ORDINANCE NO. 146. e providing for the time f improving Seventh point 100 feet cast of

of A street to the east of Medford does ordain as

That Seventh street from 100 feet east of the east line of A street to the cast line of L street, shall be improved in the following man

Grading. shall be graded down o filled up to the sub-grade as given by the (3) y Engineer; and all soft and the Cay regimer, and an soft and spongy places not affording a firm foundation shall be dug out and the space refilled with sand, gravel or rushed rock, carefully rammed or as to make such filling com

gravel, rock or suitable material free from all perishable and objection able substances shall be used in bringing the tondway to the proper substeam roller until thoroughly al and solid and approximate sed surface of

mayement. sorn rolling shall be completed in serious of at least one block and shall be tested and accepted by the City Enment is placed thereon.

Foundation.

in top of this sub-foundation erushed stone free from dirt and of quality ap-proved by the City Engineer, shall be ad to a depth of four (4) inches which shall be then compressed with a steam roller. If any consider proportion of the foundation ma is larger than three (3) inches. half be separated, and the founds half in strata, the coarsest being i at the hottom and the finer a op. Where suitable gravel (con miling of not more than 25 per cent fact than 14 inch) can be obtained, it may be used by sprending same to doubt of three inches, and after the rolling with a steam roller westing the gravel to aid compression necessary) a layer of clean hol stone 2 inches in thickness shall be placed on the surface, and thorough he papers of the sarrae, and horough-te rolled to the desired grade. On this foundation, after rolling, shall be spread a centing of Warren's No. 24 Paritan Brand Hard Bituminous Cement, or Bitalithic Cement, for the purtogether and making it readily unite with the bituminous concrete wearing One gallon of the bituminon shall be used to each square rand of surface,

Wearing Surface.

to this prepared foundation shall be had the wearing surface, which shall be composed of carefully selected, sound, hard, crushed stone, mixed with bitumen, and Inid as hereinafter speel

After heating the stone in a rotar neclemical dryer to a temperature of about 250 degrees Fahrenheit, it shall be elevated and passed through a rotary section having six or more sections with varying sized openings, the maximum of which shall be 13-4 inches and the minimum 1.10 inch in diameter. The several sizes of stone thus separated by sereen sections shall pass into lin containing six sections or compar nta. From this hin the stone shall drawn into a weight box, resting or scale having seven beams. The ston each bin shall be accurately neighed, in the proportions which hav has a previously determined by labora tary tests to give the best results—that is, the most dense mixture of minera negrogate, and one having inherent sta From the weigh box each batel mineral aggregate, composed of differing sizes accurately weighed as above, shall pass into a "tiwin pug" or other approved form of mixer. In this mixer shall be added a sufficient quantity of Warren's Puritan Brand listuminous Waterproof Cement, or Bi-talithin Cement to thoroughly coat all the particles of stone and to fill all voids in the mixture. The bituminous coment shall, before mixing with stone, be heated to between 200 degrees and 250 degrees Pahrenhelt; the amount used in each batch shall be accurately has been previously determined by inhorntory tests to give the best re-The mixing shall be and ampregate. until the combination is a uniform bituminous concrete. In this condition it shall be hauled to the street and there spread on the prepared found ption to such dopth that, after thorough shall have a total thickness of two inches. The proportioning of the principle sizes of stone and bituminous shall be such that the com-.... i mixture shall as closely as pracdensity of solid stone.

After rolling the wearing surface, there shall be spread over it a thin reating of Warron's Quick Drying Bitiminens Phish Cont Composition, the burner of this coating being to comtely fill any uneveness or honeycomb which may appear in the surface of the

Surface Finish.

There shall be then rolled into the or a thin layer of stone chips for sport of prosenting a gritty sur-

General.

Each layer of work shall be kept as free as possible from dirt, so that it nite with the smeeceding layer-The bituminous composition or ce

ELECTRIC CO., accessor to Condor Water Power Co. Of

fice 206 W. 7th st., opp, big electric sign,

I was reading about a big firm back east that claims that preservatives are not necessary to the food preserving industry, while all the others maintain that the new law, if strictly en-forced, will put them out of business. But one big firm with a big reputation for putting up sound fruit can prove its posi-tion for all the rest. It's only a question of using sound fruit. Sound fruits, like sound women, need no preservatives. Say, it isn't me that's cozing all this + wisdom. It's the paper I was + telling you about. The boss takes a lot of trade papers and that keeps me posted on what is going on in the provision world, you bet. I think Preferred Stock are the nicest, and Heinz comes next, then Bishop. What do you think! Try a jart

## What an Interested Man Found Out About Our Heating and Ventilating Plants

Another "open letter," showing an unbiased opinion of the efficiency of our heating plants: FREDERICK HEATH, Architect,

Official School Architect for City of Tacoma. 503-504 Fidelity Bldg., Phone Black 6862. TACOMA, WASH.

Feb. 12, 1905

Mr. A. A. Lee, Salem, Or. My Dear Sir: Your communication of Feb. 7 received.

Experience in our city shows the hot blast as the best, and we have adopted that system for all our future buildings. There are several contractors and makers of these systems, some good and some bad. McPherson Co. are first-class; we have one of their plants that is giving excellent results.

Do not attempt to use a hot-blast system without automatic regulation. And do not permit any regulating system to be used except the Johnson. We have tried others and will have to take them out and put in the Johnson.

Sincerely yours.

F, H, HUTH.You don't take any chances. It costs you absolutely nothing to have us explain our system. And if we do install one we give a bond guaranteeing the efficiency, the economy, and there will be no repairs—no "ifs," no "ands"—just a good heating system, put in by people who devote their time and money to nothing but heating and ventilation.
