

# FOREST NAMED FOR CLEVELAND

## Roosevelt Honors Predecessor by Renaming California Woods

WASHINGTON, July 24.—As President Roosevelt honored the late President Cleveland by renaming a California forest "Cleveland," so he is seeking to pay tribute to the coming president—maybe by removing the stigma of the name of "Land of the Undesirables" from Judge Taft's pet country, the Philippines.

Through the secretary of state, orders have gone out to the American consular representatives at Asiatic ports to discontinue their long-established practice of shipping vagrants to Manila. The Philippines have been made the dumping grounds for human trash, who claim American citizenship, it is said, on the theory that at Manila or vicinity, work may be procured by the wanderlust victims, or that they might be sent on to the states. Such a practice was very nice for the Asiatic ports, but Manila did not see any fun in it, and complained at the cost thus placed upon her. The question of taking care of these stranded persons, or sending them home on a government ship was a vexing one, and the authorities of the city and of the islands complained to the president.

Last year there were not less than 223 vagrants who were provided with transportation. In 140 of these cases the cost of subsistence was paid by the insular government. Some of these are sailors who had been discharged and who had deserted from American sailing vessels either at Manila or at such places as Hongkong or Singapore, whence they were sent to Manila by the local American consular representative, "on their way home," wherever that might be.

Manila is tired of being the capital of the Undesirables and Busted, and her kick has been heard.

### MINING IN STEAMBOAT DISTRICT PICKING UP

Mining operations in the Steamboat district are picking up considerably and there is quite a camp there at present. Much development work is being done there this year in quartz propositions and a couple of placer mines will be opened up this summer. A mining man who is operating out there at the present time reports that before fall there will be a camp of over 100. He is opening up a quartz proposition and last week brought in some fine samples of cinnabar of which he says he has a large quantity and that an eastern man who has large holdings already in this section is thinking of taking the cinnabar up. He says that all through that district prospectors can be found on every mountain.—Observer.
