"IT MIGHT HAVE BEEN'

If Root's New Building Had Been in Place, my What a Crash.

There are wonderful possibilities is that word "if." Por instance, if John M. Root had had his building erected ing. as he suntemplates on the corner of Seventh street and Riverside avenue, the plate glass windows would certainly have suffered this morning, when a runsway team, attached to a hayrack went smash up against an electric light pair just where the windows are to be placed. Mr. Root was told that such would be the case if the building is erected as he plans on the 20 foot jog into Seventh street. And it was no longer than last Priday evening that he was told. Now it seems as if providence and taken a hand and would arie with Mr. Root with object lessons A team driven by "Doe" Helms go

away from him this morning near Central avenue and started down Seventh They were attached to a hayrack and continued their flight until they col-tided with an electric pole. "Due." stayed with them and sheeked them corner, with its front smashed to splin-

The team got away twice during the morning. The first time they were checked near the First National bank checked near the First National baye hap But think of what would have hap pened had that plate glass window been there to check their mad career in stend of the electric pole!

RISHOP IN CHARGE OF TWO BIG COPPER MINES

R. N. Bishop of Medford has been andle joint superintendent of the Baluk-hila and Shasta King mines. The Shas-ta King is the leading property of the Trinity Copper company, therefore as impression has grown up that the Ba laktala and Trinity companies' inter-acts have become consolidated. This is denied. The arrangement is merely the practical confirmation of the contract entered into a year ago between the two companies by which the Shasia King mine was to provide duity an average tomage of 500 for the sucticat Corum. The terms of the contract it is stated, have been so changed as to unke it possible for the Shasta King to furnish even a greater amount. It is known that the Shusta King ore is a hager grade than the Balakbila ore and it is not unlikely that for a time after the opening of the smelter the exclusive product or practically the great bulk of ore will come from the Shasta King
