

WHY SEND A PROXY?

Here is the record as it stands. Mr. Bryan was the first to advocate those great policies that the people approve. He urged them when they were unknown and unpopular. He was censured for defending them twelve years ago. Measures he pleaded for then are known as Roosevelt policies now, and it is claimed that Mr. Taft is the man who best represents them.

Here is what Bryan in his platform and letter of acceptance, said twelve years ago, and what Roosevelt said in messages and speeches nearly a dozen years later. Was Mr. Bryan right then—is he right now?

THE TARIFF.
Bryan in 1896: "The tariff laws should be amended by placing the products of the trusts on the free list to prevent monopoly under the plea of protection."
Roosevelt in 1908: "I advocate the reduction of the tariff upon the articles coming into competition with the articles controlled by the trusts."

INCOME TAX.
Bryan in 1896: "I believe in the income tax as a method of raising revenues for the government."
Roosevelt in 1907: "I wish to again urge upon you the necessity of some form of taxation upon the income of wealthy corporations and individual incomes."

CONTROL OF RAILROADS.
Bryan in 1896: "We demand the enlargement of the powers of the interstate commerce commission, and such restrictions and guarantees in the control of railroads as will protect the people from robbery and oppression."
Roosevelt in 1908: "It is especially necessary that some representative of the national government have full power to deal with the great corporations engaged in interstate commerce, especially the great interstate common carriers."

GOVERNMENT BY INJUNCTION.
Bryan in 1896: "We are opposed to government by injunction, as our support of the senate bill prohibiting it will show. The bill meets with my approval."
Roosevelt in 1908: "I call your attention to the need of some action in the connection with the abuse of the injunction in labor cases."

TRUSTS.
Bryan in 1896: "The democratic party is opposed to trusts. It would be recreant to its duties to the people if it recognized even the moral or legal right of those great corporations to stifle competition, bankrupt rivals and prey upon society."
Roosevelt in 1908: "The fortunes amassed by these corporations and trusts make it necessary for the government to have some control over them. Such monopolies are wholly inconsistent with human liberty and are not to be tolerated in a free people."

EMPLOYERS' LIABILITY LAW.
Bryan in 1896: "I favor the reenactment of the employers' liability law."
Roosevelt in 1907: "I favor the immediate reenactment of the employers' liability law."

Bryan was the original advocate of these policies. Does the record not show it? Is he the original or the proxy? Bryan is the genuine. If genuine, why is he not the man of all men to be sent to the White House to stand for these policies? Why send a proxy?

MINING SURVEY OF SO. OREGON

Most Important Scene of Field Work in Mining Geology in This Section

Grants Pass, in southwestern Oregon has been the scene of important field work in mining geology by the United States Geological Survey during the past season. A government party consisting of Mr. J. S. Diller and Prof. G. F. Kay of the Geological Survey, and Mr. James Storrs as collector and packer of fossils, with W. G. Moore of Grants Pass, took for the camp, recently completed the season's field work on the Grants Pass quadrangle, and the geologists have returned to Washington, D. C.

The primary purpose of the investigation is to determine the mineral resources of the region and make them known to the general public, thereby contributing not only to the development of the state but also of the whole country. The topographic map of the Grants Pass quadrangle was published last spring by the Geological Survey and formed the basis of the geological field work of this season. With map in hand the geologists visited all the important mines and prospect and studied many of the rocky ledges outcropping in the region traversed. The observations were noted on the topographic map, and when the work is completed a geological map will be prepared showing the distribution of all the important kinds of rocks, as well as the location of the most important mines and prospects, so as to illustrate the particular rocks with which certain deposits are associated. It will be readily understood that such a map will show the distribution of the principal mineral resources.

The rocks of the region are largely igneous. In ages past they were melted and forced up from the interior of the earth. Many of them were poured out upon the surface as lavas, but many others, like the granitic mass about Grants Pass, did not reach the surface. Ore deposits of the precious metals in the region examined are found associated chiefly with igneous rocks. Intermingled with these igneous rocks, which cover over two-thirds of the Grants Pass quadrangle, are masses of slates and sandstones with occasional limestone of which over 40 ledges have been mapped. The great development of the cement industry has largely increased the economic importance of limestone, and the fact that limestones are uncommon in western Oregon gives added interest to those in the Grants Pass region. They are nearest the railroad at Gold Hill and Jacksonville.

It is expected that a preliminary report of the summer's work will be published next spring in "Economic Geology for 1908" at which time copies of it can be obtained free of cost by addressing the Director of the Geological Survey at Washington, D. C.

The Klamath Mountains
The Klamath mountains of southwestern Oregon and the Salmon, Trinity, South Fork, and Yalilo Bally mountains of north-western California all be-

long to the same group to which some years ago Major J. W. Powell, then director of the United States Geological Survey, gave the name of Klamath mountains. It is a very useful and convenient term and is coming into general use. The Klamath mountains are at the meeting point of the Sierra Nevada, Cascade, and Coast ranges, and have long been noted for their mineral wealth.

The copper belt of Shasta county, Cal., is in the Klamath mountains and gold is widely distributed. Platinum and some other rare metals are also common and though not yet discovered in large quantities this region is one of the most important sources of the metal in the United States.

by the U. S. Geological Survey was commenced some years ago and portions of the border region have been examined in detail and the results will be published in the Bedding geologic folio of California, and the Roseburg, Coos Bay, and the Port Orford folios of Oregon. Copies of these can be obtained for the nominal price of 25 cents each. The Riddles quadrangle was geologically surveyed a year ago and the folio is in course of preparation. The work on the Grants Pass quadrangle is part of the general plan, and when completed will be published in the form of a folio which will contain the usual number of topographic and geologic maps with a text describing the geology.

The only report yet issued by the Geological Survey concerning the Klamath mountains as a whole is Bulletin 196, which, with numerous illustrations, describes the topographic development. The bulletins of the Geological Survey may be had free of cost by application to the Director.

Recent Changes on the Pacific
Geological changes in general are apparently more rapid at the present time on the Pacific coast than anywhere else in the United States. It has been the scene of great volcanic eruptions in building up a range of monstrous peaks from Lassen in California to Rainier in Washington, and this activity, continued down the time when the "great pathfinder" made his memorable trip across the continent. Indeed, there are signs about some of the old fireplaces that Vulcan is still alive, for fumaroles of hot sulphurous gases, boiling mud lakes, and hot springs are common at various places along the Cascade range.

Little earthquakes are numerous, and big ones, although relatively rare, are well known. Oscillations of the land with reference to the sea are yet plainly recorded in a series of elevated bluffs and benches were the Klamath mountains, and these are the best of the ocean waves over the land and covering the forest trees. The heavy rains of winter, too, make landslides one of the common and impressive expressions of geologic change, especially where—as on Cow Creek a few years ago—a landslide blocked the Southern Pacific for many days.

NOTICE.
Is Freely given that the undersigned will apply at the next meeting of the city council of Medford, Oregon, for license to sell malt, vinous and spirituous liquors in less quantities than one gallon, for six months, at lot 16, block 20, in Medford, Oregon, for a period of six months. BASS & HALE, Dated October 10. 185

P. W. Waschan leaves Tuesday evening for the ladies' trip east. The Ladies' Aid society of the Baptist church will meet at Mrs. Ben Garrett's Wednesday afternoon.

AMERICAN GIRL TO WED PRINCE

A FAMOUS SINGER WHO MAY BECOME A PRINCESS.

Mary Garden, reigning prima donna last season at the Manhattan Opera House, New York, who will begin a second American engagement in November, does not deny that she is going to marry Prince Maximovalde, a wealthy Luxembourgian settled in Paris, where he is building a palace near the Trocadero. Miss Garden says she is not quite decided, but admits that the prince will come to America to visit her in January.

TOGGERLY FASHIONABLE CLOTHES

FALL AND WINTER 1908 AND 1909

Are the very highest expression of the tailor's art, in Style, Drape and Distinctiveness; they give character to a man's figure and the consciousness of being well dressed at all times.

Ask for SCHLOSS "ADONIS," the new Model—it will be copied and shown later by the best custom tailors.

Fashionable dressers who realize that their success depends upon the good opinion of those with whom they come in contact will be careful to look for the Schloss Label.

The Toggerly

MEDFORD'S LEADING CLOTHIERS.
New line in UMBRELLAS just arrived.

Think What This Means

A dent can be made in a wall plastered with Acme Cement Plaster

but the plaster will not crumble. Never until recently could the above brand of plaster be purchased in Medford. We now have it in its different fibres. A trial will convince you of its superior qualities.

CRATER LAKE LUMBER CO.

A Map of Jackson County

The Tribune and Southern Oregonian is having made at great expense a fine, colored, lithographed map of Jackson county.

This map will show all cities, towns and survey lines, railroads and projected railroads, wagon roads, forest reserve boundaries, election precincts and other data needed by everyone. All townships shown in colors.

This up-to-date map will be ready for distribution some time in December. It will be sold only through The Tribune and Southern Oregonian.

This will be your only chance to secure a good map of Jackson county, as all map editions are out of print and plates were destroyed in the San Francisco fire, necessitating new plates made at an enormous expense. Further details later. Ready in December.

„Oregon,, Builders

Are you doing what you can to populate your State?

OREGON NEEDS PEOPLE—Settlers, honest farmers, mechanics, merchants, clerks, people with brains, strong hands and a willing heart—capital or no capital.

Southern Pacific Company (Lines in Oregon.)

is sending tons of Oregon literature to the East for distribution through every available agency. Will you not help the good work of building Oregon by sending us the names and addresses of your friends who are likely to be interested in this state? We will be glad to bear the expense of sending them complete information about OREGON—its opportunities.

COLONISTS' TICKETS will be on sale during SEPTEMBER and OCTOBER from the East to all points in Oregon. The fares from a few principal cities are

From Denver \$30.00	From Louisville . . \$41.70
From Omaha 30.00	From Cincinnati . 42.20
From Kansas City 30.00	From Cleveland . . 44.75
From St. Louis 35.50	From New York . . 55.00
From Chicago 38.00	

TICKETS CAN BE PREPAID. If you want to bring a friend or relative to Oregon, deposit the proper amount with any of our agents. The ticket will then be furnished by telegraph.
