Lavender Oil. As four-fifths of the oil extracted from lavender is concealed in the bloom the harvest takes place just before the flower begins to fade at the end of August. The oil is distilled by means of steam, which is compelled to penetrate the closely packed lavender, afterward being drawn off in pipes that run through cold water. In this manner the steam is reconverted into water, but the process of passing through the lavender has extracted the oil, which floats on the surface of the water as it runs into glass jars down below. These jars have sprouts in the center, thus enabling the water to run out while the oil collects above the level of the exit. In this the first stage the oil is of a brownish blue tint, and it now has to be refined by passing once more through water. Thus all impurities are removed, and the oil runs out white, save for a very pale blue color similar to that observed in paraffin. Three pounds of oil will make thirty gallons of the perfume. The majority of ladies would be surprised if they were informed that a bottle of lavender water contains but about a thimbleful of pure oil, for a larger proportion would not only render the water too strong for use, but would burn holes through the handkerchief wherever the scent touched it.—London Standard.

The Poor Bridegroom. "Even the English language emphasizes the insignificance of a man at his own wedding," said the prospective bridegroom disconsolately. There isn't an independent word to designate him. He is merely called the groom of the bride, as if he were just about on a level with the bridesmaids and a little below the maid of honor. Best man, of course, means the bridegroom's best man, but the phrase itself tends to exalt this individual at the expense of his superior. "Then there's no adjective to describe what pertains to the male half of the affair. You can't speak of the 'bridegroomal trousers or necktie. On the other hand, 'bridal' applies not only to the possessions of the girl, but to what relates to both of them equally, like the trip and the bridal chamber. The very words 'matrimony' and 'matrimonial' are from the feminine side only. 'Patrimony' has nothing to do with the nuptials. It applies only to wealth and signifies that a man's part in the affair is to get out and hustle for the cash."—Philadelphia Ledger.

How Standing Armies Originated. The earliest European standing army was that of Macedonia, established about 358 B. C. by Philip, father of Alexander the Great. It was the second in the world's history, having been preceded only by that of Sesostris Pharaoh of Egypt, who organized a military caste about 1600 B. C. Of modern standing armies, that formed by the Turkish janizaries was first, being fully organized in 1302. It was a century later that the standing army of France, the earliest in western Europe, was established by Charles VII. In the shape of "compagnies d'ordonnance," numbering 9,000 men. Rivalry thereupon compelled the nations to adopt similar means of defense. In England a standing army proper was first established by Cromwell, but was disbanded under Charles II., with the exception of a few regiments called the guards, or household brigade. This was the nucleus of England's present army.

A Girl's Preparedness. There is something very pitiful about a girl. She wears calico, but talks knowingly about the latest styles in silks. Her home is furnished plainly, but she knows the latest styles in furniture; she knows how the silver-ware should be arranged at dinners, the latest stitch for the marking of monograms on the finest table damask, the etiquette to be observed at a dinner, a reception or a ball, although she never attended anything more than a neighborhood party in her life. Her father's monthly income is not as large as the pin money a rich girl would spend in a day, but she knows what the rich girl should wear and buy to be in touch with the times.

NOTICE TO RED MEN. All members of Weatorka tribe, No. 30, are requested to be present at the next regular meeting of the tribe Saturday night, October 9th. Business of importance will come up.

SPANIARDS LOSE ANOTHER BATTLE

LISBON, Oct. 8.—The Spaniards lost heavily in another reconnoiter according to day's dispatches from Melilla. A large force of infantry and cavalry were trapped by the Riff tribesmen. The infantry was caught in a withering fire in a shallow ravine, with the tribesmen concealed on both sides. The cavalry covered the infantry's retreat. Many cavalymen were killed. Seventy were captured. It is reported the tribesmen slaughtered the captives in cold blood. All the cannons and supplies belonging to the expedition were captured by the Moors.

TAFT AGAIN LEADING THE SIMPLE LIFE

WAWONA, Yosemite, Cal., Oct. 8.—Taft was up before 6 o'clock today and left the hotel three-quarters of an hour later bound for the Mariposa grove of big trees. The day's itinerary will bring him back to Wawona in time for luncheon, and the afternoon will take him up to Glacier Point, where he will dine. He will stay at the Sentinel hotel over night and Saturday will start to civilization via El Portal and Merced. While in the homelike little hotels the president eats his meals in the public dining rooms and spends part of his time in the comfortable warmth of the log fires. He delighted two hotel proprietors by signing his name in the registers. Taft will be in fine voice when he starts southward, thanks to the rest.
