

# MUCH TIMBER IS WASTED

## Cutting Lumber at Rate of 500 Feet a Year for Each Person

"We are now cutting timber from the forests of the United States at the rate of 500 feet board measure a year for every man, woman and child. In Europe they use only 60 Europe they use only 60 board feet."

"Few statements could be made which would better convince the average man that this country leads the world in the demand for timber. It is made by Treadwell Cleveland, Jr., employed by the United States Forest Service. In speaking further of the consumption of timber in this country, Mr. Cleveland says:

"At this rate in less than 30 years all our remaining virgin timber will be cut. Meantime, the forests that have been cut over are generally in a bad way for want of care; they will produce only inferior second growth. We are clearly over the verge of a timber famine.

### Is Not Necessary

"This is not due to necessity, for the forests are one of renewable resources, rightly used, they go on producing crop after crop indefinitely. The countries of Europe know this, and Japan knows it; and their forests are becoming with time not less, but more, productive. We probably still possess sufficient forest land to grow wood enough at home to supply our own needs. If we are not blind, or willfully wasteful, we may yet preserve our forest independence and, with it, the fourth of our great industries.

"Present wastes in lumber production are enormous. Take the case of yellow pine, which now heads the list in volume of annual cut. In 1907 it is estimated that only one-half of all yellow pine cut during the season was used, and the other half, amounting to \$8,000,000 worth, was wasted. Such waste is typical. Mr. R. A. Long, in his address on 'Forest Conservation' at the conference of governors last spring, pointed out that 20 per cent of the yellow pine was simply left in the woods—a waste that represents the timber growing on 300,000 acres.

### Waste at Mill

"The rest of the waste takes place at the mill. Of course, it would never do to speak of the material rejected at the mill as waste unless this material could be turned to use by some better and more thorough form of utilization. But in many cases we know, and in many other cases we have excellent reason to believe, that most, if not all, of this material could be used with profit. It is simply a question of intelligent investigation and, more than all, of having the will to economize.

"But there are other ways to conserve the forests beside cutting in half the present waste of forest products. The forests can be made to produce three or four times as rapidly as they do at present. This is true of both the virgin forests and the cut-over lands. Virgin forests are often fully stocked with first-class timber, but this stock has been laid in very slowly, on account of the wasteful competition which is carried on constantly by rival trees. Then, too, in the virgin forests there are very many trees which have reached maturity and stopped growing, and these occupy space which, if held by younger trees, would be laying in a new stock constantly. As regards the cut-over lands, severe cutting, followed by fire, has checked growth so seriously that in most cases reproduction is both poor and slow, while in many other cases there is no true forest reproduction at all at present, and there is but little hope for the future.

### REAL ESTATE TRANSFERS.

### ONLY CHOICE STOCK IS WANTED IN LONDON

The weekly circular letter of W. Dennis & Sons, London, dated October 25, says:

"London arrivals this week consisted of one Nova Scotia steamer bringing 23,000 barrels, and the usual American and White Star boats bringing California fruit and state peaches. The condition of the Nova Scotian fruit, particularly the Gravensteins, was very unsatisfactory, the stock was not fully ripe, but had developed a considerable amount of scale.

"Anything which showed up in good shape and clear met with a somewhat better market than last week. Ribbons and Blenheim were of the whole in fairly good order, and sold at prices which we consider satisfactory. The market is better on state peaches, and up to the time of writing the improvement continues. All this stock has been selling freely, and California fruit has been in plentiful supply, peaches being fairly well, although the demand has not been quite so active. Newtowns are on the downward trend and the market is not by any means clear.

"For your guidance we append prices for the week.

"California Newtowns, 4 tiers, 8c to 9c 6d per box; Newtowns, 4 1/2 tiers, 9c to 7c 6d per box; Comice pears, 7c to 11c per half box; Duchess pears, 10c to 10c 6d per case; Elberta peaches, 10c to 11c 6d per half box.

"As we stated in our last week's circular, there is undoubtedly an improved feeling among apple buyers, and we firmly believe that for any good stock which comes forward showing color and quality, satisfactory prices will be obtained. There is no outlet whatever for poor quality stuff. We have plenty of this stock coming in locally and shipments of anything of this class will only meet with disaster."

### BUTTE FALLS ITEMS.

Wana Parker and family have returned from their overland trip through the Klamath country. Mr. Parker says that Klamath is improving rapidly and that money is abundant among the people, but he prefers Butte Falls.

The dance at Albert hall was largely attended, and the "marks" were highly decorative as well as interesting. After the dance Mrs. Albert, assisted by Misses Mahoney, gave an elaborate chicken supper and everybody expresses satisfaction.

George Jones and several other parties formed the orchestra which played at the Halloween ball.

P. B. Bronson has gone to the valley.

Several fine specimens of building stone have been brought from the Fredenburg quarry and Mr. Fredenburg is building for his new home a fine fire-place out of the stone. This stone cuts saws, planes and chips and is a most excellent building stone.

Heavy rains have fallen here within the last week and the roads have become very bad, while travel is difficult for loaded teams.

Mr. Gieppart and daughter attended the ball.

L. V. Marney has sold his two residence lots to S. P. Matthews of Medford, and Mr. Matthews is preparing to build a house on them.

H. P. Edmonson has returned from the valley and reports heavy rainfall throughout the valley.

Frank Netherland has been having finishing lumber hauled for his new house, which he is building near Derby.

It is reported that R. L. Wilson, who left here for Medford for medical treatment, has gone north.

Our school teacher is making up lost time by having school on Saturdays.

Our hunters report game as scarce and the evenings are spent around the village store telling wonderful hunting stories.

Jud Edsall and Ed Coram have been in the Falls several times of late.

Ed Walker and family are in charge of the Iowa camp.

One of our citizens set a trap at a lick for deer and a cow took it in, costing the man \$50 to settle the bill.

C. E. Wolverton has been entertaining the Stalkers of Michigan and took them out to the hills for game, but did not get anything.

Aaron Beck has purchased two additional lots in the town and will improve them.

Miss Maud Hughes is still looking after the interests of Merchant Hughes and giving excellent satisfaction by her courteous treatment of patrons.

H. E. Boyden and wife of Medford carried awlbin with us Saturday on their way to their homestead, where they are planning to remain for the winter.

The Messrs. Stalker and their wives, who have been among us some time, left Monday for the valley and will continue on to California. They are much pleased with our town and expect to return and perhaps invest in some business.

The rains have made it so unpleasant that it is very disagreeable getting about and we have had to swap stories to pass much of the time.

The mill is running and getting out lumber for the schoolhouse.

**NEW BOX FACTORY FOR KLAMATH COUNTY**

KLAMATH FALLS, Or., Nov. 5.—Klamath Falls is to have a box factory that will be in operation next year, by the time the railroad reaches this city.

The Long Lake Lumber company has secured land from Charles G. Warden bordering on the upper Klamath Lake for a site. A spur from the main track of the California Northwestern railway is already located, having been a consideration of the right of way grant from Warden to the railroad company. Contract has been signed by the Long Lake company and one of the largest wholesale dealers in boxes on the Pacific coast for all the product the company can turn out. Millions of feet of timber that has never been touched borders the upper Klamath lake, and this is the first mill and factory of many that will be constructed eventually.

# REID OUT FOR PLATT'S TOGA

## New York Senatorship Will Be a Warm Fight—Woodruff Also Wants Job

NEW YORK, Nov. 5.—Members of the republican committee say that Whitelaw Reid is a candidate for the United States senate to succeed Senator Platt. The feud between Reid and Platt is one of the most long standing and politicians who are acquainted with the enmity between the two men say that Reid will find considerable opposition to his supplanting the former boss.

When President McKinley was elected, Reid, who had been ambassador to France under President Harrison, sought the post at King Edward's court. He was opposed by Senator Platt, who succeeded in preventing his selection. He was named an ambassador to Great Britain by Roosevelt. Since the Platt incident he has had but little love for New York's senior member of the upper house.

Among the candidates for the senate besides Reid are former Governor Frank S. Black, Congressman J. Sloat Fassett and Timothy L. Woodruff, chairman of the republican state committee. The republican caucus will select Senator Platt promises to be a lively gathering.

A large and well pleased audience was in attendance at the Bijou last night. Everyone pronounced the performance to be one of rare merit. A more interesting group of subjects has never been seen in the city. "The Stadium Sports" without doubt possess more interesting features than the majority of pictures of today. Nearly all of the leading sports are represented in these pictures, and the best athletes in the world participate. Water polo, the running races, swimming races, high diving, etc., are some of the interesting features of tonight's program.

"The Wrong Value" is a howling success. It produces laughter from start to finish.

"The Clown's Xmas Eve" is another subject of a highly interesting character. When looking for the big attractions, stop in at the Bijou.

### AMUSEMENTS.

Welsh vs West

The local sport loving public is awaiting with what patience they can muster for the coming of next Monday night and with it the wrestling match that is scheduled between Jack Welsh of the Twin Cities and W. H. West of this city who has for some time been the holder of all local laurels. The men have each of them a lengthy list of victories behind them and are evenly matched. They should therefore furnish an interesting event for those who love to see muscle and brain working together.

Mr. West needs no introduction to local people as they have for some time known of his prowess on the mat. Mr. Welsh comes with a barrel of clippings each and all of them giving him credit for work done in the past. He is out every day now training for the bout and no doubt all will get their money's worth who visit the Angle Opera house on next Monday evening.
