EDITOR PIPER OPERATED ON FOR APPENDICITIS

PORTLAND, Or., Sept. 14.—E. B. Piper, managing editor of the Oregonian, who was operated on yesterday at the Good Samaritan hospital for appendicitis, passed a good night and is resting well today. The surgeons predict that he will be out of the hospital within two weeks.

An Independent Miller. When Frederick built his famous palace of Sans Souci there happened to be a mill that greatly hampered him in the execution of his plans, and he asked the miller for how much he would sell it. The miller replied that for a long series of years his family had owned the mill, which had passed from father to son, and that he would not sell it for any price. The king used every solicitation, offered to build him a mill in a better place and pay him, besides, any sum he might demand, but the obstinate miller still persisted in his determination to preserve the inheritance of his ancestors. Irritated at last by his conduct, the king sent for him and said in an angry tone: "Why do you refuse to sell your mill notwithstanding all the advantages I have offered you?" The miller repeated his reasons. "Do you know," continued the king, "that I could take it without giving you a penny?" "Yes," returned the miller calmly, "if it were not for the chamber of justice at Berlin." The king was so flattered by this answer, which showed that he was incapable of an act of injustice, that he dismissed the miller without further entreaty and changed the plan of his garden. A Philosopher's Fable. Arthur Aull is responsible for this one: "Folly, Genius and Common Sense once went walking and came to a stream. Genius, having his head in the clouds, naturally started to wade across, paying no attention to the depth. The waters soon went over his head, and he was drowned. Common Sense hunted for a safe way to get across, and finally he found a foot log. As he got out about the center of the stream the log swayed, and he fell into the water and sank to rise no more. Folly stopped at the bank of the stream to amuse himself by throwing pebbles into the water and watching the waves. He sat upon the moist, cold bank until he caught a cold which developed into pneumonia, of which he soon died. Moral.—It doesn't make much difference, after all, whether you are a genius, a sage or a fool. You'll get it sooner or later anyway."—Exchange. Told to Earn His Own Salary. Commodore Vanderbilt discovered in James H. Rutter, then in the employ of the Erie railroad, a man he believed the freight department of the Central needed, says the Baltimore News. It is related that some time after he took charge of the Central's traffic office Rutter called on the commodore to submit a plan for improvement. When he had stated the case the president looked at him sharply and asked: "Rutter, what does the New York Central pay you \$15,000 a year for?" The reply was, "For managing the freight traffic department." And then the commodore said, "Well, you don't expect me to earn your salary for you, do you?" Rutter went out and carried through his plan on his own judgment. The result was highly satisfactory. Rutter became president of the Central. Up to Snuff. A man by workman's garb one day called at a local dentist's, and the door was opened by a maid. Workman—Is the gent in that draws teeth? Servant—No, sir, but I expect he will be in shortly. Workman (pausing on doorstep)—Does he give gas? "Yes." "What does he charge?" "One dollar." "What—one dollar! Do you mean to say, miss, a fellow's got to swallow over 1,000 feet of gas to have one tooth pulled out? No fear, I reckon I know a bit about it, for I work down at the gas works myself. I'll go to another dentist and have it pulled out without gas."—Exchange. Not Interested. "I have called," said the book agent, "to see if I can interest you in a little work." "Young man," snapped the woman who answered the door, "just now I am interested in washing my dishes, dusting, cleaning up after the paper-hanger, making six beds, polishing the hardwood floors, ironing my husband's shirts, getting two more meals today, darning blue pairs of stockings and stringing my sweet peas, and I might say that that's more work than you men ever thought of doing. No; you can't interest me in any more."—Detroit Free Press. Getting an Early Start. "Father, what do you wish me to do when I grow up?" "The same as I am, my son—a lawyer." "Then instead of wasting any more time on arithmetic, geography and math truck I'd better be getting at the hypothetical question, hadn't I?"—Judge. The owl may not be as wise as he looks, but he is wise enough not to try to work both the night and day shifts.—Athena Globe.

HOMES AND CROPS. BURNED IN CALIFORNIA. OXNARD, Cal., Sept. 14.—Fire is sweeping the hills and canyons of the Los Posas valley, doing great damage. Several buildings have been burned. A telephone message from Mrs. James J. Hitch said that the flames had reached her home and that she had sent her hired girl down the canyon and was preparing to flee for her life. Valuable crops have been destroyed. Orrin M. Wilson, who has a home-stead in the Siskiyou across the Wagner gap, in what is known as the Glade creek country, says the need of that section is a wagon road leading out to valley points by way of Wagner creek, and that those having interests in that section are laying preliminary plans to secure such communication. A Hungry Rabbit. "I do not think I was ever so non-plused in my life," said a conjurer, "as once when performing my card and rabbit trick. I ask a member of the audience to tear a card into small pieces and give them all to me except one. Later in the trick I produce a rabbit from a box, and tied round its neck is a card with a piece missing. It is then found that the piece which the member of the audience holds exactly fits and completes the second card. On this particular occasion I allowed the rabbit to remain in the box too long and when I produced him found that he had chewed the card round his neck to bits. Needless to say, the laughter when the audience grasped the trick the animal had played on me was loud and long." As Walter Saw It. Walter, aged seven, is a wise son who knows not only his own father, but his own mother likewise. "Now, Walter," said the teacher, "if your father could do a piece of work in one hour and your mother could also do it in one hour, how long would it take both of them to do it together?" "Three hours!" replied the scholar without hesitation. "Wrong!" said the teacher. "How do you make that?" "Three hours," repeated Walter stolidly, "counting the time they'd waste arguing about how it should be done."—London Scraps.
