-The Tribune Prints More Live Telegraph News than all Dailies in the State of Oregon South of Salem Combined

the north fork of the Little Butte. This can be supplemented an equal amount from the Fish Lake company in the same stream, making 300 inches. The cost would be \$75000 for the Slinger ranch of 160 acres and 150 inches of vator and \$7500 for 150 inches of Fish Lake water. As the pipeline would be approximately two utiles longed than that to Wasson eanyon, the approxi-mate east would be \$29,000 for pipe, \$15,000 for water rights and land, total of \$35,000.

Relative Cost of Systems. The total cost of the Wasson canyon project supplemented by Slinger ranch wate rights, approximates as follows: Water rights, \$25,000; ditch from north fork, \$3000; right for feneing land around and above intake, \$1000; total cost, \$29,000. But the city secures no hand under this proposition, and a dehatable point is whether the assured water supply of the north fork and the ground for headworks and fencing not worth the \$60000 extra.

The committee has not yet announced its decision, and will not until August 15. It is presumably awaiting comple-tion of preliminary surveys to ascer-tain more exactly the relative cost he tore final decision. Meanwhile the Ap-plegate proposal made by F. J. Blake ley is to be thoroughly investigated and Chief Engineer Roberts and the water committee leave tonight to visit the Upper Applegate and go over the pro-posed ditch line.

Rushing Survey Work. Engineer Roberts has returned from Wasson canyon and reports the flow still holds up to the former measure ment of 180 inches. Nine men are rush CARNIVAL COMPANY ing preliminary survey if of pipelin nder Engineer Cummins and Mr. Rob
