For 24 years litigation has been the bone of controversy in this case, which means in all probability as far as the lawyers go, to be case of God been kind to the orphan.

Having been with this nursery 15 years, I can guarantee all stock to be true to name and free from disease. I handle nothing but Oregon grown trees.

Photographing babies and small children. The best time to get a good picture of a baby or small child is when it's in the "mood," or feeling good. A good receipt: Give the child a good nap, feed well, dress quickly and take it to the photographer. It ought then to be feeling its best. Nine or 10 o'clock in the morning is a good time to photograph babies. Do not wait until late in the afternoon, when the child is tired and warm and the light is poor; try the early forenoon. Platinum papers make absolutely the highest grade finish. They are more expensive than the common finish, but the results are beyond comparison.
