MEETING ON

NOVEMBER 7

KLAMATH FALLS, Or., Oct. 29.-There will be a meeting of the Crater Colonel E. Hofer, who enjoys the replake road commission in this city on Saturday, November 7 , when most of the members of the commission will be present. It is also hoped that Govern-or Chamberlain will be able to get away long enough to attend. It is plnuned to make this meeting a most memorable one. Preparations are already under way for the entertainment of the com-mission, and Messrs. Baldwin and Benson, Klamath county's members, are going to leave no stone unturned to make the affair a success. One of the features planned will be the bringing to gether of the business men of this city and Lakeview who are interested in the move now under way to make Klamath Falls the shipping point for the en-tire lake country. So popular has this proposition become that it is almost certain that the new road will be or deted constructed by the county court. Everyone realizes the benefits such a change would be to this city and Bonanza.

SPENT FORTUNE AT \$3000 A DAY: BACK TO GOLDFIELD

TACOMA, Wash., Oct.29,-Broken in pocket but not in determination William V. Campbell is here today on his way to the Copper river district of Alaska to gain a second fortune. The gold secker has just completed the rapid spending of \$150,000 that he brought with him from the north after he had prospected for 12 years in search of wealth. Durfor the years in secret or order to experi ing Campbell's day of plenty he specific his fortune at the rate of \$5000 a day. Most of this was specific Los Angeles, Theoma, Porthaud and Scattle. Camp-bell became the center of a group of "good fellows" and squandered money in all eites along the const. His hotel bills alone reached \$170 daily. The prospector is not discouraged at facing the task of again recouping his finan-ces. He believes that he will strike it rich any day and become a millionair and advises all who have no ties of of kindred to try their luck in the golden north.

"I am very much surprised," said of the eitigens of Oregon, "that your cosiness men are considering the laving of wood pipe for your water system. I believe this to be a great mistake, for when pipe is put in it should be of steel. This is but what is taught by the experience of other eities in this state, and elsewhere. Take Salem or Marshifeld, for instance. Here woolen pipe was laid only to be pulled out in a few years and replaced with steel. The wooden pipe rots out in a compar-atively short time; it becomes weakened and bursts; and in every case where it has been used it has been taken out.
