

TEN REASONS WHY You Should Be a Reader of The Pacific Monthly

- 1st. It is the leading magazine of Western America, published on the Pacific coast, edited by western men and its entire contents are Western. With pen, brush and camera, it tells the story of the wonderful progress of the West.
 - 2nd. No other section of the entire world is experiencing such a rapid industrial and commercial growth as that section of the United States west of the Rockies. It is a duty you owe to yourself to keep informed—The Pacific Monthly completely covers the field.
 - 3rd. There are opportunities for the extension of practically every line of business in this territory, and The Pacific Monthly tells of these opportunities.
 - 4th. If you are looking for a chance to invest or locate—commerce, farming, orcharding or professional work, if you are worn, tired or in ill health, seeking rest or reasonable, The Pacific Monthly will give you a thousand valuable hints.
 - 5th. Here also you can get close to nature. The great snow-capped mountains, in all their rugged grandeur, the boundless plains and the virgin forests, "God's Country," untarnished by the hand of man. Do you not wish to spend a few hours each month with us?
 - 6th. The best of western literature to be found in the Pacific Monthly. Live topics of THE DAY, stories of progress and of opportunities, the Romance of the mountains and the plains, always intensely human.
 - 7th. One never tires of beautiful pictures and the Pacific Monthly is famous for its illustrations, always a veritable picture book of Western scenery, from Mexico to Alaska and from Denver to the coast. No expense is spared in securing the most striking photos for reproduction in colors and halftones.
 - 8th. The Pacific Monthly should be in every home. From cover to cover it is clean wholesome reading of an educational nature. It is particularly interesting and valuable both to teacher and students.
 - 9th. Look upon your map, note the great area west of the Rockies, think of the wonderful resources of this section of the country—thousands of acres of agriculture land, billions of feet of standing timber, mineral riches beyond comprehension, extending to the shores of the mighty Pacific, the highway to the Orient—Do you not want to know more about this marvelous country?
 - 10th. A spirit of optimism prevails throughout the west that lends life and vigor to all. That is why the Pacific Monthly is different. It comes to you each month breathing this spirit of the west. It will put the red blood into your veins—try it.

BULLETIN ISSUED REGARDING SPRAYS

The Oregon Agricultural Society has issued the following bulletin on spraying:

Arsenate of lead is now the chief poison used in spraying for the codling moth, although paris green is cheaper and gives approximately as good results. Many brands of commercial arsenate of lead are now to be had, and as our observations go all are reasonable pure. The various brands may, however be arranged into two definite groups which may be termed the acid arsenate and the neutral or normal arsenate. While the evidence is not conclusive, it appears to be true that the acid arsenate have some tendency to injure foliage and that they cannot so well be used with the lime-sulphur solution as can the neutral arsenate. While the available evidence upon the above points is not sufficient to justify one in condemning the acid arsenate, growers are advised to use neutral arsenate wherever possible.

Bordeaux Mixture

Bordeaux mixture has been the principal preventive of fungous diseases. It is of some value as an insecticide, has a beneficial effect upon plants independent of its effect upon the insect and fungous parasites and may be used for most purposes in place of water in the preparation or the arsenical sprays.

Bordeaux for winter use may be as follows:

Copper sulphate 6 pounds
Quick lime 6 pounds
Water 50 pounds

Lime-sulphur solution

One application of lime sulphur solution spray each winter will do more for the neglected orchard than can be done in any other way by the same expenditure of cash and energy. It not only destroys San Jose scale, but it also destroys the branch from the Woolly-aphis, the eggs of the green-aphis, the pear-leaf blister mite, the hibernating larvae of the pine twig-miner, probably the hibernating larvae of the bud-moth, together with most other insects which may chance to be wintering upon the tree. It is also good fungicide. If applied in fall it is nearly or quite equal to Bordeaux as a preventive of apple-tree anthracnose applied to the pear trees just before the buds open in the spring it is a preventive of peach-leaf curls. The results of the past three seasons' work at the Oregon Experiment Station also show that when diluted it can be used as a substitute for Bordeaux mixture for spring and summer spraying with exceedingly good results.

There are two methods for preparing the lime-sulphur spray. The formula which has been most generally used in this state is as follows:

Quick lime 50 pounds
Water 150 pounds

Apple Scab

Spray with Bordeaux or lime-sulphur (1-20); first, when the blossoms are beginning to unfold second immediately after the blossoms fall; third ten days or two weeks later. If the trees were sprayed with winter strength lime-sulphur solution before the buds started, the first of the above applications may be omitted. If prolonged rainy weather follows the third spraying, a fourth two weeks later may be profitable.

Codling Moth

Add arsenate of lead or paris green to the second spray. Endeavor at this time by the most thorough to fill the blossom end of every apple with the spray. If this be well done, and if the fruit be again thoroughly sprayed late in June, fairly good results may be obtained without further applications. It is our experience however, that in the Willamette valley at least, it usually pays to spray once or twice for the second brood. The first of these applications should be about August 1; the second some three or four weeks later. While thorough work should be done at all times particularly applications should be placed upon the two first sprayings. If all of the first brood larvae could be killed there would be none of the second.

San Jose Scale

Spray in the winter with lime-sulphur, immediately after the leaves

KLAMATH FALLS AFTER CITY PARKS

KLAMATH FALLS June 2.—It is beginning to dawn upon the people of this city that immediate action will be necessary if a public playground is to be reserved on the upper lake. First Pelican Bay was closed. Odessa is the next in line, as it has already been acquired by Colonel Holabird, the agent of Harriman. Now local capitalists have purchased a tract of 224 acres on Crystle Creek, which, for the present at least, will be closed to the public. Odessa will not pass into Colonel Holabird's hands until June 25, and until that time it will be open to the public.

Steps are being taken by the Chamber of Commerce to secure a tract suitable for a park, which is to be reserved as a public playground, so that the "common herd" will not be deprived of sharing the gifts of bounteous Nature. Most of the favored spots in the north end of the county are now in the hands of private individuals or corporations, and for the time being are closed to the public. There are a few resorts now open and others will be opened during the present summer, but what is needed is a public playground that will be absolutely free to the public and to do this the Chamber of Commerce of this county is now putting forth efforts.

Most of the land suitable for a park are included in the reserve, and the Secretary of the Interior will likely be asked to set apart a tract for this purpose.

fall or before the buds start in the spring. Do thorough work. Soak every part of the tree.

Apple Tings

Practice clean culture, clean up and burn all the rubbish about the orchard. Spray when eggs are hatching in late May or early in June.

Phoenix School Closes.

The Phoenix public school closed last week after a successful term of eight months, under the direction of Geo. A. Stannard as principal, Miss Stannard as teacher in the primary department. An entertainment on Tuesday evening marked the close of the year and was given in the assembly room of the new brick school-house which was completed and occupied only last January. The assembly room was occupied for the first time on the occasion of the entertainment and was filled with 300 friends and patrons of the schools. Four pupils completed in full the eighth grade work and were awarded diplomas, Andrew Johnson, Lena Johnson, Theo. Fish and Robert Farrey.
