proceed to have the land where grapes are to be grown in the Glen Rogue district cultivated and then plant thousands of grape vines.

Mr. Brower recently returned from a trip to Grants Pass, where he visited A. H. Carson and spent some time getting information regarding the growing of grapes in this part of the country. Mr. Carson informed him that better grapes are raised here than there are in California, and that they also bring a better price. He thought the Glen Rogue land was ideal for grope growing, both as to location and also the soil.

The promotors of the Glen Rogue orchards intend to plant hundreds of acres of grapes. The land which will be used for this purpose is the sides of the hills with a northerly exposure. Apple and pear trees will be planted on most of the balance of the 1,400 acres owned by the company a few miles beyond Jacksonville. This will be done as fast as the ground can be got in shape and the trees set out.

WOODFORD GETS RAISE.

Assistant Postmaster of Medford Receives $200 Raise in Salary.

According to a dispatch from Washington the postoffice department has announced that a number of assistant postmasters will have their salaries raised beginning July 1 last. Among the number is that of the popular assistant postmaster of Medford, Ralph Woodford, whose many friends will be glad to learn that his salary has been increased $200 a year. The following are the places in Oregon, Washington and Idaho where raises have been granted:

Oregon—Ashland and Hood River, $1100 to $1200; Medford, $1000 to $1200.

Washington—Bellingham, $1500 to $1600; North Yakima, $1400 to $1500; Vancouver, $1200 to $1300; Centralia, Chehalis, Colfax, Ellensburg and Wenatchee, $1100 to $1200; Bremerton, $1000 to $1200.

Idaho—Boise, $1500 to $1600; Moscow, $1100 to $1200.

MICHIGAN VISITORS HERE.

Acting President of Page Wire Fence and Wife on Pleasure Trip.

Mr. and Mrs. George L. Bennett of Adrian, Michigan, are in Medford for a brief visit. Mr. Bennett is acting president of the Page Woven Wire Fence company, and he and his wife are making a tour of the Pacific coast country, not in the interest of wire fence, but to see the country and have a good time. Yesterday afternoon they were driven over the valley in an automobile by Mr. and Mrs. E. C. Geddis and were shown some of the splendid orchards and the heavy crop of fruit. Michigan is something of a fruit country itself, but when Mr. Bennett tells his friends back there of what he saw in the Rogue River valley, Oregon, they will have to sit up and take notice.

Seared With a Hot Iron

or scalded by overturned teakettle—cut with a knifebruised with slammed door—injured by gun or in any other way—the thing needed at once is Bucklen's Arnica Salve to subdue inflamation and kill the pain. It's earth's supreme healer, infallible for Boils, Ulcers, Fever Sores, Eczema and Piles. 25c at Chas Strang's.

FOR SALE—Pure bred trained Gordon setter, one year and a half old, Dr. E. Davis, Central Point. 2tp

VIEWS PLACED AT EXPOSITION

If Jackson County and Southern Oregon is not well advertised at the Fair it will surely not beet he fault of the Medford Commercial Club. This organization has put forth every effort posible to bring this section of the state to the attention of all visitors tot hat section ofsoinnunn visitors to that great fair. There is much of a scenic nature here which will appeal to the admiration of visitors to the fair which cannot be exhibited except by photographs. To the end that the beauty of some of the scenery hereabouts may be displayed there in pictures, the club has had photographd and painted in natural colors more than a half dozen scenes, andt hese, after having been elaborately framed in unfinished fir, are now being placed in the Oregon building, over the Bureau of Information—a position in which none of them ca nescape the eye of all visitors.

Rogue River Scenes.

They consist of one sceene of Rogue River, 24x36 inches in size; one scene of Mill Creek Falls, 24x36 inches in size; one scene of Crater Lake, 20 inches by 12 feet in size;; one scene of Crater Lake taken from Mt. Scott, 30 inches by 6 feet in size; one orchard scene, 14x20 inches in size; one scene of Crater Lake Road, 14x20 inches in size; one panoramic orchard scene, 14 inches by over 8 feet in size; one panoramic scene of Crater Lake, 2x18 feet in size.

All these views will surely interest many visitors, being diversified to such an extent as to interest the tourist, the investor and the sportsman.

Fruit and Vegetables.

While all these magnificent views are being placed on exhibition at the fair and cannot help but prove of great value tot his locality, the fact people the necessity of supplying this want. Any person who may have a little fruit, vegetables ar cereals which they can spare are urged to bring them to J. A. Perry, S. A. Nye, C. H. Pierce, Bert Anderson or to the Commercial Club rooms. These will be sent to the Fair and will do a world of good. Jackson County has a very prominent place in the Oregon building and if we do not get our full quota there no fault can attach to anyone but the people right here at home.

MAKING PREPARATION

Elks Will Have Institution of Lodge Here Notable Event

The different committees in connection with the organization of the Elks' lodge in this city held a meeting last night in the rooms over Elfert's tailor shop on D street. There was a large attendance and from what transpired during the evening it can be stated positively that the celebration will be the largest ever held in Southern Oregon.

Judge Crowell was the chairman of the meeting and T. E. Daniels was elected to fill the position of temporary secretary. John Orth will be the chairman of the general committee from now until the affair is over.

Although there is ample time between now and the proposed date, September 15, to do considerable, yet every member of the different committees appears to want to get to work at once so that nothing will be left undone to carry out all the plans. One of the first things which will be arranged is to secure special rates on all the railroads for those coming from Northern California, and also special rates from every point in the state of Oregon.

One of the principal features will be a banquet in the evening, when there will be over 400 Elks present. Just where this will be held has not yet been definitely decided upon, but this will be arranged for in ample time. The celebration will last the whole day and there will be something doing all the time.

The matter of decorating was carefully considered at the meeting and it is certain that not only the streets will be decorated, but also most of the business places. The committee for the purpose will call upon all the merchants and urge them to do their part. The regular colors of the order are purple and white, but it is not necessary, the committee states, for the merchants to confine themselves to those colors, but to use what the dssire in that line.

WILL BE ICED HERE

Fruit Cars Will Be Supplied With Ice by Local Concern

The management of the Medford Ice & Storage company are making preparations so as to be able to fill a contract with the Southern Pacific railway to supply a large quantity of ice during the summer for the fruit refrigeration cars. It is expected that they will supply with ice from 300 to 500 cars during the fruit season.

Formerly all the icing of the cars was done elsewhere, but for certain reasons the company are changing that arrangement and will have all the fruit cars which are loaded at all places between Central Point and Phoenix supplied with ice at the plant of the Medford Ice & Storage company, which is situated on the railroad track at the south end of the city.

In order to be able to handle the work promptly a two-decqed platform is being erected all along the railroad side of the building, 153 feet long and nine feet wide. The factory is already supplied with elevators and the ice will be taken to the top platform and from there placed in the cars as they are run alongside on the sidetrack.

The first car will be loaded next Monday. It will be a carload of Rogue River valley pears. From that on it is expected that not a weekday will pass without one or more cars, being stocked with ice for the journey to the eastern markets.

Although supplying a large amount of the finest quality of ice to city customers and several outlying places the Medford plant is equipped so as to furnish the cars as well without the slightest extra effort on the part of the staff. It might also be mentioned that all the ice is made only from the best distilled water and is perfectly pure.

THE TENNIS TOURNAMENT.

It Was Held at Jacksonville Yesterday and the Home Team Won.

At the tennis tournament held in Jacksonville yesterday the home team won the prize cup. The tournament was represented by three teams—South Medford, with Miss Netherland and Messrs. Johnson and Beeson as players; Jacksonville, Miss Thompson, Messrs. Hester and Wilson; Grants Pass, Misses Kinney and McLain, Messrs. Long and Davis. Misses Thompson and Neatherland doubled in the games played by both South Medford and Jacksonville.

A temporary organization was effected with four clubs enrolled as charter members, they being South Medford, Jacksonville, Talent and Grants Pass. Dr. Hester was elected temporary chairman, who appointed a committee on constitution and by-laws, to report at the next tournament, which will be held in Grants Pass on September 7 and 8.

Other clubs of the valley wishing to join the association must give two weeks' notice to the association prior to its meeting in Grants Pass.

WAS FINED $50.

Abe Radcliffe Did Not Have Amount and Will Work It Out.

A man giving his name as Abe Radcliffe appeared to have completely lost his breath yesterday afternoon when Recorder Telfer fined him in the sum of $50. However, as he will work for the city cleaning streets for 25 days, in default of paying the amount assessed against him, he will have a good chance to recover the aforesaid breath before he gains his liberty again.

Radcliffe arrived in Medford yesterday morning and proceeded to absorb and in other ways get rid of all the liquor in Medford. Before he could accomplish his object he got aboard the Ashland train and proceeded to act in such a way that the police placed him under arrest. In the course of a few hours he was quite meek. He is very liable to be meeker still before he finishes serving his 25 days at hard labor.

SEEING IS BELIEVING.

There Is a Rogue River Cucumber Nineteen and Half Inches Long.

Over at the Exhibit building there is a specimen of what water will do when applied in sufficient quantities to land which, before the application, was an arid desert. This specimen is a cucumber 19½ inches in length and 3½ inches in circumference. It was grown at the experimental station of the Fish Lake Canal company, five or six miles north of Medford.

MEETING POSTPONED.

Owing to the fact that nearly every one is especially busy at this time, it has been thought best to not have the August meeting of the Rogue River Horticultural society, the regular date for which would be Saturday, August 7. Members please take notice.

HARRY H. TUTTLE, Secretary.

FOR SALE

My fine sixty-acre orchard on the Umpqua river; also thiry-four acres of level timber land adjoining. There is about 1500 each of Newtown and Spitzenberg apple trees and 1000 Bartlett and Flemish Beauty pear trees; also peaches, cherries and walnuts. Can be developed into three nice orchard tracts. Most of the trees are five and six years old. Come and se the orchard or write for further information if interested. H. H. Olcott, Canyonville, Oregon. 31-tf-p

NOTICE FOR PUBLICATION

Department of the Interior

U. S. Land Office at Roseburg, Ore., August 3, 1909.

Notice is hereby given that Reuben H. Guches, of Medford, Oregon, who, on January 18, 1902, made Homestead entry No. 11374, S. N. 03450, for S E ¼ of N W ¼, Section 11, Township 38 South, Range 2 West, Willamette Meridian, has filed notice of intention to make Final five year Proof, to establish claim to the land above described, before W. H. Canon, U. S. Commissioner, at Medford, Oregon, on the 15th day of September, 1909.

Claimant names as witnesses: Thadeous C. Williams, of Medford, Oregon; [illegible] Heriford, of Medford, Oregon; Edmund L. Redpath, of Medford, Oregon; John M. Guches of Medford, Oregon.

BENJAMIN L. EDDY, Register.

FINAL NOTICE

In the matter of the estate of W. V. Jones, deceased.

NOTICE is hereby given that the undersigned administrator has filed his final account in the above entitled matter, and that by an order of the County Court of Jackson County, Oregon, made and entered therein, Friday, September 17, 1909, at 10 o'clock a. m. of said day, and at the office of the County Judge in the Court house at Jacksonville, Oregon, is the time and the place for the hearing of objections thereto, and the final settlement thereof.

Dated August 13, 1909.

SAMUEL MATHIS, Administrator.

COLVIG & REAMES, Attorneys for Estate. 33-5t
